INTERPRETING EARLY HELLENISTIC RELIGION

A Study Based on the Mystery Cult of Demeter and the Cult of Isis

HELSINKI 1996

Sale: Bookstore Tiedekirja, Kirkkokatu 14, FIN-00170 Helsinki, Finland
Acknowledgements

This book is based on my I dissertation defended at the University of Helsinki in September 1995. I began to study Hellenistic religions as a member of the research group of the Finnish Archaeological Institute at Athens in 1989. Since then I have continuously been given a great deal of support and guidance by Professor Jaakko Frösén, then the director of the Finnish Institute at Athens. I am especially grateful for the time spent as the assistant of the Finnish Institute at Athens where the major part of my dissertation was written. Thus I wish to thank the former director of the Institute Professor Gunnar af Hällström for all the support he has given me. I am also indebted to Mrs. Maria Martzoukou for her sincere encouragement and friendship which have helped me while writing the study. I got support also from the staff of the neighbouring Swedish and Norwegian Archaeological Institutes at Athens who have given me a possibility to work at their premises and to participate in their seminars. Especially thanks are due to Professors Erik Østby, Berit Wells and Mr. Arto Penttinen. This book, with some corrections and slight variations from the dissertation, was completed in 1996 when Kirsti Simonsuuri has been the Director of the Finnish Institute. I want to thank her as well.

My warmest thanks go to the persons who read the manuscript and from whom I have received valuable criticism. Also, I have enjoyed unforgettable discussions with them on the theme of my study and related matters: Prof. Jaakko Frösén, Prof. Maarit Kaimio, Prof. Paavo Castrén, Lic. Phil. Jari Pakkanen, Lic. Phil. Björn Forsén, Lic. Phil. Arja Karivieri, Ms. Annie Hooton, Ms. Gunnel Ekroth and Ms. Anna Pietiläinen.

While working at the Department of Comparative Religion at the University of Helsinki I found many good friends and colleagues; with them I have had numerous fruitful discussions over the years. Carrying out this research would not have been possible without their support. The long-lasting sessions of discussion with my colleagues have been of great value; thus, my cordial thanks are due to Veikko Anttonen, René Gothóni, Mika Hakkarainen, Raimo Harjula, Tua Korhonen, Martti Leiwio, Harri Markkula, Heikki Pesonen, Ilkka Pyysiäinen, Tiina Purola, Erja Salmenkivi, Olli Salomies, Tom Sjöblom, Terhi Utriainen, Manna Vesterinen and Sampo Vesterinen. Their help has meant to me probably much more than they think. Furthermore, I am indebted to Dr. Antti Arjava, Secretary of the Board of the Finnish Institute at Athens, for all his support in the publishing process of this book. Ms. Brenda Conrad from Athens has done the language revision (the remaining errors are mine due to later changes), and Jari Pakkanen has helped me a lot with English as well as with all kinds of pragmatic matters I faced during the writing process. Finally, I wish to thank my parents for their support.

I have received financial aid from the Foundation of the Finnish Institute at Athens, the Cultural Foundation in Finland, the Alfred Kordelin Foundation, the University of Helsinki, the Centre for International Mobility, and Finnair. From 1994 I have had an opportunity to carry out my work at the Finnish Institute at Athens.

I am more than grateful to my family, to whom – Jari and all the Fauna at home – I dedicate this book.

At Athens 9.9.1996
Petra Pakkanen
I. Introduction

1. Problems

This study deals with early Hellenistic religion in Greece, especially in Athens. Its focus is the examination of the nature of Hellenistic religion on the basis of two cults, the Great Mysteries of Demeter and the cult of Isis, both of which are claimed to be mystery cults. The Hellenistic era has been seen as a period of change: the city-state (polis) as a political and social institution is believed to have died out; old, traditional public cults were challenged by new ones from outside; new governing bodies and new kings, who were both rulers and gods at the same time, appeared. In religious life, new kinds of formulations and institutions emerged causing changes in the position of ordinary people. The religious history and political history do not fit completely into the same periodization, which itself is an interpretative perspective of historical generalization, because 'Hellenistic' as a religious continuity extends beyond political limits. For this reason the

---

1 The Hellenistic age is the historical period between the death of Alexander the Great in 323 BC and the rise of the Roman Empire in the first decades of the Christian era. The concept of 'Hellenism' itself is modern. In the history of religions this period often is seen as a kind of 'axial age' (from K. Jasper's term Achsenzeit postulated in 1949 in Vom Ursprung und Ziel der Geschichte, cf. Eisenstadt 1982, 294) which involves the emergence of individuality, human awareness and the religious formulations of salvation and liberation. See Eisenstadt 1982, 296-298; Hicks 1989, 29.
term 'Graeco-Roman religion' in research literature often seems to be an expansion of the term 'Hellenistic religion'.

After the introductory sections of this study, Chapter Three describes two cults, the Eleusinian Great Mysteries of Demeter and the cult of Isis, as studied from the primary sources. In the fourth chapter, the 'mystery' character of the two cults is studied, and in the fifth, the concepts characterizing Hellenistic religion will be interpreted and re-evaluated on the grounds of the previous chapters. These have been selected from the vast literature concerning Hellenistic religion which usually identifies four concepts considered to cover the nature of the religion of this particular era: 1) syncretism, 2) the monotheistic trend, 3) individualism, and 4) cosmopolitanism. In the research literature these concepts have become accepted as generalizations characterizing Hellenistic religion, taken a priori without reference to their meaning in a given context. My task is to locate them in Hellenistic Athens and try to discover what their contextual content might be. Did the Athenians themselves recognize the existence of such ideas which might correspond to the above mentioned terms? Is there any coherence between them as theoretical concepts as used by scholars and contextual historical life? I will call into question the used assumptions, and suggest some answers as to their meaning as a part of Hellenistic religion as they emerge in the sources. I will explore the relationship between the scholarly use of the terms and the scholars' assumptions in the contextual source material.

The problem of mystery religions is studied because both of the cults studied here are called mystery cults in the research literature. In Athens during the period under examination, however, the two cults differed radically from each other, and, in fact, the Athenian third-century cult of Isis should not be called a mystery cult at all. This observation provides an interesting opportunity for the examination of the concept of the mysteries, and to try to determine an approximate date for the emergence of the mysteries of Isis in Greece by comparing its contents and structures with that of her cult in Rome, where it certainly was a mystery cult.

2. Cults Studied

The material available for this kind of study is vast, on such a scale that it is necessary to choose exemplary cults to illustrate the religious life of the period. Thus, we must be satisfied with studying only selected aspects of the religious life in Athens and looking at the related areas mainly during the third and second centuries BC. The two cults chosen function as representative examples of the nature of religious life: The first is the cult of Demeter, her Eleusinian Great Mysteries, which was long and well-established in Athens before and during the Hellenistic era. Traits of Classical religion are to be seen in this cult, but also changes and new 'Hellenistic' elements. The second one is the cult of a newcomer, Isis, who was worshipped by a particular religious association at Athens and Delos and who came first to Delos and then to Piraeus as a foreign goddess. Religious associations were a typical phenomenon of Hellenistic times, especially in the third century BC.

Examining the association in which Isis was worshipped provides a view of the religious life of the associations as a whole as well.

The following reasons for the choice of these two cults are asserted: The traditional religious practices of the city-state were kept alive in early Hellenistic Athens without any dramatic break in tradition – the gods of the Greek pantheon had their own festivals, some of which were regarded as more important than others, especially to Athens as a city, and thus maintained a remarkable continuity from Classical to Hellenistic times. Demeter warranted more festivals than any other deity honoured in the Athenian city-festivals. Her Great Mysteries was the most important festival of the Athenian year besides the Panathenaia and City Dionysia, and took nine days in the month of Boedromion (from the 15th to the 23rd), and thus represents the typical cults of the polis well. In addition, it was a mystery cult with individualistic and cosmopolitan elements, the themes of interest to this study. The cult of Isis tends to cover another aspect of the religious life of early Hellenistic Athens; namely, that of the new cults of the foreign gods worshipped in the religious associations. My choice of this cult as an example was determined by its popularity, Isis having been claimed as the most popular deity among the foreign gods in Athens during the three pre-Christian centuries. The organization of the cult was similar to that of the other religious associations, thus representing this new phenomenon of religious life very well; some inscriptions concerning the cult are well-preserved and reveal much of the typical administrative functions of the religious associations in general. In the research literature the cult of Isis is usually called a mystery cult. In the source material, however, it appears as an established mystery cult only from the end of the first century AD onwards. Thus, the study of the cult of Isis brings interesting new information on the theme and concept of the mystery cults of the Hellenistic era from a point of view other than that which can be acquired from the material on the cult of Demeter alone. By choosing these two cults as examples, it is possible to study how the old and the new ways in religious life came together, and how they lived side-by-side in times of change.

3. Geographical Confines

The inherent interest of Athens depends on its special position in the history of the early Hellenistic period, and on the importance that this particular city still had as a contributor to religious, philosophical and social ideas. Despite Macedonian rule, Athens seems to have been able to continue its 'prolonged life of the polis', and, thus, it had a special position among the Greek cities; the Macedonian rulers after Alexander the Great

---

4 The Mysteries of Eleusis were held for some two thousand years with their heyday falling in the Classical and Hellenistic eras. They have been claimed to be the greatest of all ancient Greek religious festivals. See Mylonas 1961, 285; Keller 1988, 29–30. Cicero stated in the 1st cent. BC in Leg. 2.14.36 that "Athens has given nothing to the world more excellent or divine than the Eleusinian Mysteries" (translation C.W. Keys, The Loeb Classical Library 1988); see p. 115, n. 191.
6 See e.g. Ferguson 1911, 3–5.
had other primary interests and let Athens lead its own life. In this study Piraeus is treated as a part of and the harbour for Athens.

Delos is another main area considered, because it was a very important commercial centre and a cult-place for the Athenians as well as for Greeks generally. After the Peloponnesian War, Athenian control of Delos was reinforced by the formation of Athens' maritime confederacy in 378/7 BC when the administration of the Delian temples was reorganized under Athenian officials. For a century and a half after 314 BC Delos enjoyed the usual institutions of a city-state, and during the early third century Delos enjoyed a kind of neutrality as a trade centre of the Aegean. It was during that time that the population of foreigners grew up. The island became closely connected with Athens again when it was granted to her as a free port by the Romans. This was done in recognition of Athens' support for the Romans in their war against the Macedonian Perseus in 167/6 BC. Being under the supervision of Athens, the administration of Delos was organized according to the models of Athens herself, and lasted till 88 BC. Thus the evidence from Delos is very comparable to that of Athens.

In addition to Athens and Delos relevant material from other regions has been collected for this study; comparable examples, the hymns and aretalogies of Isis from Cyme, Maronea, Andros, Ios, Thessalonica and Madinat Maadi (Narmouthis) among other material, are taken into closer consideration in order to make the study more relevant. In the fourth chapter, the Mysteries of Isis in Rome during the second century AD are looked at more closely in order to compare the mysteries of the Romans with the cult of the same goddess at Athens in the third and the second centuries BC.

---

7 The period of Demetrius of Phalerum (317–307 BC) meant controlled autonomy for Athens, and the period of Demetrius Poliorcetes (293–289 BC) began with the restoration of democracy. Democracy was abandoned quite soon, and restored again in 287 BC after a period of oligarchy. After the Chremonidean war (267–262 BC) the period of economic decline in Athens began under the rule of Antigonus Gonatas ruling from Pella (245–239 BC); his rule probably influenced distant Athens only marginally. Demetrius II ruled in 239–229 BC and like his predecessor he had problems with the Northern borders, and thus Athens was not his main interest. The city declared its independence in 228 BC. Antigonus Doson re-conquered southern Greece in 227 BC, but Athens was able to remain as a city outside the areas conquered by him. Its relative independence lasted till the end of the 3rd century BC. C. Habicht 1992 (1994), 68–87 points out that the Athenians and the Ptolemies of Egypt had continuous good relations during the 3th and 2nd centuries BC. Athenians showed favour to the Romans who were the enemies of the Macedonians at the beginning of the 2nd cent. BC. See e.g. Ferguson 1911, 12–26, 69, 95; Holleaux 1930 (1989), 219–225; Rostovtseff 1941 (1972), 215–128; Will 1979, 84–100, 214–230, 338–340, 343–348; idem 1981 (1984), 30–32, 42–43, 117; Walbank 1981 (1984), 236–8, 240, 255–6, 446–7, 453, 466–468.

8 See e.g. Ferguson 1911, 314–315; Roussel 1916b, 1–7, 30–32, 97–99; Rostovtseff 1941 (1972), 230–232; Préaux 1958, 176–180.
4. Sources and an Evaluation of Sources

A. Inscriptions

Inscriptions form the basic material for this study. There are relatively many inscriptions extant for the two cults examined; in general, they constitute our main source of information about the Hellenistic world. In the case of Isis, the material from Delos is combined with that of Athens, because from Athens herself the amount of Isis- and Sarapis-inscriptions from the period is not covering enough. The Athenian inscriptions used are published in the *Inscriptiones Graecae* (mostly IG II/III). They deal with the official cult of Demeter, and the religious associations devoted to Isis and other deities in Athens and Piraeus. In the case of Demeter, for example, F. Sokolowski’s *Lois sacrées des cités grecques* (1962 and 1969) and I. de Prott’s & L. Ziehen’s *Légis Graecorum sacrae* (1869 and 1906) have been used among others in order to supplement the materials of IG. Inscriptions from Delos have been published in IG XI 1–4 and in ID (*Inscriptions de Délos*); and those of the Egyptian cults on the island are published and studied by, for example, P. Roussel in *Les cultes Égyptiens à Délos du IIIe au Ier siècle av. J.-C.* (1916a) and by M.-F. Bazlez in *Recherches sur les conditions de pénétration et diffusion des religions orientales à Délos II–Ier siècles avant notre ère* (1977). The inscriptions dealing with the cult of Isis have been collected by L. Vidman in 1969 into the publication *Sylloge Inscriptionum Religionis Isiacae et Sarapicae* (SIRIS). Dittenberger’s *Sylloge Inscriptionum Graecarum* (SIG), *Supplementum Epigraphicum Graecum* (SEG) and B.D. Meritt’s & J.S. Traill’s *The Athenian Agora Inscriptions* (1974) have been used as well for both cults and for other themes of this study.

It is the task of source criticism to pay attention to the religious, historical and social relevance of the material used in a study so that the interpretations being made on this basis are sufficiently valid; thus arises the question of the reliability of the material. Notwithstanding that M.N. Tod has stated that inscriptions hardly need any source criticism because of their objectivity and freedom from bias, there is a need for source criticism of inscriptions. They are frequently mutilated, their occurrence is not stable throughout historical times and places, and they have already undergone interpretation in the editing process.

Where inscriptions are concerned the questions of the so-called ‘external source criticism’ are casually quite easily solved: When was the text written? By whom was it made? To whom was it addressed? Is the text authentic? Inscriptions are often dated according to the *archonts*; the name of the one who paid for the inscription is often mentioned, their intention being to offer public information about official or private

---

9 In this corpus there are 35 Isis and Sarapis inscriptions from Athens: nos. 1–5 belong to the period between 333/2 BC and 116/5–95/4 BC, nos. 6–12 to the 1st cent. BC, nos. 13–16, 18 and 33a to the 1st cent. AD, nos. 19–20 to the 1st or 2nd cent. AD, nos. 17, 21–25 to the 2nd cent. AD, nos. 26–28 to the 2nd or 3rd cent. AD, nos. 29–30 and 33b to the 3rd cent. AD, nos. 31–32 to the period between ca. 150–350 AD, no. 33 is of uncertain date.

10 Positivistically M.N. Tod 1932, 32 states: “Rarely – I would say never – are we in our study of them confronted with problems of *Quellenforschung*.”

11 For the Hellenistic period especially, see e.g. Walbank 1981 (1984), 10–11.
matters. Dating is easy in some cases, but the problem of dating ‘undated’ inscriptions is more difficult because it was normal to copy inscriptions and the same conventionally accepted formulas were repeated over long periods of time. In addition, the questions of textual criticism have to be weighed. This means that the epigraphist must question the integrity and genuineness of the text, the principles by which lacunae should be filled by the editor, how the editor should use his knowledge of the formulas used and of the language in general, his knowledge of the historical events of the period, and be aware of subjective selectivity. A good epigraphist knows ‘the code’, the repeated textual and linguistic formulas which were used in this genre. This is why I, a non-epigraphist, have not gone deeper into these critical questions in this study. I have relied on the editor’s knowledge and used the published inscriptions as the source of information as such and tried to use the inscriptions that have been confidently dated according to information given in the text itself. I have given the datings in the footnotes as far as possible.

The value of inscriptions as primary source material on public matters, such as official religion of the city-states, can also be justified on the grounds of their character: at the public places of the city-states the majority of them were intended to give information to all those who lived in the cities. This information was usually about official announcements, rules concerning, for example, religious officials, performances of sacrifices or rites and festivals, lists of members of the accepted associations, votive offerings, etc. Dedications to certain gods are important because they reveal the manners of approaching the gods: what kind of epithets were used, how the gods were invoked. In Hellenistic times the number of inscriptions used as a public medium became more general; most relevant information was inscribed on marble. One more reason for the value of inscriptions is that there is no great lapse of time between the events and the recording of the facts. M.N. Tod was even ready to claim that, “inscriptions give us not traditions but fact.”¹² The problem is much more complicated with the text written by historians, because their personal affections play an important role. The historical background and motives for the information on deeds and actions stated in inscriptions is what a scholar must be ready to explicate. Nevertheless, it must be remembered that a separate inscription always deals with an isolated part of history, and, as such, it has few connections with the wider spheres of life. A historian may easily emphasize this isolation if he or she fails to take into account other contextual facts which can not be read from the inscription itself. That is why these ‘black spots’ must be supplemented by other source materials. In this study that material is to be found in ancient literature.

B. Ancient Literature of the Classical, Hellenistic and Roman periods

This group of materials is used in conjunction with the inscriptions in the study. The lapse of time is wider, because ancient writers often used to refer to the (distant) past, sometimes to the mythological one, especially when they wrote about religion. The geographer Pausanias (floruit ca. AD 150) is a good example of this. It would have been

¹² Tod 1932, 32.
optimal if most of the authors used had lived at the time under consideration. Unfortu-
nately, only a few of the historians or mythographers whose writings are preserved or
handed down to our day lived in Athens in the third and second centuries BC. Thus it
has been necessary to study the text of earlier or later authors, mostly those from Roman
times. In these cases, it must be remembered that the historical context and writing
situation differed from that of the Hellenistic period; most often the frame of reference
was determined by Roman policy (for example, Pausanias has been accused of being
favourable towards the Romans). There must be some kind of 'filter', therefore, a
consciousness of this fact, in using the texts of these writers as primary material.

The writers referred to represent different fields: historians, philosophers, geographers
etc. In the following I list the most important ones:

B.1. Texts from the Classical Period

Many texts were written in Classical Athens by philosophers, playwrights, orators and
historians giving useful references to religious cults. The philosophers Plato (427–347
BC) and Aristotle (384–322 BC) refer to religion on many occasions, but use the code
of philosophy and thus they usually approach religion in an allegorical sense. The
playwrights Euripides (ca. 480–406 BC) and Aristophanes (ca. 446–385 BC) wrote
plays set in Athens which, among other things, described religious practices, and espe-
cially those of Aristophanes mocked religious practices and beliefs in an ironical tone.
The orators Isocrates (436–338 BC) and Demosthenes (384–322 BC) referred to religion
on many occasions in their speeches giving the democratic Athenian point of view, thus
defending traditional Athenian religion.

B.2. Texts from the Hellenistic Period

Athenaion politeia, a text ascribed to Aristotle contains many significant descriptions
of religious life, among other things, and was probably written in Hellenistic Athens.
Aristotle’s pupil, Theophrastus (372–287 BC), wrote a description of a superstitious man

---

13 We only have very few extant fragments of the historians for the two centuries following 323 BC, even
though the names of 46 historians writing during this period are mentioned in other sources; see e.g.
14 Frazer 1898, xlix.
15 His Apologia (for the concept of religion), Epinomis (for the star cult), Leges, Meno, Phaedrus,
Respublica and Theaetetus are used in this study.
16 His Ethica Nicomachea and De Virtutibus et Vitiis are used in connection with the religious
associations.
17 The cult of Demeter and her Mysteries are an important frame of reference for his Bacchae and
Herculidae.
18 His Ranae, Thesmophoriazusae, and Lysistrata contain many references to the religious cults of
Classical Athens; the frame in the Thesmophoriazusae is the women’s cult of Demeter in Athens.
19 Isocrates’ Panegyricus, Demosthenes’ De Corona, Olynthiacus III and Contra Boeotum I are the
speeches used in this study.
in his *Characteres* (chapter 16). Menander (342–291 BC), the best-known representative of the new comedy, wrote his plays in Hellenistic Athens. These plays, which are preserved mainly as fragments, describe probable (or fictitious) situations in every-day life and thus contain valuable material from the point of view of religion as well. Menander was an aristocrat and an intellectual who particularly stressed his stance as an artist.

In Athens there was a tradition of writing histories of the city during the century between 370–270 BC. These writers are known as the Atthidographers, and they were interested in the legendary origins of religious institutions. Unfortunately, their writings have vanished except for quotations and paraphrases of which the fragments of Philochorus (the first half of the third century BC) are used in this study. Fragments of Heraclides Criticus, his description of Athens in the early Hellenistic times, and of Istros are also cited in this study.

B.3. Texts from the Roman Period

The geographer Strabo lived in ca. 63 BC–19 AD and his texts contain several references to religion. Plutarch (ca. 50–120 AD) offers valuable material as a philosopher, biographer and a member of the priesthood of the Delphian oracle institution. He was a native of Chaeronea in Boeotia which is close to Athens. For this study the most important text by Plutarch is in *Moralia V* (351c–438e) *De Iside et Osiride*. Plutarch also wrote about the lives of important men in *Vitae Parallelae* which are useful for this study. I have also used the remarkable works of Pausanias, the writer or geographer who might equally well be called a mythographer, because his writings are based on the mythical history of the Greeks. He offers a geography of Greece in his *Periegesis* (Description of Greece) containing ten books, the first one of which describes Attica and begins with Pireus and Athens. Pausanias lived in the second half of the second century AD and was a native of Lydia. His main interest lies in the sanctuaries, statues, tombs and the legends connected therewith. In connection with the Mysteries of Isis, the most used ancient text is that of Apuleius of Madauros from the second century AD, part of his *Metamorphoses*.

---

20 From the works of Menander only one complete and nine partial plays have survived to the present. It is most likely that some later fragments have been incorrectly ascribed to him.

21 The fragments of the Atthidographers have been arranged by F. Jacoby 1950 (FGrHist); and commented on by him in Supplement 1954, *A Commentary on the Ancient Historians of Athens*, Nos. 323a–334.

23 Pausanias mentions the Emperor whom he knows as ‘the first Antonine’ (Marcus Aurelius) and his war against the Germans and Sauromatae AD 166–176, but he does not mention the death of ‘the second Antonine’, Emperor Lucius Verus, which took place in 180 BC; see Jones (1918) 1978, ix–x (editor’s introduction to Pausanias’ books I and II).

24 Apuleius was born in AD 123 in the African city of Madauros. He was a wealthy traveller who spent a long period in Athens studying philosophy. *Metamorphoses* is at least in part an autobiographical story which describes the religious cults of the Roman Empire during his lifetime.
Interpreting Early Hellenistic Religion

Book XI, which is sometimes called 'The Isis Book', because it describes how a man called Lucius finds Isis as his highest salvatrix, she frees him from a spell which had caused him to become an ass, and he tells the inner secrets of her mystery cult in Rome. This offers good comparative material on the Mysteries of Isis in pre-Christian Athens and in Rome during the first Christian centuries. The text is completely free of an apologetic Christian frame of reference. The latest texts of the Roman era are those by Athenaeus and Diogenes Laertius; the first one wrote the so called Deipnosophistae in the late second and early third centuries AD, and the second one the famous De clarorum philosophorum vitis which contains biographies of ten philosophers and some references to the religious life of the time. It was probably written in the second half of the third century AD.

B.4. Texts of the Christian Fathers

It was forbidden to talk about the most sacred events which took place during the final stage of the initiation rites of the Mysteries of Demeter. This secrecy was surprisingly well kept, so that information about the contents of this rite was not revealed in the texts of the ancient writers. On the other hand, the Christian Fathers who were not bound to keep the secret because of their different frame of reference were quite eager to relate these 'horrible pagan practices' with the intention of stressing their own 'truth' as being more pure and noble. Such texts are polemic, the style indebted to rhetorical tradition, and thus they must be viewed as unobjective from the point of view of the history of religions. This is why source criticism has to be kept in mind, especially the question of the author's intention in writing the text. There is also the problem of whether some of the Fathers, especially Clemens of Alexandria, referred to the Mysteries held at Eleusis of Attica or to those of Alexandrian Eleusis. In Alexandria there was a suburb called Eleusis, and it is suspected that there was a mystery cult there as well. The most important Fathers who wrote against the mysteries in their texts are the following: Clemens of Alexandria's

25 The book has been a popular topic of research. A good commentary is offered by J.G. Griffiths (1975), Apleius of Madur: The Isis Book (Metamorphoses Book XI) in EPRO 39.

26 M.P. Nilsson 1950, 89–90 gives adequate evidence for the existence of the cult; G.E. Mylonas 1961, 300–301 and K. Clinton 1974, 8 support his view. M.P. Nilsson 1957, 66 states, however, that the Eleusinian Mysteries were not transferred to Alexandria, but that the cult of Demeter in this city was influenced by them. N. Hopkinson 1984, 32–38 states that the name (of the Alexandrian Eleusis) hardly have been adopted without the institution which made it famous, but evidence, literal or archaeological, for the Mysteries at the Alexandrian Eleusis is negative. He reasons his view by noting that no mention is made of the Mysteries at the Alexandrian Eleusis by either Strabo or by Clemens of Alexandria who discusses the Eleusinian Mysteries at length in Stromateis (5.70). P.M. Fraser 1972, 200–201 supports the negative view of the existence of the Mysteries there; he states that the Alexandrian suburb Eleusis on the east of the city was named after Eleusis in Attica, and there were held yearly festivals with competitions, but no Mysteries were included to these panegyres; see also H.I. Bell 1952 (1975), 18 who doubts the existence of the Mysteries at the Alexandrian Eleusis as well, and Merkelbach 1995, 161.

27 Clemens was born around 150 probably in Athens to a non-Christian family. He was active in Alexandria as the founder of the so-called 'Alexandrian School'.

*Protrepticus,* book II and *Stromateis* (which describes the Greek mysteries), Tertullian’s apologetic writings, Hippolytus’*Refutatio omnium Haeresium* (refutes the Mysteries of Demeter and Isis among others), Arnobius of Sicca’s*Adversus Nationes,* and Eusebius’ *Praeparatio Evangelica.* All of them intended to refute the Greek ‘pagan’ mysteries in their texts. In this study, Clemens of Alexandria’s writings are used because they deal with the mysteries most extensively.

C. Previous Research

The research literature which deals with Hellenistic religion is vast, even though the definition of the problems and themes studied in them differ from that of this study; the scope of questioning is different. An often used monograph dealing with Hellenistic Athens is W.S. Ferguson’s *Hellenistic Athens* published in 1911, quite an aged study from today’s point of view. That Hellenistic Athens has surprisingly been ignored by the researchers of antiquity may be due to its special character in the Hellenistic world and the lack of sources. C. Habicht’s study *Athen in hellenistischer Zeit. Beiträge zu Politik, Gesellschaft und Kultur* (1994) is the latest complete book on this theme, but none of its articles concentrate on religion.

Religious life has been mapped by a group of remarkable works including the second part of M.P. Nilsson’s trilogy, *Geschichte der griechischen Religion. Die hellenistische und römische Zeit* (1950). It is a classic and useful handbook with complete references. Of the extensive older studies L. Deubner’s *Attische Feste* (1932) should be mentioned. A.-J. Festugière has written a lot about Hellenistic spirituality, his *La vie spirituelle en Grèce à l’époque hellénistique ou les besoins de l’esprit dans un monde raffiné* (1977), for example, offering a good introduction. The same may be said of E.R. Dodds’ renowned *The Greeks and the Irrational* (1951). J.P. Vernant’s *Mythe et pensée chez les Grecs* (1965, English translation 1990) belongs to the modern studies and has many fresh ideas.

On the cult of Demeter, G.E. Mylonas’ *Eleusis and the Eleusinian Mysteries* (1961) has been of much use. K. Clinton’s *The Sacred Officials of the Eleusinian Mysteries* (1974) is a valuable study for the Eleusinian cult. Mysteries in general, including those of Demeter have been studied by R. Reitzenstein in *Die Hellenistischen Mysterienreligionen* (1910) and later on by W. Burkert in, for example, *Ancient Mystery Cults* (1987).

Some remarkable Isis-research has been carried out recently. It has been promoted by the series, published in Leiden under the leadership of M.J. Vermaseren, called *Études*

---

28 Tertullian lived around 160–225, a native of Carthago, and was one of the most important of the early Church Fathers.
29 Hippolytus lived in 170–236 and acted as presbyter in Rome.
30 Arnobius was a teacher of rhetoric from Numidian Sicca. He converted to Christianity around 295 and wrote apology texts at the beginning of the 4th century.
31 Eusebius from Caesarea wrote in the beginning of the 4th century.
32 In this text there is a passage 3.12.4 in which the Father cites Porphyry and which describes the Eleusinian Mysteries, but it is believed that this is a reference to the Mysteries of Alexandrian Eleusis, the cult following the model of the Attican equivalent: τί δὲ τῶν Δίατυτων πάλιν τοιούτα φησιν ἔχειν σύμβολα; see also Clinton 1974, 9 and p. 9, n. 26 above.

Since P. Foucart's Des associations religieuses chez les grecs. Thiases, éranes, orgéons (1873) there have appeared very rare monographs which describe religious associations. These are F. Poland's study Geschichte des griechischen Vereinswesens (1909) which deals with all the Greek associations, and the religious ones form only a part of the work; and M. San Nicolò's Ägyptisches Vereinswesen zur Zeit der Ptolemäer und Römer (1915, revised edition in 1972) which deals mainly with the Egyptian and Roman associations from the juridical point of view, but has some valuable references also to the Greek associations. Many articles dealing with religious associations among other things have been written, for example S. Dow's The Egyptian Cults in Athens in Harvard Theological Review 30 (1937), 183–232 and T. Brady's The Reception of the Egyptian Cults by the Greeks (330–30 BC) published in 1935.
II. Methodology

1. Methodological Approach to the History of Religions

A. Methodological Point of View and Method

The study of the history of religions involves some methodological problems. A historian of religions has to combine the methods of the neighbouring sciences, such as history and its various branches, philology and sociology, in a way that will produce the best possible result in each instance. What makes a study one which belongs to the science of religions is the discipline’s methodological point of view. This means that one starts by presupposing and relying on the specific religious dimension of human existence around which the many different forms of religion variously develop and express themselves. Thus religions, including those of historical times, are to be understood as expressions of human religious behaviour. In this way it is possible to penetrate into the meaning of religious phenomena and to understand foreign religions as well.\(^1\) Classical phenomenology of religion systematically studied the forms of religion as a branch of research which classifies and systematically investigates differing manifestations in religious life (even) on a global scale; it is the knowledge of the different ways in which religion

\(^1\) Cf. Reynolds & Ludwig 1980, 12.
appears when studied from comparative morphological-typological points of view. It sought to give universal perspectives on the forms and structures of religion as well as on the elements of religion. It was strongly pointed out that the phenomenology of religion was to be systematic, not a historical study of religions. From the time of G. van der Leeuw's (1890–1959) contribution, the first occurrence of the hermeneutically orientated phenomenological school in the Netherlands, however, hermeneutically orientated philosophical aspects began to complete this type of comparative religion. Stress was laid on the real essence (das Wesen) of the phenomenon. This presupposed an understanding of the meaning of the phenomenon, even though van der Leeuw identified the meaning of the phenomenon with the description of the phenomenon. Understanding the meanings of religion has been one of the tasks of hermeneutic phenomenology of religion which systematizes religious phenomena and looks for the intention and meaning of them. In my opinion, phenomenology of this type, which is orientated towards the understanding of meanings and the history of religions, should be combined, so that the empirical starting point of historical study may be enlarged to encompass the purposes of phenomenology which regard the value of the examination as a source for religio-historical understanding. This would also mean that the borders between the history of religions, the phenomenology of religion, the sociology of religion and the philosophy of religion would lose at least some of their importance. The phenomenology of religion is an auxiliary discipline to the history of religions, because the soundly executed phenomenology of religion always relates to history, and history includes sociological as well as

---

2 Hultkrantz 1970, 74–75; Gilhus 1984, 26; Pentikäinen 1986, 19–21. E.g. M. Eliade is a well-known representative of this; see e.g. his Patterns in Comparative Religion (1963). U. Bianchi 1994, 120 states "...method is also characterized by a comparison, not between isolated and bare elements found in different cultures, but between distinct cultural complexes and cultural processes."

3 E.g. C.J. Bleeker, 1954, 147 stated that the phenomenology of religion "intends to be an investigation into the structure and the significance of facts drawn from the vast field of the history of religions and arranged in systematic order."

5 G. van der Leeuw's main work on the methodology on the science of religions is Phänomenologie der Religion (1933).

6 G. van der Leeuw has been criticized because in his method the religious phenomena are taken out of context and there is no distinction between the phenomena and the categories of classification which are used to organize them. Gilhus 1984, 30.

7 Gilhus 1984, 34.

8 A representative of this is J. Waardenburg from the University of Lausanne; see e.g. his Religionen und Religion (1986). See also Pettazzoni 1954, 216–217 and idem 1959, 66 and Hultkrantz 1970, 79–80.

9 In the ‘30s, J. Wach strongly defended the aim of the history of religions as being to understand them and to portray them in separation from the philosophy of religion. Wach 1930 (1988), 19–25, 81–82. I cannot agree, however, with all J. Wach's ideas; for example, with the demand that the historian of religion should never base his research on material drawn from only a single area of religious life or that the history of religions must be strictly separated from the philosophy of religion. Ibid., 20, 82–95; see also Bleeker 1954, 148 and Pettazzoni 1954, 218.

10 On the tradition to divide the scope of research of the science of religion into separate domains, see Pentikäinen 1986, 16–25.

11 Bleeker 1954, 150; James 1954, 96; Eliade 1961, 7; Hultkrantz 1970, 76–77; Gilhus, 1984, 38. According to M. Eliade there remains a tension between those who try to understand the essence and the structures of religion and those whose only concern is the history of religious phenomena.
Interpreting Early Hellenistic Religion

philosophical observances. Discovery of context is the first step of the procedure. This implies an evaluation of the documentary material, and a study of its setting with respect to the contemporary life of the time. All expressions of religious experience are embodied and imbedded in a historical context, and thus they become historical documents comparable to all other cultural data, such as artistic creations, social and economic phenomena, and texts. One task of the historian is to represent events and processes of the past. The context provides meaningful data for such an understanding. Having knowledge of the historical situation of religious behaviour at the first level of the research process makes it possible later, in a concluding section, to abstract the structure of this behaviour, so that it can be analogically located in a multitude of situations where the meanings are structurally coherent. This involves making an effort to find a universal human category in terms of which the people’s religious activity can be understood. Distinct systems, which here are the religions of antiquity, have a cognitive value: they increase our knowledge both of empirical facts and of the structure and pattern of human reality. This study takes into account, on the one hand, what people in a certain historical situation said about and regarded as religion, and, on the other hand, viewpoints which stand outside, representing the point of view of the researcher. Thus, this approach might bind these views together, so that the first is a starting point (description of the cults) and the second represents the researcher’s interpretations (the results of the study). In other words, a contextualized historical study is to be enlarged into a phenomenological one. It is possible to elaborate a structure for the system of religion which prevails independently of historical facts and does not presuppose them. Parallels and analogies justify this view. Every allegation which is made concerning religion springs from noticing analogous beings comparative in nature, because identification in itself presupposes a comparison even with other religions and other elements of religion. Thus, this method purports to explain some universal structures and elements in a specific religion (Hellenistic religion in Athens) which is studied contextually in a temporally and locally defined context. This pursuit is ultimately hermeneutic in aiming to understand the religious behaviour of the ancients by offering some interpretations of their religion.

According to him this is due to the different philosophical temperament of the phenomenologists and the historians of religion.

12 Rudolph 1979, 103.
14 Ricoeur 1955, 41.
17 In cultural studies the method which asks for the meanings and evaluations of studied people themselves tries to discover and describe the pattern of that particular culture in reference to the way in which the various elements of the culture are related to each other. It attempts to describe the pattern of a culture in reference to the culture’s own classifications. To strive for generalized classifications is the intention in the ‘external’ method in which a researcher or analyst stands outside a culture to see its separate events as compared to those in other cultures. See Peito & Pelto 1970 (1978), 54–60.
18 Bleeker 1972, 44–45; Rudolph 1979, 104–105; Waardenburg 1986, 129.
19 Hultkrantz 1970, 84.
B. Religion as a System

In the introductory essay to the second edition of F. Cumont's book *The Oriental Religion in Roman Paganism* (1956), G. Showman viewed Hellenistic religion as "the apparently chaotic condition of paganism when viewed as a system". Despite the often noticed confusing character of the religious life of Hellenistic times, religion must be regarded as a system which has functionally adapted to the surrounding culture. The abstract level of a system of religion is general and intercultural, by which I mean the rules by which mythology and the cultic-ritual complex around it, and social as well as cultural institutions of religion, relate to each other and how they function as a whole. This is the phenomenological interest, and its aim is to consider the 1) meanings of the religious phenomenon studied (what was the meaning people of old themselves gave to religion?), 2) the structure of religion in its historical situation, and 3) the dynamics of religion, i.e. the processes of religious change. First of all this involves a choice of those themes and phenomena which are regarded as relevant for historical understanding. Examining structures and dynamics of the religions studied involves an effort to construct causalities.

C. The Concept of Religion

The concept of religion is crucial in this procedure. Defining it is both a prerequisite of a religious-historical study and, at the same time, the result of the whole study, because one of the most important purposes of this type of research is to construct a coherent and meaningful definition or description of a specific historical religion. As J. Smith put it, religion is created for the scholar's analytic purposes by his imaginative acts of comparison and generalization. The process of defining religion may be seen as a continuous interrogation rather than a definitive answer provided in advance of the empirical investigation that it initiates. Definition which is understood as a text (in the wide sense of the word, for example, "ritual as a text") leads, of course, to other texts where other aspects of religion in addition to those indicated by the initiating definition are encountered. On these grounds, W.R. Comstock states that an open definition of religion is a point of departure, not a conclusion. It must be noted that it is not possible to describe religion...
universally; it can only be derived from the context of which it is a part and to give definitions suitable to the particular case. Description is rarely absolute, that which tends to bind a separate phenomenon comparatively to a larger or universal whole or explain it in relation to it. The ambition of description is more modest. But from a description it is possible in a phenomenological sense to be directed beyond towards interpretation, because interpretation proceeds from explanation, and explanation is not contrary to interpretation and understanding. This means that the definition striven for is 'nominal' (in opposition to 'real'), so that it specifies how the term 'religion' is used, but does not pursue to designate the generally prevalent essence of religion which would be regarded as real and categorial. In general there should be no a priori definition of religion, therefore, the only way to begin is with a slight ambiguity: the common religiosity of mankind. Religiosity is a human being's self-regulating response to the pressures generated by particular situations within his social, historical, political and economic conditions. Religiosity must be supposed in the science of religion to be a sine qua non, and as such it is not easily reducible. It is the human being within a context which is interesting for a scientist of religions: homo religiosus is the basis, not his religion, which is actually unnecessary. Religion is not a category of human behaviour, but religiosity is a category for the existence of a human being, because it manifests itself in one form or another — at a practical or philosophical level — in many situations which have special importance or deal with existential or ultimate questions. Religious behaviour is one way to express, interpret and outline existence in the world. I would call this starting point the one which begins with the 'relative a priori', i.e. with religiosity, but not with the a priori definition of religion. It is worth noticing that the religious expressions of a religious man of historical times are nevertheless social in nature, because religion is strongly tied to the facts which relate to cultural, historical, political, economic, ecological and social situation. The religious manifestations preserved to our day tell us about socio-culturally determined religion rather than abstract religiosity. This is a reason why religion of the past should be studied contextually.

30 Cf. Wach 1930 (1988), 93, 107; idem 1951, 32 and idem 1958, 32. P. Ricoeur relies similarly on basic humanity in all history: "ce que l'histoire veut expliquer et comprendre en dernier ressort, ce sont les hommes. Le passé dont nous sommes éloignés, c'est le passé humain". He underlines in the hermeneutical sense the sympathy which constructs the bridge towards understanding humans of the past. Ricoeur 1955, 31–32; 298. See also Ries 1986, 331–333.
31 The term is used by Wach 1930 (1988), 106, but with a different meaning.
32 F. Dunand points out strongly that religion is always social in nature, and to try to find the essence of religion in homme religieux is ambiguous and dangerous. For him the interest of the science of religion is a group of humans, not an abstraction like a religious man, and as such religion is to be reduced to contextual facts; see Dunand 1976b, 483–486. Thus Dunand is in opposition to the view represented by M. Eliade (see e.g. Eliade 1961, 1–9).
D. Religion as a ‘Family-resembling Concept’

Analogy is a very important tool for approaching religions in a scientific sense, because we must find analogical elements in religions in order to handle them as religious phenomena. The religiosity found in different religions is considered an analogy which enables us to regard them within the same sphere. These analogies are like L. Wittgenstein’s ‘family resemblances’, the same elements found in different entities. The members of the family are separate, but share common elements which bind them to the same family. But they have no common essence: some religions are theistic, some atheistic, some have personal gods, some spiritual principles, some rely on linear concept of time, some cyclic, and so on. But just as family-resembling religions are similar in important respects to the others of the family, they are not similar in all respects to any, or in any respect to all. There is a network of similarities overlapping and criss-crossing. There is no characteristic that every member of the family of religions must have. These kinds of familial entities must be separated from strictly definable ‘universals’. In a historical study it is important to identify analogical elements in the different modes of thinking, because that alone enables understanding, understanding also of those things that seem to be otherwise. The diverse phenomena of the world’s religions are bound together by all sorts of metonymic connections which, while not yielding a common essence, do establish both continuities and disjunctions, similarities and differences. Religiosity is always present where something is seen as having deep importance for those to whom it counts as ‘ultimate concern’, to quote P. Tillich’s concept.

In addition to analogies there are contrasts that form our way of grasping the ideas and modes of thinking. Religious or sacred things and the non-religious or profane are in contrast to each other, and people construct the sphere of the sacred by excluding profane things and phenomena from that sphere. Every set of ideas or religious system can be apprehended through contrast with other systems. It should be remembered here that these kinds of binary distinctions are an analytic procedure used to grasp the ideas of a religious system, and their usefulness does not guarantee that existence is similarly ordered. The whole mode of thinking of a human being is based on the existence of analogies and

33 Cf. L.H. Martin 1983, 131 who opens his article on Hellenistic syncretism as a system by citing M. Foucault: “It was resemblance that organized the play of symbols ... resemblance played a constructive role in the knowledge of Western culture.” (Foucault 1971 (1973), 17.) Wittgenstein has an example of the games as a family with family-resemblances. He postulated also his famous example of the ropes which deserves reference here as well: There are separate and different hemp strands which are ‘individuals’, all of them have hemp as a common element which makes them ropes, even though one strand does not go through all the way in any of the ropes. Wittgenstein 1963, 66. With references to the Wittgensteinian principle see also McDermott 1970, 390–395; Bianchi 1972, 25 and idem 1994, 119–120; Smart 1979, 26–28; Comstock 1984, 512; Hicks 1989, 3–5.

34 Cf. Ricoeur 1955, 30.

35 Comstock 1984, 512–513.

36 Tillich 1957, 1–4.

contrasts, because it is this that enables category and definition-making. What we regard
as religiosity may exhibit a great variety in different cultures and at different times; we
should accept this variation without prejudice. Religion in society and as a part of human
life is not an autonomous phenomenon. This means that new and possibly very different
forms of human religiosity should be included in the definition of religion; the definition
must be flexible and creative. This is also true of questions about distant times. The gap
between times past and present, and differing elements in their religious life, make a
dialogue possible. Even contrast can be complementary in the long run, because the
pursuit of the method is understanding phenomena, and it proceeds by means of oscilla­
tion between the themes regarded as similar in different religions; i.e., those which may
be called religious, and particular religious systems, i.e., specific religions of the past or
present. 40

In a hermeneutic sense, we may call this procedure dialectic. The concept of a particu­
lar religion is sharpened in the course of the process, because there is an ongoing dialogue
between the particularities of the religious life in question and universal themes. Sec­
ondly, the matter of the subject, the religion studied, and the whole method of research
function reciprocally in the sense that the method progressively shapes and assesses its
evidence, while these objects in turn refine the method. 41 Methodologically no material
should be regarded entirely through concepts and ready definitions, but there should be a
readiness to see new aspects of the definitions through the material.

2. Discussion of Terminology

We cannot help the fact that we perceive religious behaviour through the lens of a
particular religious culture, usually the one in which we have been brought up. It is a
distinctive set of concepts, myths, institutional systems and so on, expressed through its
own particular terminology and vocabulary which is a complete system of concepts. 42 It
is possible to speak of the history of mentality of each historical epoch. In studying
terminology and the contents of the terms used in historical times, it may be possible to
scrutinize the specific mentality of the period. The only possible way to scrutinize the
meaning of the concepts of historical religion – which is the interest of this study – is to
start from our concepts and then to follow the changes and differences that can be
perceived between the modern concepts and their closest ancient equivalents. For exam­
ple, the Greeks did not have any single word denoting 'religion'. 43 The most extensive

is opposed to strict positivism which starts from documentation of the materials with the
methodological tools defined beforehand; cf. Ricoeur 1955, 27.
42 Hicks 1989, 8–9.
43 E.g. according to M. Dubuisson 1985, 82–85, cf. C. Koch 1941, RE, 20.1, cols. 1230–1232, Latin
pietas, which could be regarded as equivalent of religio, corresponds Greek εὐσεβεία. Basing his
argument on the text of Polybe, M. Dubuisson accounts that in Polybe δειοδοτικόν corresponds
eὐσεβεία and that Polybe mixes up, not in a pejorative way, δειοδοτικόν and religious sense of a
thing rather than forms an opposition between them, as is usually attested. The negation of εὐσεβεία,
δοεῖται, is studied in Chapter V.4.B.
word denoting 'sacred' in the Greek language is hieros (ἱερός) expressing mainly sacred which actualizes in activities, in cultic life. 'Αἵερος and ἀνόσιος (negative of ὁσιος, holy) could be counted as its opposite side like, for example, βέβηλος (to be trodden or to human 'profane' use). Religious observances, offerings or, more commonly, rites, are called τὸ ἱερό or τὰ θεία. The essential nature, meaning and significance of the specific terms which are important and widely used in the history of religions have to be investigated on the grounds of empirical research. These terms should be interpreted according to and related to the life from which they are derived. As terms they also form a basis for terminological use in the scientific sense, and the difference between these two aspects, their original use and scientific terminological use is explained. "No present is entirely new": deeper understanding of terminology involves examination of its roots and interpretation of the terms so that they are understood across temporal distance. Only in this way can their double meaning – that of the past and that of the present – be scrutinized. One of the most important aims of historical study is to re-compose and construct phenomena of the past retrospectively. Here, for example, the contents of the word 'mysteries' involves changes over time. My task is to follow the chronology that led this particular term to mean different things in the course of time.

When studying religious change which is closely related to social life, we are able to examine in the main material which relates to the institutional aspects of the religion of the Hellenistic times. Cultural and social change can only be understood in connection with the tension inherent in the symbolic and ideological premises of the civilizations studied. Most beliefs and values connected with them can be analysed as part of a society rather than as a separate cultural sphere. Even moral perceptions and general rules of decision-making incorporated into this change are bound to prevail on the social level. Thus new institutions, religious associations, can yield such insights.

In society human beings belong to different groups that leave historical records of themselves or secondary references to them. Groups create their own value systems, and people may adhere to these or refuse to do so. These values are legitimized by a group which functions as an upper structure. This makes it possible for the members of groups to internalize a group identity and thus co-operate with other parts (including other groups) of society. From this it follows that in the long run groups create values which are possible to identify in the remains of history, historical literature, artistic creations and so on, because every individual is bound to group values whether by acceptance or rejection of them. A group sharpens its own identity and thus 'creates' itself in a society by forming a contrast to the other groups. Such positions of contrast are very important, since they

44 The last one e.g. by Pausanias, see pp. 28 and 100.
45 Wach 1930 (1988), 104.
46 Ricoeur 1955, 26.
47 Eisenstadt 1982, 305.
form a basis for evaluating values and identities. A human being easily defines himself through polarities: "I or we are what those others are not, and vice versa". That is to say that value definitions grow from negations. This process is two-dimensional, and it is in a situation of active change, therefore, that the contrast is not only clearest, but also most creative, with new groups and group identities being born.

M. Douglas, who studied change in moral and value judgements, proposed a methodological model for this in her ‘grid/group analysis’. She said that “positions... (for example those of belonging to a group) are liable to be stable types, steadily recruiting members to their way of life which is at the same time inevitably a way of thought”. It is interesting to note that a group develops a communication code which it uses as a means of maintaining a prevailing inner social structure. It is a system of both communication and control. For an individual moving from one group to another means not only changes in the social structure, but also in that individual’s life, because it presupposes choice. One is born into some groups, primary groups which are – for example, tribe, family, gender – without having to make any choices and even without a possibility for such a choice. In the case of Hellenistic Athens there were many groups and this made it possible for an individual to consciously choose a group and integrate him/herself into its code. It is for the above reasons that the questions concerning group identity are important when studying change in Athens (and Delos) of the third and the second century BC. Change in the history of religions goes hand-in-hand with continuity. Religion and religious cults which included both change and conservative continuity had a remarkable role in this. The formalizing process of the new cults and their means of becoming officially accepted by the surrounding society are indicators of change in Athens.

III. The Cults of Demeter and Isis in Early Hellenistic Athens – Changes in Religion

1. General Overview of the Religious Situation in Athens During Early Hellenistic Period: Typology of Religious Cults

As stated above, in the Athens of the early Hellenistic period there was a great variety of religious cults, both the cults of the city-state and the cults of religious associations. Some of the latter were those of foreign gods brought into Athens during the fifth and fourth centuries BC. Foreign deities had been worshipped at first in private religious associations which thus became incorporated in the official repertoire of the city's religious life. In the course of time, mainly during the late third and second centuries BC, most of these cults became officially accepted. In the following, the cult of Isis serves as an example of a cult which was originally a private religious association and went through the process of gaining the status of a public and official religious cult. The field of religious cults was in any case widened, and the opportunities for the individual Athenian, metic or non-citizen, slave or barbarian, to choose a context for his religious activity were greater than before. It is for this reason that I first describe the field of religious variations in Athens and then study in detail the two case-cults.

1 See p. 49, esp. n. 154.
A. Festivals of the City-state

In connection with the official festivals of the *polis*, it should be remembered that they were days set aside by the Athenian state for the worship of deities. There were no purely secular festivals, but all holidays were holy days, because they were dedicated to a certain god or goddess. Thus, there was no rigid definition of what was really religious and what was not, because all official festive events were also secular in one way or another. It is for this reason that the official cults did not die out, but were celebrated regardless of political changes. The practice of inscribing official documents on marble continued, and the documents concerning state religion are among the most important of these sources. Inscriptions concerning state festivals are plentiful throughout the Macedonian (early Hellenistic) and Roman periods. Regulations, statements and honorary accounts in connection with the state festivals are dealt with in the Agora inscriptions, the official accounts, belonging to the period after Alexander the Great till the time of Hadrian. Most of the festivals also appear in early Hellenistic inscriptions. In these inscriptions the conventional formulas are the same as those in the Classical period.

It is also noteworthy that many of the names of the Attic months were derived from a cult title of Apollo, and in each of such months there was a festival in his honour, like in Hekatomboia(ν) the Hekatombaia, in Metageitnion the Metageitnia, in Boedromion the Boedromia, in Pyanepson the Pyanepia, in Thargelion the Thargelia. The names of the other months were derived from the following festivals: in Poseideon the seventh day was that of Apollo and the eighth of Poseidea, the festival of Poseidon; in Gamelia the festival of Gamelion was held probably with suitable dates for marriages (in memory of the hieros gamos of Zeus and Hera) and Lenaia for Dionysus; in Anthesterion the Anthesteria for Dionysus; in Elaphebolion the Elaphebolia for Artemis; in Munychion the seventh day was that of Apollo again and Munychia was the festival for Artemis; in Skiraphorion the Skira for Demeter.

3 See e.g. an important Athenian inscription IG II/I 3 1496 listing the sums of money set aside for the festivals celebrated by the city-state between 334/3–332/1 BC: The Great Mysteries (ll. 11, 39–40), Lenaia (ll. 10, 41, 81), Asclepieia (ll. 15, 45, 69, 85), City-Dionysia (ll. 17, 47, 86) Olympeia (ll. 19, 50), Bendidea (ll. 22, 54), Diisoteria for Zeus Soter (ll. 25–26, 55), Synokakia for Eirene (ll. 39, 63), the festival for Ammon (l. 39), Gamelia (ll. 39, 52–53), Panathenaia (ll. 35–38, 65), Eleusinia (ll. 66, 74) and the festival for Athena (Athena Demokratias) (ll. 67, 75).
4 These inscriptions have been collected and published by Meritt & Traill 1974. The festivals occurring in these inscriptions of the early Hellenistic period are: Chalkeia, no. 78, (= IG II/I 3 674), 1.16 (Athena); Stenia, no. 78, l. 7 (Demeter and Kore); Chronia, no. 81 (= SEG XXII 372), l. 6 (Kronos); Panathenaia, no. 81, l. 7. Many gods of the *polis* in honour of whom the deeds were done are mentioned in the inscriptions; e.g. Zeus, no. 81 (l. 6); Apollo Prostaterios, no. 89; Artemis Boulaia, no. 89, Demeter and Kore, no. 78.
5 Dionysus was among the gods who were most celebrated in Athens. His festival in the month Gamelion is mentioned e.g. in Prutt & Ziehen 1896, no. 1 (ll. 16–17), and Lenaia in IG II/I 3 1496 (ll. 10, 41, 81) from the years 334/3 BC (ll. 10), 333/2 BC (ll. 41) and 331/0 BC (ll. 81); Aristotle, Ath.pol. 57.1 mentions Lenaia of Dionysus, its *pompe* and musical contests; see also Heraclitus, frg. 15 stating that the rave festival Lenaia is celebrated for Hades and Dionysus.
6 Hecatombaia, a festival of Apollo had ceased to be of importance in Attica before Classical times (Parke 1977, 29); Boedromia is referred to by Demoethenes, Ol. 3.31; Pyanepia (for Apollo) was most probably linked together with Proerosia and the other Eleusinian festivals dedicated to Demeter,
Interpreting Early Hellenistic Religion

The most important and thus the most enduring festivals of the city-state in Athens were the Great Mysteries of Demeter, *Panathenaia* and *City Dionysia*, because they played a remarkable role in maintaining the position of Athens as a noble city and attracted people to Athens for the celebrations which lasted many days. There were also other traditional festivals mentioned by the authors who wrote in the Hellenistic period. The Attidigrapher Philochorus, writing in the first half of the third century BC, describes the festivals and religious practices of the Athenians, mentioning also *Haloa, Chytrai, Genesia*, the latter being the state festival in honour of ancestors. Sometimes there were reforms in the official cults, for example, in Hellenistic times new observances were incorporated into the city-festival *Olympieia* dedicated to Zeus Soter and Heracles; namely, popular cavalry exercises.

---

see IG II/IIIf 1363 (beginning of the 3rd cent. BC); *Anthesteria* is mentioned by Philochorus. frg. 84; *Elaphebolia* had in earlier days declined in importance as a festival and was dominated instead by the *City Dionysia* (Parke 1977, 125); *Munychia* was not a festival of great importance, at least by Hellenistic times (Plutarch refers to its origin in Thes. 18.2); *Thargelia*, Apollo's sacred day, is mentioned by Philochorus frg. 88b and Plutarch, Mor. 7.717d; the *Skira* dedicated to Athena is mentioned by Philochorus, frg. 14. See also the regulations concerning the cult of Apollo Erithaseos in IG II/IIIf 1362 (end of the 4th cent. BC).

The continuity of *Panathenaia* is seen in the early Hellenistic inscriptions concerning the organizations of the festival, e.g. IG II/IIIf 334 (335/4–330/29 BC); IG II/IIIf 657 (287/6 BC) concerning the *Great Panathenaia* of the year 302/1 BC I. 16–20; it is mentioned in the inscriptions of Roman times (AD 117–138) with the other Panhellenic festivals which included exercises (*Panathenaia, Olympia, Isthmia, Delphi*): IG II/IIIf 3163 and 3169/70 (a list of the festivals in the year AD 248); 3165 honours a winner at the Nemean games and at the *Eleusinia* in the 2nd cent. AD; see also IG II/IIIf 3198 (AD 262/3). The last-mentioned tells how the Athenian statesman P. Herennius Dexippus made an appearance in a *pompe* at the Acropolis and made a dedication to the goddess. This may have been done merely to maintain the ritual. Philochorus in the 3rd cent. BC describes the practices of *Panathenaia* and its spectacular *pompe* in frgs. 8–9 and 102. In the time of Pausanias this festival was regularly celebrated: see e.g. Pausanias, 1.24.1 who mentions that he saw the ship which was used in the procession of *Panathenaia*; see also *idem* 1.29.1. Dionysiac Panhellenic festivals were an occasion for the drama contests, important from the 6th cent. and throughout the Classical and Hellenistic times. Performing plays was, however, only one part of a festival which included various other activities connected closely with the cult of Dionysus Eleutherus, like the re-enactment of the original advent of Dionysus from Eleutherai, the *pompe* leading up to the sacrifices in the sacred precinct of Dionysus and the *komos*; see e.g. Philochorus' account on the festival, its popular and lively character in the 3rd cent. BC in his frg. 171; IG II/IIIf 1235 (275/4 BC) connects the benefactor of the Dionysiac drama contests and that of the Great Mysteries (II. 17–19); see also Pausanias, 1.21.1–2; Pickard-Cambridge 1968 (1953), 58–61 and the interesting article written by J. Aronen 1992, especially 23–24. About the Great Mysteries see Chapter III.2., pp. 29–47.

Philochorus, frgs. 83–84 (*Haloa*); 168–169 (*Chytrai and Genesia*). About the last-mentioned he questions whether it was celebrated as a public or as a private cult.

Parke 1977, 144. The cavalry exercises are described by Xenophon, Re.eq. 3.1–12; see also Plutarch's account of this festival and its cavalry exercises in Phoc. 37.1 and IG II/IIIf 1291 (middle of the 3rd cent. BC).
B. Official Cults of Deities

Throughout the period under examination, numerous deities of the Greeks were worshipped also outside the official polis-festivals and had their cults and temples in Athens. An interesting Athenian inscription IG II/III² 1367 from a date as late as the end of the first century BC, lists nine Attic months (Hecatombaion, Thargelion and Skirophorion excluded) mentioning the (private) offerings made to the gods during these months: in Metageitnion special kinds of baked cakes\(^{10}\) had to be offered to a god, whose name is, unfortunately, not preserved; in Boedromion cocks and grains of wheat to Nephthys and Osiris, piglets and drink offerings consisting not of wine but honey and milk to Demeter and Kore,\(^{11}\) gathering of the vintage to Dionysus and other gods; in Pyanepson cake offerings to Apollo and Artemis; in Maimakterion big cakes and offerings containing fruits, but not wine to Zeus (especially to that of the farmers); in Poseideon cakes to Poseidon associated with the ground (earth) and with the gods of the Winds; in Gamelion the statues of Dionysus\(^{12}\) were decorated with ivy; in Anthesterion libations had to be made; in Elaphebolion sacrificial cakes to Kronos, and finally in Munychion hens together with cakes were offered to Heracles.

In Hellenistic Athens the heroes and gods of Greek mythology were also worshipped.\(^{13}\) Philochorus mentions religious practices dedicated to the gods Apollo, Artemis, Dionysus, Athena Skira, Poseidon, Hermes and Theseus.\(^{14}\) In this period, personified abstractions and astrological deities became popular. In the epigraphical material, however, they do not appear with any frequency until the Roman Imperial times, and, thus, it is obvious that these cults, though known before, were more favoured after the early Hellenistic period.\(^{15}\) In the same way celestial objects were personified and worshipped, but this probably started before the personification of abstractions. Philochorus remarks that the Athenians

---

\(^{10}\) These sweet cakes were twelve in number and placed in a certain circle-shaped order (πόσπανον χοινικαίον θρόνυφαλον καὶ καθήμενον δοθεκιμαφαλον); this is mentioned in connection with the Metageitnion (II. 2–3), the Pyanepson (II. 9–11), the Poseideon (II. 16 and 19–20), the Elaphebolion (II. 23–24) and the Munychion (II. 28–29).

\(^{11}\) This is interesting, because the cock was an animal offered to Demeter during the Great Mysteries, and now the Mysteries of the Egyptian gods represented here by Nephthys and Osiris seem to have become identified with the Mysteries of Demeter held in the Boedromion. According to the myth of Demeter (Hymn Hom. Dem. 200), for memory of her fasting, it was prohibited to drink wine during the initiation days of the Eleusinian Mysteries.

\(^{12}\) Prott & Ziehen 1896, p. 11 (in the commentary of the inscription): Dionysus is here interpreted to refer to the statues of the god.

\(^{13}\) E.g. IG II/III² 4986 (3rd or 2nd cent. BC), an inscription connected to the cult of Heracles.

\(^{14}\) According to Philochorus, Neomenia was the day dedicated to Apollo frg. 88b; he mentions practices in memory of Artemis, and talks about the offerings (ἀμφίθων cakes) given to the goddess in her sanctuary, frg. 86b; he mentions the offerings of wine to Dionysus and the drinking habits of the Athenians, frgs. 5a–b mentioning that Dionysus got very drunk, but Apollo stayed peaceful and modest, frg. 172; according to him the Athenians worshipped Athena Skira, frg. 14; he mentions the temple of Poseidon (of the soldiers), frg. 26 and Theseus, the Theseion which had the right of asylia, frg. 177, and Hermes receiving offerings from new archonts, frg. 40.

\(^{15}\) See e.g. the 4th cent. BC inscriptions concerning the cult of the Moirai, IG II/III² 4971 and of Mnemosyne, IG II/III² 4962. The emergence of actual cults of personified abstractions is often seen as a Hellenistic phenomenon. There are exceptions, however, like the cults of Nemesis and Themis at Rhamnous about which see p. 101–102, n. 113.
Interpreting Early Hellenistic Religion

dedicate their religiosity to Mnemosyne (Mother of the Moirai), Muses, the Sun, Aurora (the goddess of the morning sun), Helios (the Sun God), the Moon, nymphs, and Aphrodite Ourania. All the Olympians had their sacred precincts, temples and statues which are described in detail by Pausanias later in the second century AD. Pausanias describes the Athenian sanctuaries, their cult images and myths; for example, Nike (Victory), Eirene (Peace), Moirai (Fates), Hebe (Youth), Hygieia (Health), and Peitho (Persuasion) are mentioned by him and in the sources of the Imperial period. Pausanias’ account concerning the Athenian Agora (1.17.1.) is revealing:

In the Athenian Agora among the objects not generally known is an altar to Mercy (Eleos), of all divinities the most useful in the lives of mortals and the vicissitudes of fortune, but honoured by the Athenians alone among the Greeks: And they are conspicuous not only for their humanity but also for their devotion to religion. They have an altar to Shamefastness (Aidos), one to Rumour (Feme) and one to Effort (Horme).

C. Private Religious Cults

The religious associations were as manifold as the official cults of the polis. Religious associations, thiasoi, eranoi and orgeones were dedicated to particular gods who were worshipped according to the rules of the association. Trade guilds and other associations were also dedicated to deities, but it is obvious that the intention of a man joining this kind of an association was not primarily religious. From the period between the last decades of the fourth century and the end of the third BC there are approximately 100 inscriptions concerning the associations, a great number of which are religious.

---

16 Philochorus, frg. 12. See also IG II/IIF 3165 (3rd cent. AD); 5000 and 5093 which mention a priestess of Helios.
17 IG II/IIF 3593 (Imperial period) contains mention of the priest and priestess of Nike; Pausanias, 1.22.4 and 1.24.7 (Athenian temple at the Acropolis); 1.1.3 (Piraeus temple of Athena and Zeus where the statue of Zeus holds the one of Nike).
18 IG II/IIF 4786 (Imperial period); Pausanias, 1.8.2 (the statue of Eirene).
19 IG II/IIF 5137; 11674; 13148; 11552 and IG III 1344 (late Imperial period); Pausanias describes the temple of the Seasons (Horai) and Moirai in 1.40.4.
20 IG II/IIF 5150 and 5154 (Imperial period) mention the priests of Hebe; Pausanias describes the altar of Hebe in 1.14.3.
21 Pausanias, 1.23.4.
22 Ibid., 1.22.3.
23 Translation by W.H.S. Jones, The Loeb Classical Library 1918 (1978). In connection with Athens Pausanias does not mention, however, one of the most well-known personified abstractions, Nemesis, whose cult is known, for example, through IG II/IIF 4747 (Imperial period) and whose cult at Rhamnous Pausanias describes in 1.33.2-8.
24 Dionysiac artists, for example, were dedicated to Dionysus; IG II/IIF 1325 (begins with the words ἱερὸς Διόνυσου. ὑπογείων ἐν Τύχην); 1326; IG II/IIF 1331; 1332 and 1338 are dedications of the ‘artists of scene’ from the end of the 2nd and the beginning of the 1st cent. BC (according to the latter they participated in the Eleusinia in Eleusis by giving libations and offerings in honour of Demeter and Kore); IG II/IIF 1341 (1st cent. BC) is a decree of the association (synodos) of the artists mentioning Apollo and Musai.
Inscriptions show that in Athens from the end of the fourth till the beginning of the second century BC there were associations of the foreign gods Bendis\textsuperscript{25}, The Mother of the Gods\textsuperscript{26}, Ammon\textsuperscript{27}, Sabazius\textsuperscript{28}, Adonis\textsuperscript{29}, Sarapis and Isis\textsuperscript{30}, Aphrodite Syria\textsuperscript{31}, Zeus of Labraundos\textsuperscript{32} and Aphrodite Ourania\textsuperscript{33}.

The number of associations seems to be most frequent in the third century BC, and during this period associations for the gods of the Greek pantheon with special aspects, like Apollo Parnessios\textsuperscript{34}, Zeus Soter (Saviour) and Heracles\textsuperscript{35}, Artemis\textsuperscript{36}, Asclepius and Hygieia\textsuperscript{37} were also established.

It is not possible to offer a complete typology of the religious cults and festivals which were available in Hellenistic Athens, even though it is evident that the variety and possibility of choice was great: the religious field was, indeed, colourful. It is not surprising that Pausanias (1.24.3) says of his time that, “the Athenians are far more devoted to religion (ἦ εὐθείᾳ) than any other men”. In the New Testament a similar view of the religious life of the Athenians is found in the Acts of the Apostles (Acta Apost. 17:17–18) which tells how Saint Paul sees everywhere in Athens veneration of idols and (…) he discusses with Stoic and Epicurean philosophers and he becomes accused of being a propagandist for foreign deities (ἐν εὐθείᾳ διοικοῦν δοκεῖ καταγγέλεις εἶναι).\textsuperscript{38} The Apostle begins his speech on the Areiopagus to the Athenians saying (Acta Apost. 17:22):

"Men of Athens! I perceive that in all things you are too superstitious" (κατὰ πάντα ως δεισιδαιμονεστέρους ὑμᾶς θεωρῶ).\textsuperscript{39}
The two popular Athenian cults studied in more detail below are intended to illustrate the characteristic polarity of Athenian religious life – the official religion of the *polis* and the private religiosity of the associations – so that the nature of the religious heterogeneity of the period would become covered.

2. Cult of Demeter: Eleusinian Great Mysteries

A. Continuity

When discussing the cult of Demeter, we should bear in mind that in Hellenistic Athens her cult was still a cult of the city-state and showed remarkable continuity. Some of the reasons for this were: Changes in political structure affected public and long-lived religious cults very slowly, because these cults had a significance also outside the political sphere. They offered a means of maintaining and expressing Athenian identity, something which was important for people living in the fourth and the third century BC Athens. The means was in the form of public spectacles, especially processions, included in these cults. Festivals had an inner symbolic meaning for the continuity of Athenian religion, and they expressed the importance of the old Greek traditions. Their location in Athens was important for the inhabitants of the city, because the cults increased the respect in which the city was held and at the same time made Athens known to Greeks in the larger Hellenic world. Athens was able to tell the story of its glory to the rest of the Greek world under the cover of religion, which functioned as a commonly shared factor. It focused people’s attention on the old traditions and on the special identity of the Greeks as *Hellenes.* In Classical times, the elements of particularism (the term understood in its political sense), had been central to the question of Athenian identity. Identity had been

---

40 Identity is always constructed by contrasting the things which are seen to form ‘us’ against those which are excluded. These things outside ‘our own’ sharpen the contrast and form the boundaries which may be called the national *ethnos.* The world outside is seen as culturally different, usually inferior to one’s own (ethnocentrism). Isocrates pointed out in *Panegyricus* (written ca. 380 BC) that “we [Athenians] alone of all the *Hellenes* have the right to call our city at once nurse and fatherland and mother” (25), that “Athens has become a teacher of other cities, and has made the name of Greek no longer a mark of race (genos), but an intellect, so that it is those who share our upspringing rather than our common nature who are called *Hellenes.*” (30) He continued by telling the story of Demeter: “that which was the first necessity of man’s nature was provided by our city ... when Demeter came to our land ...” (28) (translation G. Norlin, The Loeb Classical Library 1928 (1966)). In his description of the funerary speech of Pericles Thucydides already took the same tone in 2.41.1–2: “In a word, then, I say that our city as a whole is the school of Hellas (ἐκ νεκρῶν τε λέγω τὴν τε πάσαν πόλιν τῆς Ἐλλάδος πατέρων εἰς ...). For Athens alone among her contemporaries, when put to the test, is superior ...” (translation C.F. Smith, The Loeb Classical Library 1919 (1991)). Thus the Athenian identity here is constructed on the grounds of particularism, which stresses intellectualism and mythical religious traditions of the city itself. About the strong feeling of superiority in the Greek identity see e.g. Giovannini 1993, 265–267.

41 The term’s political meaning comes close to what could be called ‘separatism’ which includes a will to stress one’s own particular identity separated from that of the others. The term has also a theological meaning when it denotes nations which want to regard their own god as the one and only god suitable to that very nation; an example could be Judaism.
anchored in the polis which was seen as very special and glorious. Religion in Classical times was a mark of this particularist identity and functioned as a symbol for Athens. The city-state’s festivals were not primarily gatherings of individuals, but festivals of the Greek poleis which represented themselves during the festivities. They gave the rulers and civil servants an opportunity to make a public appearance. In these ways the Great Mysteries of Demeter fulfilled its role as a cult of the city-state in the Classical period, and it had a clear Panhellenic character, which, in fact, stressed the Athenian element and the importance of this particular city in the cult. In Hellenistic times it was still a very popular annual celebration open to every one with “clean hands and intelligible speech”\[42\]. This reveals that also in the Hellenistic era there was the need to express the importance of Athens for the sake of the continuity of the well-established and famous cult among the entire Greek world. In general the Panhellenic festivals expressed the homogeneity of the Greeks contrasted to the barbaroi.\[43\] In this sense, the particularistic element and the importance of Athens as a part of whole Greece was clearly involved in the cult of Demeter of Hellenistic times as well. It was one way for the Athenians to maintain their special position as inhabitants of a noble city.

The role of Athens, especially its absorption into the local Eleusinian cult, has been a subject of discussion.\[44\] Certain political factors should be pointed out here, because they also played a remarkable role in the cult in Hellenistic times. It is most probable that the cult was originally a local Eleusinian one with, it has been argued, distant roots in the Mycenean world. We should be cautious in this matter, because there is no reason to search for the original form of the Eleusinian cult outside its proper location of Eleusis.\[45\] At Eleusis it was first a local cult with agricultural and fertility aspects, and it was mainly in the hands of a noble genos, the Eumolpidai,\[46\] at least from the end of the seventh

\[42\] Intelligible speech refers to the Greeks excluding barbaroi (who were not humans in the full sense, because their language was not — as they thought — developed to the level of the Greeks themselves) and clean hans referred to the moral qualities of potential initiants; murder made one’s hands dirty, and the soul should be conscious of no evil as well as the heart being pure and holy. This statement is not preserved for us in a complete form, but it is referred to by e.g. Aristophanes, Ran. 354–356; Isocrates, Paneg. 157; Suetonius, Ner. 34; note also Herodotus’ statement 8.65.4: “Whoever of the Athenians and the other Greeks wishes, might become initiated.”

\[43\] For the concept of barbaros see, e.g. Levy 1984, 6–17. He shows that the concept has a double-meaning: firstly an objective and descriptive one which denotes non-Greeks, and secondly a pejorative one which underlines cruel, despotic and non-cultivated habits of the non-Greeks. Thus the Greeks knew barbaroi as non-Greeks and barparophonoi as those who did not speak Greek.

\[45\] See e.g. Nilsson 1932, 161, 165 and idem 1950, 445; Mylonas 1961, 29–33; 49–54; Le Corlu 1977, 73; Dietrich 1986, 43, 45, 50–51, 59. This is mainly the view of M.P. Nilsson: “Eleusis is a Mycenian site” (1932, 161). It should be noted, however, that physical survivals (architectural remains, votives and so on) do not entail the same cult having endured, because the cultic-ritual complex is always a socio-political phenomenon as well.

\[46\] Pausanias has an interesting genealogical note on the Eumolpidai in 1.38.3. He mentions that the Eleusinians fought with the Athenians, and thus it followed that the Eleusinians were to have independent control of the Mysteries, but in all other things were to be subject to the Athenians. The minister of the two goddesses was Eumolpus. W.S. Ferguson 1910, 278–9 suggested that the Eumolpidai had originally been a guild (thiasos). But it must be remembered that only later, by the beginning of the 4th cent., phratrial were subdivided into units called thiasoi, and they have to be
Interpreting Early Hellenistic Religion

century to the fifth BC. Between the seventh and the fourth centuries BC the Mysteries of Eleusis were taken over by Athens and many of the rituals, those preparatory to the initiations, were transferred from Eleusis to Athens and made subject to Athenian control, even though the important role of the Eumolpidei was kept alive in the name of continuity. The Athenian decree regulating the Mysteries, IG I 6, was done before 460 BC. The Mysteries were made open to all and the importance Athens in politics was attested, which can also be seen in this inscription. The Homeric Hymn to Demeter had been composed probably between 660–650 BC as an aetiology for the rites performed at Eleusis. It was necessary to establish a professional group of Athenian officials, the priestly genos of the Kerykes on the side of the Eleusinian Eumolpidei so that the cult became bound to Athens. The Kerykes were second in dignity to those of the Eumolpidei. They are not mentioned in the Homeric Hymn, and thus their established role shows the Athenian policy of incorporating the Mysteries into her state-religion. Nevertheless, one of the early Roman inscriptions states that the privilege of performing initiation was the knowledge coming out of the priesthood that had been in the family of Kerykes for so many generations. These two priesthoods in any case held something of a distinguished from the private religious associations of the same name. See Flower 1985, 232–235. Thus I assume that the Eumolpidei of the 6th cent. BC was rather a genealogically-organised familial organisation, not a thiasos.

48 See IG II/IIIP 1231 (end of the 4th cent. BC) expressing the important role of the Eumolpidei in distributing their portion in the organization of the Great and Lesser Mysteries (II. 10–11) and honouring their genos; IG II/IIIP 1235 (274/3 BC) honouring the Eumolpidei and Kerykes together (hierophantes is mentioned in II. 2 and 13) and giving honour to certain hierophantes Chaeretius; IG II/IIIP 1230 (4th cent. BC) is a decree in honour of the Kerykes connected to the Mystery festivals; II/IIIP 204 (352/1 BC), II. 13–17; IG II/IIIP 1236 (middle of the 2nd cent. BC) concern the duties of the two gene. See also Feaver 1957, 127; Mylonas 1961, 229–232; Clinton 1994, 161–163, 168–170.

49 = SEG X 6 = SEG XVII 2 = IG I Suppl., no. 1 = Prott & Ziehen 1906, no. 5 = Sokolowski 1969, no. 6 = Clinton 1974, pp. 10–13. Despite the vagueness of the inscription it clearly states that the festival was open to all people from all the Greek cities. F.R. Walton 1952, 112 dates it to the Cimonean reconstruction and reorganization process. N.J. Richardson 1974, 9–10 states that the Athenian interest in the cult seems to make ca. 550 BC a probable date ante quem; see also IG I 78 (ca. 422 BC). K. Clinton, 1993, 110–112 and 1994, 162 dates the beginning of the Athenian control in Eleusis to a very early date, conceivably to as early as the 7th cent. BC. Clinton holds the view that by the end of Solon’s regime the state was actively interested in the cult and therefore formed the political union. According to him Athens began to promote the Mysteries among other Greek cities at least as early as the first part of the 6th century; this culminated in the 4th century BC and continued throughout the Hellenistic period, pp. 1994, 161–163, 168–170.

50 The aetiological function of the hymn is clear with its local Eleusinian colour. It mentions the Eumolpidei and the main outlines of the festival and some of the rites. See Walton 1952, 109; Jameson 1976, 444–445; Parker 1991, 6–8. K. Clinton 1994, 164 regards the hymn as a kind of hybrid story the ending of which (giving of the gift of the Mysteries by Demeter) serves to recommend the Mysteries to a broader Hellenic audience.

51 The main priests, the hierophantes, were Eumolpidei, while the Kerykes acted as dadouchoi, torch-bearers, and hierokerykes, the heralds of the sacred. Aristotle, Ath.pol. 57.1.

52 Clinton 1974, 50–52. Clinton presents an edition of the inscription and dates it to the year 20/19 BC; see ll.8 ff. It was first published by I. Threpsiades in Eleusiniaka 1 (1932): 223–236. The sacred officials in question are dadouchoi. They seem to have been selected from the members of the Kerykes, but not by lot; see Clinton 1974, 33.
secular administrative position, because their role was so closely related to the political relations between these two states. But the roles of the two gene were maintained throughout the third century BC. The appeal and growing popularity of the Mysteries during the second half of the fourth century evidently encouraged Athens to tighten the association of the polis with the Mysteries. The Eleusinion, the special sanctuary of Demeter in which sacred objects were kept during the first four days of the celebration of the Mysteries, was also built in Athens. The Eleusinion had much more to do with the administrative purposes of Athens than with the rites themselves. It demonstrates the remarkable political acumen with which religion was used as an instrument for expressing Athenian strength. Thus Isocrates in 380 BC stressed Athenian hegemony over 'others', coloured by his dream of Panhellenism, and made a reference to the Eleusinian cult (Paneg. 28–29):

“Our city was not only so beloved of the gods but also so devoted to mankind that, having been endowed with these great blessings, she did not begrudge them to the rest of the world, but shared with all men what she had received. The mystic rite we continue even now, each year.”

53 Feaver 1957, 127.
54 See p. 31, n. 48.
55 Clinton 1994, 169.
56 It was built on the north-west slopes of the Acropolis before the time of Solon. Andocides, Myst. 111 referring to Solon’s law (κατά τὸν Σέλωνος νόμον) states that the Athenian council had to meet in the Eleusinion after the celebration of the Great Mysteries for the sake of a report concerning the festival. See also IG I² 78 (ca. 422 BC). Pausanias mentions the Eleusinion briefly in 1.14.3. See Mylonas 1961, 63; 246–248.
57 The arrival of the goddess Demeter was announced to the priestess of Athena at the beginning of the Mysteries as a kind of symbol of the connections, including ritualistic ones, between Athens and Eleusis. See inscription IG II/III² 1078 (220 BC) which describes among other things how the epheboi must form into a line to escort the hiera from Eleusis to the city Eleusinion on the 14th of Boedromion (ll. 16–17). The continuity of the Eleusinion’s role as an important administrative building is seen from the inscriptions of the Macedonian and Roman eras published by B.D. Meritt & J.S. Traill 1974, e.g. nos. 60; 71 (Macedonian period); 189 (=SEG XIX 93); 194; 216; 226; 227 (Roman period); see also discussion based on a similar sort of administrative inscription published and discussed by D.J. Gaegan 1979, 93–115. It is dated to the second part of the 2nd cent. AD (after 161/2) giving the list of the names of over 700 Athenians grouped by tribes. D. J. Gaegan supposes it to be a catalogue of the members of the genos of the Kerykes, naming the archon of the city (ll. 1–2), officials of the genos (treasurer or the priest, ll. 8,10), and its archon (ll. 2–3).
In Classical and Hellenistic times the cult of the Eleusinian Mysteries grew rapidly in importance under the Athenian state. Athens and Eleusis were bound together and this union was legalised by religion.

In Roman times the festival was still famous; note that even Emperors were interested in the Mysteries and some of them underwent initiation at Eleusis. Pausanias, also, noted (Paus. 5.10.1) that,

"Many are the sights to be seen in Greece, and many are the wonders to be heard, but on nothing do the gods bestow more care than on the Eleusinian rites and the Olympic games."

An interesting note which demonstrates the continuity of the Demetrian Mysteries far from Eleusis itself during the Roman period is the papyrus text POxy XXXVI 2782 from Roman Egypt, dated to AD 161–169. It is a brief, formal letter from a hierophantes of the Demetrian Mysteries to a priestess of the goddess in the small village of Sinkepha telling her to proceed to the temple of Demeter to perform there the usual sacrifices. The letter represents the survival of the cult of Demeter also in a small village in Upper Egypt, in the second century AD, still preserving much of its old Greek character and continuity. This was because of the rather conservative attitude among certain Greek communities,

59 G.E. Mylonas 1961, e.g. pp. 130–132 explains the building activity of the 4th cent. BC in Eleusis from the existing remains and the inscriptions indicating that the south court of the Telesterion was enlarged, a new periablos wall was built, and the so-called Philonian stoa, one of the period's greatest architectural constructions, was placed in front of the Periclean Telesterion slightly after 360 BC, finally finished at the time of Demetrius of Phalerum (317–307 BC). See also Guarducci 1969, 243–244; Clinton 1994, 163–164.

60 The Homeric hymn also includes the openness of the festival to a wider public than to the Eleusinians only: Hymn Hom. Dem. 480. See inscriptions IG I² 6 (before 460 BC), esp. ll. 36–39; IG II/III² 1078 (220 BC), esp. ll. 13–16 which concerns the rites in Boedromion and organizing the epheboi into order for the pompr. In the beginning Athens and all its allies had to offer the first fruits of the harvest, the aparche, to Eleusis. Aparche was administered by the hierophantes and the dadouchoi: IG I Suppl. 225k (422/419 BC). This custom was at first a local one, but at the date of the proclamation of inscription IG I² 6 it was already Panhellenic in character, urging upon all other Greek cities; see also Clinton 1994, 162–163. IG I² 78 (ca. 422 BC) is very important, because it also gives the measures of aparche from outside of Attica. Note as well inscriptions IG II/III² 140 (253/2 BC) in which the connection between Athens and Eleusis and the rules for paying aparche are explained, and SEG XVI 50 (middle of the 4th cent. BC, l. 12).

61 Suetonius mentions that Augustus was initiated in 21 BC (Aug. 93.1). The same author says that when Nero was in Greece in AD 34 he dared not become initiated, because impious and wicked persons were warned by the herald against approaching the rites (idem, Ner. 34.4). Hadrian was initiated twice, Lucius Verus and Marcus Aurelius both once. Commodus is also mentioned as having been initiated; see Willoughby 1929, 40. See inscriptions in Ἑφημέρις Ἀρχαιολογική ΠΙΙ, no. 26 (ll. 13–14), p. 149; and IG II/III² 3658 (AD 192/3) concerning the initiation of M. Aurelius and Commodus. See Beaujeu 1955, 165–168, 306 and 338 f.; Koester 1982, 178.

63 R.K. Raslan 1988, 211 gives also the text and translation; he dates it to the year AD 111, but a more correct date (according to the commentary of the edition) is between the years AD 161–169, because on the verso of the letter there is a document that quotes some official correspondence of the year AD 153/4, though, hardly helping to date the letter very precisely, but the Emperors referred to may be Marcus Aurelius and Lucius Verus (AD 161–169) or possibly Marcus Aurelius and Commodus (AD 176–180).
for whom the original Eleusinian cult of Attica functioned as a respected model of cultic behaviour. 64

We may also question why the Eleusinian Mysteries had such a remarkably wide and long lasting appeal to people, without any break in the tradition. This concerns the individual and emotional importance of the ritual. This aspect should be borne in mind, as well as the political one which brought the Mysteries into the official cults of the city. This festival was important because it touched the individual as a mystery-cult. The significance of the mysteries to the individual is discussed more closely in Chapter IV. It is worth mentioning here only that one of the remarkable aspects of the Mysteries to the individual was obviously its purpose in creating the feeling of something 'other', different from the happenings of every-day life. It was a kind of blessed status for those who had seen the Mysteries and who could share in the secret. 65 All the other great celebrations created an opportunity to escape temporarily from daily life, its duties and troubles, but the Mysteries offered somewhat more. This may be interpreted as purifying, getting temporarily free from anxieties by solving questions concerning life and death and their paradox. It is hard to say whether individual distinction prevailed over group identity, because the central part of the Mysteries, the shared secrecy, was also socially determined. The individualistic appeal, however, was one of the most important factors that made the Mysteries so long-lived in antiquity and guaranteed its continuity.

B. Participants in the Cult

As the proclamation at the opening of the Great Mysteries states, the cult of Demeter was open to all who had "clean hands and intelligible speech". All cities were invited to take part in this festival of Athens. 66 Women were not excluded, 67 nor were slaves who were capable of contributing economically to the cost of the rites. 68 This practice was the

64 Raslan 1988, 211–213.
65 See Hymn Hom. Dem. 480–482, also Euripides, Bacc. 73f. and Sophocles, fig. 719.
66 See e.g. IG I 6 (before the year 460 BC); SEG XVI 50 (end of the 4th cent. BC); IG II/III 1235 (274/3 BC), II. 5–9 from Eleusis; IG II/III 1078 (220 BC), II. 14–16 from Eleusis.
67 See e.g. Koester 1982, 177. There are, even though, only rare literal mentions of the women who took part in the rites; for example, the famous courtesan Phryne is mentioned by Athenaeus, 13.590e–f as having gone to take a bath naked in the river Cephissus, in front of the eyes of all participating in the procession from Athens to Eleusis. K. Clinton 1993, 110–120, especially pp. 119–120 sees the Mysteries as a transformation and enlargement of the much older Thesmophoria and similar cults open only to women. According to him in the Mysteries the cult was no longer limited to women, but became increasingly more accessible to all adult Greeks.
68 The presence of slaves is discussed in connection with inscription IG I 6 (before the year 460 BC); the suggested reading for II. B 10–11 in IG I Suppl. 1 (commentary) is δοῦλοι ὁπλιν πο[ν. Ἄθη][ς] [θα[ν], but it is very hazardous to read mutilated letters like this. The same inscription states on II. B 5–12 and 37–40 that there was a truce (σπονδία) during the Mysteries for mystai, for those who took part in the epopteia and for ἀκολουθοί. Akolouthoi has been interpreted to mean the slaves (Bömer 1990, 112). Even so there is no mention of excluding slaves from the festival. Another two inscriptions are from the year 329/328 BC: IG II/III 1672 (l. 207) and 1673 (l. 24) use the terms ἐφοροῦν referring to the initiation of the slaves working as builders in the sanctuary stating that five slaves who had been working there have been initiated into the Mysteries (1673, l. 24). F. Bömer 1990, 112 states that the presence of the slaves in Eleusis is evident, but on a relatively minor scale.
same during the Hellenistic period. From this we learn that the cult was an expedient for expressing the position of Athens, and during period of political and economical difficulties it might have been one way to symbolically show to the outer world that Athens had not lost its power. Thus the public aspect of this religious celebration was important for the city, because it gave an opportunity for the organization of a spectacle, a procession that made the position and power of Athens visible and concrete. The procession was the most important one given by the city-state, because it bound the relation of Athens and Eleusis together at a practical level and gave an opportunity for Athenian power to make a public appearance before all the Greeks. There is epigraphical evidence concerning the ordering of the procession, forming its participants into a line.\(^6^9\) It is quite evident that the role of the *epheboi* held a remarkable significance; the *epheboi* were those who represented the cities which took part in the festival, and thus their presence had symbolic meaning. Their appearance is most emphasized in the regulations for forming the *pompe*. One inscription from the middle of the fourth century BC (SEG XVII 21)\(^7^0\) relates how a so-called sacred peace was proclaimed for the period of the Great Mysteries in Athens and states that the initiants had to be ready to accept the regulations of the city. It was necessary for one to prove to the magistrate, who acted for the benefit of the Athenian state, that one had brought a contribution to the sacrifices. It was one way for Athens to make them submit to her, and acknowledge her power. The city itself even had the power of proclaiming an internal peace which demonstrates the remarkable political influence of the festival. No doubt Athens was well aware of this.

C. Administration of the Cult

The chief magistrates of Athens held in their hands the management of the order of the celebration in Eleusis: not its religious content, but the administration connected with Athens. Thus the Archon Basileus was a general supervisor of the Mysteries and the Athenian *epimeletai* acting as superintendents, elected by the *boule*, were responsible for seeing that everything in the celebrations went according to the rules.\(^7^1\) It should be remembered that the cult of Demetrian Great Mysteries was at first a cult administrated tribally: priestly offices were in the hands of the tribes.\(^7^2\) It is possible that in the course of time the democratic system of appointing officials had spread to secular Athenian

\(^6^9\) See e.g. SEG XVI 50 (middle of the 4th cent. BC); SEG XVII 21 from the same period; IG II/III\(^2\) 1078 (220 BC); Sokolowski 1962, no. 15 (1st cent. BC); about the duties of the *epheboi* in the rites see also IG II/III\(^2\) 1006; 1008; 1011 and 1028–1030 between the years 123/2 and 94/3 BC.

\(^7^0\) Compare SEG XVI 50; II. 5–7 (middle of the 4th cent. BC) dealing with the same theme as well.

\(^7^1\) There was a bureau which was responsible for the Mysteries: the *basileus* was first in rank with four *epimeletai* (overseers) two of which were elected by the people, one from the *Eumolpidai* and one from the *Kerykes*. See Aristotle, Ath.pol. 57.1–2, and e.g. Sokolowski 1962, no. 15, l. 19 and Mylonas 1961, 229.

\(^7^2\) See Aristotle, Ath.pol. 21.6 referring to the constitutional reforms of Cleisthenes Aristotle states: "He left the clans (γένει) and the phratry (φρατρία) and the priesthoods (ἱερείους) belonging to each δήμος to remain in the ancestral manner".
institutions and had taken a place in the sacred institutions, too. The tribal priesthoods in which the appointment was genealogically determined faded and in the fourth century BC became ‘democratized’: the eligibility of all citizens and appointment by lot were now also the practice in some of the priesthoods.  

The cult of Demeter had tended to become a public cult in this sense also. Be that as it may, the roles of the Eumolpidai and Kerykes had a remarkable significance in the cult of Demeter in Hellenistic times. The appointments to the priestly offices were still controlled by the two tribes.

The sacred officials of the Eleusinian Mysteries differed from other Athenian religious functionaires in that their offices were based on genos and were usually for life. The hierophantes (ἱεροφάντης), the High priest of the cult of Demeter at Eleusis, was appointed from the Eumolpidai. He enjoyed considerable prestige, being the most prestigious of all the Athenian priests, at least in the late Hellenistic and Roman periods. Their duties were mainly financial and administrative, such as receiving income for the sanctuary, but they also had religious functions, such as directing the procession, showing the hiera and revealing spoken secrets (λεγόμενα) to the initiates in the Telesterion, proclaiming the truce and sending messengers (spondophoroi) to invite all the Greeks to participate in the celebration. The hierophantes’ remarkable power in Athens, also, was made concrete by reserving them three places in the middle of the first row at the theatre of Dionysus (proedria), next to the priest of Dionysus Eleuthereus, by giving them regular possibilities to dine at the city-state’s expense at the Prytaneeion (sitesis) among the most important men of Athens. In his corpus concerning the sacred officials of the Eleusinian cult, K. Clinton has listed epigraphical mentions of the hierophantes, the first being from the beginning of the fifth century BC and the last from ca. AD 355–392. Eight of them belong to the era between the beginning of the fifth and the fourth centuries

---

73 Feaver 1957, 136, 139, suggests that these democratic practices developed first of all in the priesthoods. K. Clinton 1974, 53 suggests that by the end of the 3rd cent. BC the lot was no longer the principle applied in the selection of the hierophantes and the dadouchos.

74 To judge from the epigraphical evidence the explicit hieronymy of the offices was quite a late phenomenon. It applied to five priests as strict official observance: hierophantes (from the 3rd or the 4th quarter of the 2nd cent. BC onwards), dadouchos (from the beginning of the 1st cent. AD), hierokeryx (from ca. AD 119/120–166), altar priest ἱερεύς ἱερομύλλος (from the 1st cent. BC) and pyrphoros (from the end of the 1st cent. AD); the priestesses (hierophantides) were sacred offices after the end of the 1st cent. AD. Clinton 1974, 11, 44; see also Foucart 1914, 224–225; Mylonas 1961, 299–233; Clinton 1974, 114.

75 The hierophantes’ high status is indicated e.g. in Plutarch’s description of Alcibiades who was accused of corrupting the Mysteries: among other insults against the Mysteries he was accused of calling himself the High Priest (ἱεροφάντης). Plutarch, Alcib. 22.3.

76 IG II/II² 1078 (220 BC) regulates how the pompe was to be formed by the hierophantes. See Clinton 1974, 42.

77 Plutarch, Alcib. 22.3 relates that the hierophantes reveals the secrets to the initiates. Hesychius, Lex., the word hierophantes (col.757 in Schmidt’s edition 1867) defines him as a priest who shows the hiera at the Mysteries. Hierophantes’ voice was praised in the inscription of the year AD 170: IG II/II² 3811 (II.6–7).

78 Stengel 1913, 1582–1583.
Interpreting Early Hellenistic Religion

BC, six to the third and the second centuries BC and seventeen to the Roman era, between the period from 86/5 BC till the end of the fourth century AD. There were also two sacred officials called hierophantides (ἱεροφάντιδες) who also played an important part in the cult. They were chosen from the Eumolpidai. M.P. Nilsson suggests that this office was a later invention which began in Hellenistic times. The first reference to them is from around the middle of the third century BC and the first epigraphical one belongs to the beginning of the last pre-Christian century. In K. Clinton’s corpus there are eleven hierophantides, all of the period between 86 BC and the beginning of the third century AD.

Then Dadouchos (δαδούχος) was drawn by lot for life from the Kerykes. He was next in importance to the hierophantes and thus in second place in the procession. As can be ascertained from his title he provided light in the mystery rites. Like hierophantes he also had the right of sitesis. Thirty-one dadouchoi are mentioned in the inscriptions from the beginning of the fifth century BC to ca. AD 372 (the last mention in the corpus), eight belonging to the third and the second centuries BC.

The priestess of Demeter and Kore (ἱερεία Δημητρίου καὶ Κόρης) played an important role in the telete; she carried also the hiera at the head of the mystai in the procession. Thus she was mostly a sacred official of the sanctuary and much respected as well. In K. Clinton’s corpus there are 18 references concerning the priestess, three

79 IG Π/ΠΙII² 1235 and 3512 (= Clinton 1974, nos. I 10–15, pp. 23–29); IG Π/ΠΙII² 2944 (= Clinton 1974, no. I 10, p. 23 honours an unnamed hierophantes in ll. 19–24; SEG XIX 124 (= Clinton 1974, no. I 11) (152/1 BC); hierophantai mentioned in the inscription are: Ἀριστοκλῆς Περιθοῦδής, l. 1 (see also IG Π/ΠΙII² 2332, ll. 49–52, year 183/2 BC) who was elected hierophantes in 183/2 BC (see Habicht 1991 (1994), 207–208); his brother Αὐτὸνύσταξος Εὐκλέους Αὐλαεύς (ll. 4–5; see also IG Π/ΠΙII² 2332, l. 52); Εὐκλῆς Αριστοκλέους Περιθοῦδής was the son of Aristokles and hierophantes as well (see also IG Π/ΠΙIII² 1934, ll. 1, 6, end of the 4th cent. BC). IG Π/ΠΙII² 2452 (125/4 BC ff.) lists important persons among whom appear hierophantai Θεόφημος Κυδαθηναῖος (l. 48); Εὐστροφος Πειραιαῖος (l. 53); Μενεκλεῖθος Κυδαθηναῖος (l. 59).

80 Nilsson 1950, 349.

81 Ister, frg. 29 and Jacoby 1954, FGrHist III, Commentary, p. 664, frg. 29 (fragments of the Athidographer Ister Callimachus) explaining that the hierophantes, the hierophantike, the dadouchoi and the other priests (hieroi) of Demeter and Kore of Eleusis received honorary crowns in 250 BC; Clinton 1974, 86.

82 IG Π/ΠΙIII² 3514 (= Clinton 1974, no. VI 6), 86 BC. This is a dedication made by Ἀὑρίφικα Φιλάδου who acted as a hierophantikes.

83 The last known hierophantike, IG Π/ΠΙIII² 3764 (= Clinton 1974, no. VI 11), ca. AD 217/18, ll. 1–4 is mentioned as having been one who revealed the teletai of the goddesses. IG Π/ΠΙIII² 3632 (= Clinton 1974, no. VI 10) of ca. AD 176, ll. 17–20 explains how a hierophantikes Εὐοιδῆτης Εὐοιδῆ τοι Καρδαφ λαοῦ crowned the emperor M. Aurelius and his successor Commodus.

84 Clinton 1974, 68.

85 In the inscription IG Π/ΠΙIII² 2332 edited and explained by Clinton 1974, 50–52 and 53–58 there are eight dadouchoi of the 3rd and 2nd centuries (ll. 40–53). Their life spans can be ascertained by the genealogy explained in the stemma of daduzick families by Clinton 1974, 58.

86 This is to be read in IG Ι 953, ll. 1–2 (= Clinton 1974, no. ΙΙΙ 1) (ca. 455 BC): Ἀρρήτο τελετῆς προτολοχὸς σής τότεν Αἴτητο καὶ, θνεορος προθύρον κόμων ἄγαλμα. IG Ι 79, ll. 9–11 (422/421 BC) mentions the priestess carrying the hiera at the head of the mystai in the procession of the Mysteries.

87 Clinton 1974, 76.
belonging to the fifth century BC, one to the fourth, three to the second, and eleven to the period between the first century BC and the end of the second century AD.

Hierokeryx (ἱεροκήρυξ) was included in the list of the sacred officials of the genos of the Kerykes, thus, appearing as a priest selected for life. His function in the cult was that of the herald accompanying the hierophantes and the dadouchos. K. Clinton suggests that his duty was to call for silence during the rites. All but one of the accounts which mention him belong to the Roman period.

Hieropoioi (ἱεροποιοί) were important Athenian sacred officials who oversaw, at Eleusis also, that everything in the rites was organized according to the regulations; in Athens herself among other things they organized the pompe of the Panathenaia. In Athens there were ten hieropoioi, one from each tribe, appointed for a one-year term. But at Eleusis they also dealt with many different administrative tasks connected to the cult. Thus their presence at Eleusis kept up the Athenian control as well. The Eleusinian hieropoioi formed a collegium called ἐπιστάται (overseers). They took care of the offerings, were responsible for receiving money given to the sanctuary (ταμιάς τῶν ἱερῶν χρημάτων), and they were also guardians of the temenos (ναοφόδακες).

The two tamiai of the two goddesses (ταμιάς τῶν θεῶν) and the grammateus (γραμματεὺς) were also, besides the hierophantes and hieropoioi, responsible for handling the income and expenditure of the Eleusinian sanctuary.

In the Eleusinian cult a child called παῖς ἑφ ἐστιάς (hearth-initiand) was usually the offspring of an Athenian noble genos and probably his/her role was to symbolize Athens

98 See a long inscription IG II/III 2 1672 concerning the income and expenditure of the Eleusinian sanctuary in the year 329/8 BC; in this inscription the tamiai functioning as responsible officials; see also p. 40, n. 107; also Guarducci 1969, 240–241.
and her connections to the cult, as the personification and representative of the hope and fortune of the city for the following year.99

In the Eleusinian Mysteries minor sacred officials called exegetes (ἐξηγητής, advisor), phaidynes (φαίδυντης, cleaner), panages (παναγής, healer), iacchagogos (ιακχαγωγός, one who holds the statue of Iacchus in the procession), hieres Triptolemou (ἱερεύς Τριπτολέμου), hieres Plutonos (ἱερεύς Πλοῦτωνος), pyrphoros (πυρφόρος, carrier of fire), hymnagogoi (ὕμναγωγός, hymnleader) and bousyges (βουσύγης, one who offers oxen) are known.100

D. Financing the cult

Regulations concerning the economy of the Eleusinian Great Mysteries are few during the period under study. We know, however, that there were different ways of financing the cult apart from offerings, votives, fines and individual economic contributions which all supported the economy of the sanctuary.101 The priesthoods, alongside other officials, had an important role in handling the finances of the cult. The hierophantes and the dadouchos were usually responsible for collecting the money which supported the

---

99 Foucart 1914, 277–281; Deubner 1932, 74. This view is supported by K. Clinton 1974, 99–100. He thinks that the word ‘hearth’ could well have been the main ‘hearth’ of the city, the one located in the Prytanion from were the pompe started. See inscriptions about them from the 1st cent. BC in ‘ΕΦΗΜΕΡΙΣ ΑΡΧΑΙΟΛΟΓΙΚΗ 1885, nos. 24 and 25, p. 145–6. There are a great number of dedications of the Hellenistic and Roman periods erected in honour of these children, including many by the areiopagos, boule and demos: see IG II/III 3475–3478; 3480 (middle of the 2nd cent. BC); 3491; 3492; 3499 (middle of the 1st cent. BC); 3517–3519 /end of the 1st cent. BC; see also K. Clinton 1974, 100–113 (nos. X 1–56) listing 56 epigraphical mentions of hearth-initiands: 30 girls, 22 boys and 4 of unknown gender. Ten of them belong to the 2nd and the 1st centuries BC and the rest to the 1st and the 2nd centuries AD. Their parents, when known, are always of distinguished noble or priestly families.

100 See Clinton 1974, 95–99. Most of these officials appear in the inscriptions belonging to the Roman period, but phaidynes is mentioned already around 470–460 BC in IG I 6, col. C, l. 49 as the official among those who organised the order of the pompe in front of the Eleusinion of Athens, and he is mentioned also in SEG XXI 3, l. 3 (ca. 510/480 BC). In IG II/III 1078, ll. 16–22 (220 BC) he appears as the one who orders the epheboi for the procession to Eleusis and back on the fourteenth of the Boedromion and proclaims the sacrifices of Athena kata τὰ πάθη. Exegetes appears in IG II/III 1672 (329/8 BC). In this inscription from Eleusis, the most important officials seem to be ταυτεία τοῖς θεοῖς. Concerning the Eleusinian officials see e.g. IG II/III 1092 = SEG XII 95 which IG dates to post AD 131 and SEG to around AD 165; in ll. 45–55 it list the Eleusinian officials mentioning ιεροφαντης (ll. 27,38), των ιεροφαντιδις (l. 54), δαδούχος (ll. 27,46), ἀρχιερεύς (l. 47), three ἔξηγηται (ll. 48,49), ἱεροκριτης (l. 50), ἵππης ἔπι βουρφύ (l. 51) παθεῖς ἄφ’ ἑστίας (l. 47), φαιδυντης (l. 48), ἵερεια Διήμητρος καὶ Κόρης (l. 53), ιακχαγωγός (l. 50), βουσύγης (l. 51), πυρφόρος (l. 52), παναγής (l. 53), ἱερεύς θεοῦ καὶ θεᾶς (l. 54) and ἱερεύς Ἰτριπτόλεμου (l. 55); ἱερεία of Athena (l. 52), ἱερείας of Zeus (l. 49) and ἱερεία of the Moirai (l. 46) are listed among the Eleusinian priestly officials as well.

101 Compare Debord 1982, 192, 198. His study deals with the social and economic aspects of religious life in Graeco-Roman Anatolia, and his results are not directly applicable to the Athenian material; he writes: "Pour l’Asie Mineure, à quelque très rares expressions près, nous ne possédons pas l’équivalent de la comptabilité des sanctuaires égyptiens, d’Athènes et d’Attique, de Dèos ou de Delphes, cependant les documents sont relativement abondants et précis et la difficulté provient plutôt de leur extrême dispersion et de leur appartenance à des sanctuaires de nature fort différente" (p. 183).
Eleusinian cult. The Athenian inscription IG I 3 6, face C from the Classical period (ca. 460 BC) records the sums required by the Eleusinian officials from each initiate as payment for performing the initiation and the rites, and for supporting the Eleusinian cult. These officials were representatives of the Eumolpidai and the Kerykes, hieropoioi, the priestess of Demeter and Kore, altar priest, phaidynes and panages. In Eleusis, at the end of the second century AD, the hierophantes and the dadouchos were still the officials who took forward the money dedicated to the goddesses. In the Eleusinian Great Mysteries, the hierophantes' and dadouchos' tasks were quite similar to those of the hieropoioi of the other Athenian cults. Concerning financial matters, we meet also an official tamias in Eleusis; tamias of the gods (-ταμίας - ταμιάς) appears in IG II/III 1672, an inscription from Eleusis of the year 329/8 BC which is a long list of the wages (misthoi) paid to the functionaries and workers of the sanctuary and lists the sanctuary's material costs. Tamiai were the ones responsible for receiving and distributing money. The inscription mentions also a thesauros in which oxen for the sacrifices are to be left and in which any extra pieces of tiles and wooden materials for constructing

---

102 See e.g. SEG XVII, 21 (middle of the 4th cent. BC) in which the hierophantes is said to be responsible for collecting the money dedicated to the goddesses (ll. 7, 14–15) and IG II/III 1092 (ca. AD 165) which still states that all the money (denaria, l. 40) dedicated to the gods (the Eleusinian ones, l. 30) is to be given to the guardianship of the hierophantes and the dadouchos in charge (ll. 27–30; 38–42).

103 The inscription states that a fee of one half-obol was paid each day (καθ’ ἡμέραν, Prött & Ziehen’s and Clinton’s reconstruction of the word) (ll. 3–4) to all of the major officials who were listed in the text (hierophantes and the dadouchos are missing because the section most probably dealing with them is badly damaged).

104 One obol to the hieropoios (l. 37), one to the priestess of Demeter (l. 45), a half-obol to the altar priestess (τῆρεια ἔρημός ὑμῶν) (l. 47), phaidynes (l. 47), panages (l. 48) and a half-obol to an official whose title is missing (l. 48). This charge was to be imposed on the gene of the Kerykes and of the Eumolpidai.

105 IG II/III 1092, ll. 24–30.

106 About the Eleusinian hieropoioi, see p. 38.

107 These costs are manifold concerning mainly the building activities in the sanctuary: IG II/III 1092 (329/8 BC) lists wages paid, for example, to the architect (l. 11), stonemasons (l. 17–18), workmen carrying out wood-working for the gates, doors, roofs and other buildings at the temenos (ll. 24–25, 27, 42, 66, 165–166, 179), brick-makers (l. 22, 59), workmen who take their meals at home (l. 46), workmen doing stone-works (ll. 97–98), ferrymen (ll. 126, 158–159), cleaners (ll. 128, 232); costs of the materials and goods needed in the sacrifices are listed as well, for example, chalk (ll. 12–13), wood (ll. 128–129, 147), stucco (l. 108), ceramics (l. 13).

108 The inscription begins with the words λόγος ἐπιστατῶν Ἐλευσινόθεν καὶ ταυτοῦ τοῦ Θεοῦ. Tamiai are mentioned throughout the long inscription.

109 IG II/III 1672, ll. 160–161. IG II/III 1356 (beginning of the 4th cent. BC) lists measures of meat (ll. 17, 21), wheat (ll. 17, 21), firewood (l. 18), parts of the bodies of sacrificial animals (l. 19) which have to be left to the trapeza (ἐν δὲ τῆν τράπεζαν, l. 18), to the priests of Demeter and Kore for performing sacrifices (l. 16).
The thesauros functioned as a kind of store for incomes — materials and money — that were disposed in the sanctuary.

Direct evidence of the initiation fee, a sum paid for performing the initiation and the rites is scarce in Eleusis, but from the epigraphical sources we know that it was demanded from initiates, at least in the Mysteries of Dionysus in Miletos, and in Erythrae for the Mysteries of the Corybantes. A contribution was similarly expected when consulting the healer gods or for the advice given by the oracles. Thus it could be suggested that at Eleusis, also, the initiates and those who took part in the festival were expected to contribute to the costs which the rites demanded, at least in the form of personal offerings. Offerings were, nevertheless, one of the most important ways in which the sanctuary collected income.

The most ancient form of offerings to the gods, in addition to the sacrifices, were the so-called aparchai, the offerings of the first fruits of the harvest at Eleusis.

"... Most of the Hellenic cities, in memory of our ancient services, send us each year the first-fruits of the harvest (aparchai) ... and the words spoken long ago confirm the practice of to-day, while present events are in accordance with the statements which have come down from the men of old." (Isocrates, Paneg. 31–32, in 380 BC)

Aparche was demanded from the cities and administrative units, such as important phylai, to pay the costs of the cult. It was proclaimed by the hierophantes and the dadouchos as a formal invitation, "to all the Hellenes to offer aparchai for the Mysteries according to custom and the oracle at Delphi". Aparchai were parts set aside for the

---

10 IG II/III² 1672, II. 202, 209. On Delos there was found a decorated thesauros of the same type, a collecting box for the offerings in Sarapiion A from the end of the 3rd or the beginning of the 2nd cent. BC, dedicated by Ctesias Apollodoros from Tenos to Sarapis, Isis and Anubis (I. 1–2), see IG XI 4 1247 (inscription) and the photo and inscription in Roussel 1916a, no. 6 (photo p. 89).

11 See the inscription IG I² 6 (ca. 460 BC): according to it initiants had to pay money to the Eleusinian officials (see p. 40, n. 104) at the Lesser Mysteries and at the Great Mysteries, but this practice of paying initiation fees were, of course, not necessarily the same during Hellenistic times. H.W. Parke 1977, 61 regards the initiation fee as a self-evident fact and states that "the cost of initiation was quite high". He reasons his argument by referring to the inscription mentioned in this note and to the IG II/III² 1672 (329/8 BC) about which see p. 44.

12 Sokolowski 1955, no. 23 (Erythrae, end of the 4th cent. BC), II. 12–16 gives the sum which have to be brought for the sacred teleumenoi of the Corybantes (see also Nilsson 1950, 95); Sokolowski 1955, no. 48 (also Wilamowitz-Moellendorf 1932, p. 372, no. 2), II. 12–15 (Miletos, 276/275 BC) in which it is stated that women give to the priest of Dionysus money ἐν τοῖς ὀργαστοῖς πάσιν (I. 15) and which continues by specifying that to the priestess are given the goods for the sacrificial feast (πρὸς τὰς γυναῖκας), like kidneys, a leg, tongue and leg-bones of a sacrificial animals (II. 16–17); see Debord 1982, 195.

15 Translation by G. Norlin, The Loeb Classical Library 1928 (1966). Notice here that the cult is used as a means of stressing the glory of Athens by referring to old traditions and using the code of rhetorics.

16 Isocrates, Paneg. 157; Suetonius, Nero 34; IG I² 6 (ca. 460 BC); IG I² 78, II. 24–26; 34–35 (ca. 422 BC); IG II/III² 140 (353/2 BC) deals with the aparche in connection with the Eleusinia of the goddess Demeter. It states the amount of 8 000 drachmas to be paid to the tamias of the demos. See Nilsson 1950, 471–474; Clinton 1974, 15.
goddesses and as such they are known also by the name *apometra*. Inscriptions from around the year 422 BC\(^{117}\) and 422–419 BC\(^{118}\) deal with this matter and reveal that the quantity of *aparchai* were quite remarkable, for instance, in Hellenistic times it was even necessary to build new store-houses for the grain.\(^{119}\) As an example, in 422 BC the καρποῦς given by the cities and delivered to the *hieropoioi* was to be called to account as thousand drachmas.\(^{120}\) This practice of paying *aparchai*, or more generally *apometra* is found in Classical,\(^{121}\) Hellenistic\(^{122}\) and Roman\(^{123}\) inscriptions. These sums were to go “to the gods” and towards the expenses that the rites demanded.

In addition to the above-described official practices to finance the Mysteries private financing was an important way for the Eleusinian sanctuary to obtain income. An inscription set up on the Acropolis of Athens, and in the court of the sanctuary at Eleusis between 216–201 BC\(^{124}\) clarifies how individual supporters of the Mysteries of Eleusis were honoured by the Council of the city, because they

"had offered all the offerings which are appropriately to be made during the year ... and had further provided at their own cost (παρεσκεύασον ἐκ τῶν ἰδίων) the conveyance for the use

---

117 IG I 78.
118 IG I Suppl. 225k.
119 The construction of the Philonian stoa created a pressing need for storage space, and it is assumed that the long building along the peribolos wall in the south court of the sanctuary was built during the end of the 4th cent. and in the beginning of the 3rd BC to provide for that need. Mylonas 1961, 150.
120 IG I 78, ll. 19–20: according to this regulation from Eleusis, 100 medimnoi were required as the *aparche* (l. 3). Medimnos was an Attic measure especially of dry food stuffs, like corn; e.g. in IG II/III 1672 (329/8 BC) the price of one medimnos is determined separately in ll. 14.
121 Concerning the Eleusinian cult see IG I 62, l. 16 (428/7 BC); IG I 259 is a list of the measures of the *aparche* from the Greek cities from the year 454/3 BC, see col. A (l. 1) and col. B (l. 5); IG II/III 140 (353/2 BC) is a regulation concerning the *aparchai* for the Eleusinian gods (aparche of the fruits of the gods for Zeus, Demeter, Kore and Triptolemos, ll. 12–13, 20–22) given by the *demos* of the Athenians and the *Eumolpidai* (ll. 17–19).
122 Early Hellenistic inscriptions IG II/III 140 (353/2 BC) from Eleusis is a regulation giving the rules for Athens to pay *aparche* for the Eleusinian festivals; 1672 (329/8 BC) from Eleusis mentions *aparche* (in the inscription as *εἰκάρχη*) for Demeter, Kore and Pluton (l. 182) and states in ll. 262–264 that the *aparche* is asked from each *phyle* for the celebration of the *Eleusinia* in Eleusis; IG II/III 1363 (ca. 330/270 BC) concerns the Eleusinian festivals *Eleusinia, Proerosia* and *Thesmophoria*, and states that the *apometra* for the *Thesmophoria* of Demeter and Kore are to be given to the priestesses (col. B II. 20–22) and explains that the *apometra* had to be paid as well in connection with the Eleusinian celebration of Demeter called *Proerosia* in the month of *Pyanepsion* (l. 6). In the inscriptions of the Hellenistic period the *aparchai* were dedicated by the religious associations as well, like IG II/III 2939 and 4339 (4th cent. BC) which state that the Athenian *Dionysistae* dedicate *aparchai* to Athena. *Apometra* in the Mysteries went often to the priestess of Demeter (and Kore) and was a remarkable sum; see Clinton 1974, 70.
123 IG II/III 1035 (10/9–3/2 BC) is a decree on the restoration of Attic sanctuaries (e.g. of Athena Polias at Acropolis, ll. 15–17, 46, Zeus Soter and Athena Soteira in Piraeus, ll. 17–18, the old *Bouleuterion* and the temple of Tyche in Athens, ll. 42–43, the Panatheniac stadium, ll. 50–51); in ll. 21–22 the inscription mentions the temple of Demeter and Kore at Eleusis and specifies the goddesses as the ones to whom the *aparche* is levied (ἀναρχή ἀτριφολογούσα ἀπαρχήν); in IG II/III 2957 (time of Hadrian) the *aparchai* are stated to have been dedicated to Demeter.
124 Edited and translated also by Grant 1953, 15–16 (Grant’s translation cited). The location of the inscription both in Athens and in Eleusis is stated in ll. 54–55.
of the sanctuaries, and had voluntarily turned over to the Council the amount set aside for their use as the expense of the conveyances ... and beyond all this had delivered the accounts to the office of the treasury and the Metroion, and had rendered their account before the court, in accordance with the laws, and out of their own funds had provided for everything else connected with the sacrifice in order to show themselves agreeably disposed toward the Council and the People, thus setting an example for those who are ready to sacrifice themselves for the public welfare and showing that they can count upon the proper measure of gratitude ...” (IG II/II2 847, lines 16–33).

These supporters of the Mysteries are praised as philotimoi in the inscription (lines 32, 34). This shows that private financing was a practice which in part covered the cost of this kind of public cult in early Hellenistic Athens. In lines 46–49 the same inscription cited states: εὑσεβεῖας ἐνεκέν τῆς πρὸς τοὺς θεούς καὶ φιλοτιμίας τῆς εἰς τὴν βουλὴν καὶ τὸν δήμον. The decrees in IG II/II2 1299 from the year 236/235 BC honour a certain Aristophanes for philotimia and euergetia (lines 18–19, 27, 56), for numerous and great services (line 52) that he made to Demeter and Kore and to the other gods of the polis (lines 9–11, 23) by crowning him with a golden crown (στεφανώσας αὐτὸν χρυσὰς στεφάναν) and placing a copper picture of him in the court-yard of the Eleusinian sanctuary (lines 27–28, 75–76). The decree is given in the name of the law (κατὰ τὸν νόμον) by the demos of the Athenians together with the demos of the Eleusinians (lines 9–11, 76). Honouring the supporters of the religious festivals for eusebeia, giving them honorary crowns (στεφανόω) in the name of the city-boule and inscribing their names on stelai was a common practice in the cult of Demeter; it continued similarly in Hellenistic times. 125 Thus this kind of private sacrifice became a part of the broader philotimia, i.e., ostentatious expenditure for the public good provided by the wealthy in anticipation of public recognition and gratitude which was typical of the socio-political behaviour of much of the Athenian upper class in the fourth and third centuries BC. 126

Regarding the payments made by those initiated, Athenaeus sarcastically explains that the term τελέσει derives from the verb τελέω which signifies ‘pay’. 127 An inscription

125 See IG II/II2 1231 (end of the 4th cent. BC) which honour a certain Tlepolemos for eusebeia and philotimia (II. 8–11 and 16–18); IG II/II2 1235 (275/4 BC) similarly honour the hierophantes of the Mysteries because of eunola by crowning him and repeating the above described honorary formulas; see especially II. 15–16 and 21–24; IG II/II2 674 (according to IG 277/6 BC and according to Meritt & Trail 1974 (no. 78) 273/2 BC) honour philotimoi of the cult of Chalkea, of the “other national gods” (Θεόν πάροικοι), of Stenia of Demeter and Kore; SEG XI 464 (140/139 BC) use the same formulas concerning philotimia, stephanēν-practice and other (financial) matters (II. 19–23) in connection with the official cults of Artemis Boulaia, “and the other national gods”, Stenia of Demeter and Kore and Apollo Patroos; IG II/II2 1338 (86 BC) honour epimeletes Philomonis for eusebeia in supporting the sacrifices of the Mysteries of Demeter and Kore in Eleusis (II. 4, 14–16) alongside with other festivals, like the dramatic, musical and athletic contests of Dionysus (II. 4–5). Inscriptions of this sort, excavated from the Athenian Agora and its administrative buildings, are frequent: in Meritt & Traill’s collection (1974) from the Macedonian period (the inscriptions are from the 3rd cent. BC) 27 of 95 inscriptions use the same formulas in honouring the philotimoi, usually (in 14 cases) clearly in connection with the official religion.

126 Rosivach 1994, 10.

127 Athenaeus, 2.40d–e. The author adds: “... and those who spend much are called ‘polyteleis’, those who spend little ‘euteleis’”, but it is noteworthy that the text which follows has nothing to do with religious practices. Athenaeus’ etymologies are often sarcastic which may well be the case here. The sense of
from the beginning of the first century BC\textsuperscript{128} says that it was legal to make an initiatic pay an amount of a hundred drachmas if he committed any offence in the course of the procession (lines 27–34).\textsuperscript{129} The sum may still have been considerable if we recall that in the Classical times the salary of a workman for one day’s labour on the Parthenon had been approximately one drachma,\textsuperscript{130} and that in the end of the fourth century the Council oversaw a pension of two obols per day for those who owned less than 300 drachmas (=three minas) or were so maimed in their bodies that they could not work.\textsuperscript{131} Furthermore, the account from Eleusis for the year 329/8 BC tells that the day-wage for young workmen who dined at home was one drachma three obols and for workmen who worked with tiles two drachmas three obols.\textsuperscript{132} Fines also belonged to the finances of the cult, and as such their existence reveals that there were financial regulations for the initiants, even if the direct evidence for an initiation fee is not extant from Eleusis of Hellenistic period.\textsuperscript{133}

Thus the Eleusinian Great Mysteries were financed in the first place publicly (the aparchai), and in the second place privately by individual contributions for the support of the rites, and by offerings made in the sanctuary during the rites. The first-mentioned was made legitimate for other Greek cities “in memory of our ancient services”\textsuperscript{134}, and the second practice probably developed due to pragmatic reasons; the number of the initiates was remarkable.

E. Official Expression in the Cult

The Mysteries of Demeter offered an arena for the rulers and civil servants to make a public appearance, because it was an official cult of the city-state, and, at the same time,
widely known everywhere in Greece. In the *pompe*, which was the most spectacular part of the Mysteries, the participants were lined up in due order: *iacchagogos*, the priest of Iacchus\textsuperscript{135} with the statue of Iacchus, was at the head of the procession; the priests and the priestesses of Demeter followed next bearing the *hiera* in the *kistai*.\textsuperscript{136} Then came the officials of the State of whom the archonts of Athens and those of other cities and foreign official representatives (*theoroi*) occupied the most important positions. After these followed all the others: initiants with their *mystagogoi*, men, women, children and possibly pack animals.\textsuperscript{137}

In Hellenistic times the cult of Demeter was an important forum in which the Macedonian rulers could show themselves. Thus they also accepted the official cult of the city without any wish to disturb its ritualistic habit. Athens maintained her independence and importance in the eyes of these rulers at least as far as its traditional religion was concerned. A good example of this is an event which took place during the Great Mysteries of the year 290 BC\textsuperscript{138} mentioned by Athenaeus quoting Duris of Samos (ca. 340–260 BC) around the year 200 AD. Athenaeus' intention evidently was to underline the blasphemy and the flattery of the Athenians involved in this event: he calls the Athenians “flatterers of flatterers” (6.253b); in any case, it was his custom to relate curious and ignoble happenings. Demetrius Poliorcetes had been initiated into the Eleusinian Mysteries in 302 BC.\textsuperscript{139} This might have been a mark of honour by the Athenians to Demetrius. In 290 BC Demetrius came to Athens during the celebration in *Boedromion*. The Athenians are reported to have sung the following hymn to him:

\begin{footnotesize}
\begin{enumerate}
\item The role of Iacchus is widely discussed, see e.g. Mylonas 1961, 238; 308–309. In the beginning he might have been a personification of the *iache* cry which was repeated in the procession. Later he became more and more a parallel to Dionysus, probably even equated with him, because the role of Dionysus in the Eleusinian Mysteries became more important in Hellenistic times. Iacchus being at the head of the procession might have been a symbol of the important connections between Athens and Eleusis. Pausanias, 1.2.4 describes the statue of Iacchus holding a torch as having been made by Praxiteles. According to Pausanias it was placed at the temple of Demeter near the building for the preparations of the processions.

\item Κίστη is mentioned e.g. in the Messenian inscription IG V 1 1390, l. 30 (1st cent. AD): κίστης έχοντας λεπτά μυστικά. On Delos appears a cultic functionaire called κιστηφόρος in connection with the cults of Apollo, Aphrodite, Hermes: one tetradrachma was paid to *kistephoroi* according to the inscriptions ID 1430, l. A II 13; 1439, l. A 14; 1441, l. A 45; 1443, l. B 148; 1450, l. A 37 (all inscriptions from the latter part of the 2nd cent. BC). In the Oxyrhynchus papyri *kiste* clearly has its proper meaning as a ‘box’ or ‘basket’ for everyday use, see e.g. PÔxy I 116, l. 18; VIII 1153, l. 3; X 1269, l. 36; XII 1584, l. 13.

\item Plutarch, Them. 15.1 refers to a great multitude of people taking part in the procession. For the general appearance of the *pompe* see iconographical expressions, such as the so-called votive statue of Nunnius Nigrinus, a relief in which men, women and children are shown with the *bacchoi* in their hands marching in parallel rows. See photo in Deubner 1932, pl. 6., no. 1. See inscription in Sokolowski 1962, no. 15. In general see Deubner *ibid.*, 7377; Mylonas 1961, 253–255; Parke 1977, 65–67.

\item See dating: Ferguson 1911, 143–144; Nilsson 1950, 142–143; Corfou & Tondrau 1937, 182.

\item Plutarch, Demetr. 26.1–2; Diodorus Siculus, 20.110.1. The latter records that the dates of the celebration were changed in that particular year because of the demands by Demetrius himself. See also Ferguson 1911, 122.
\end{enumerate}
\end{footnotesize}
Now the greatest and dearest of the gods have come to the city
For hither the propitious hour (kairos) has brought both Demeter and Demetrius.

She (Demeter) will be celebrating the Mysteries of the Daughter, but, he (Demetrius) as it is worthy of the god, has come gladly, fair and smiling.
How reverend he seems! All his friends are gathered around him.

He himself in the very midst.
His friends are like stars,
and he is like the sun,
O, offspring of the mightiest of gods, Poseidon,
and of Aphrodite, hail!

There are no other gods, or they are far away,
or have no ears,
or they pay not the slightest heed to us.
But you are here and thee we see face to face;
not carved in wood or stone, but verily and in truth!

And so we pray to thee.
First bring us peace, thou dearest (of the gods)
because thou art Lord (kyrios, i.e. it is within thy power),
that dread the Sphinx which crunches down not only Thebes but all of Hellas!

The Aetolian who sits upon his cliff,
in the manner that sat even the Sphinx of old
snatching us up, carrying all our men as a prey;
and against it I have no force to fight,
for it is the Aetolian way to rape their neighbours' things,

and now more distant things.
Thus, best for youself were if you punished him on your own!
but if not, then find some Oedipus,
who would dash this monster down the cliff
or turn him into stone. (Ath., 6.253.c–f) \(^{140} \)

---

This hymn speaks of the relationship between the old traditional cults of the *polis* and the Hellenistic ruler-cult, which were quite easily combined. This reveals the pragmatic attitude of the Athenians as well as that of the Macedonian rulers towards religion. Athenians were capable of accepting a ruler’s godship as symbolic recognition. For the ruler it functioned as a means of obtaining constitutional affirmation of his authority. It was difficult to justify it by any legal agreement or treaty. The Mysteries of Demeter presented a perfect context for this; a formal cult which was flexible in amalgamating new ideas into its framework, because it had earlier reflected political ideas and now gave them renewed significance.

3. Cult of Isis

The cult of Isis was different from that of Demeter in Athens in Hellenistic times, because the goddess was a newcomer and she was worshipped in religious associations. This was a new phenomenon present in religious life from the third century onwards. Athenaeus combined *thiasoi* and *eranoi* indicating that *thiasos* and *eranos* are meals provided together and *thiasotai* and *eranistai* are those who gather together for a meal at a banquet. It should be noted that *thiasoi* were religious brotherhoods dedicated to certain gods and that religious activities, like sacrifices, were central to them, at least nominally; *thiasos* bore in its name the role of the gods, thus being a religious *koinon*. *Eranos* was merely an association with many economic and more ‘profane’ functions, although they had at least a nominal religious character. During the Macedonian period the number of cult associations increased considerably. For example, there are more than seventy inscriptions concerning *thiasoi* and *eranoi* in IG II/III² from the second half of the

---

141 There was a special way of thinking about the relationship between powerful men and gods in Greek religion, which was the basis for the heroisation of old times and the ruler cult in Hellenistic times. See Chap. V.2.A, pp. 102–104.

142 See Ferguson 1928, 15–16 and 21.

143 Athenaeus, 8.362e. Chantraine, Dict. ét. and Frisk, GeW., s.v. θιασος explains that a *thiasos* is a religious brotherhood, first especially of Dionysus; its derivative is the verb *thiasewein*, to become a member of a *thiasos* and to celebrate rites. *Eranos* signifies a meal to which each participant brings his share and a religious association; its derivative is the verb *eranizo*, to bring contribution and to be without debts; Chantraine, Dict. ét. and Frisk, GeW, s.v. ἔρανος. About the term ὑπερείδιες see p. 52, n. 169.

144 *Eranos* was also a loan raised by contributions for the benefit of an individual, or for a meal to which each contributed his share. Poland 1909, 31 states that an *eranos* was undoubtedly the most recent type of the religious associations. There is no progression from ‘religious’ *eranoi* to more secular ones, because they could be both religious and secular in character from the beginning of their history (from the latter half of the 4th cent. BC onwards). The *eranos*-inscription IG II/III² 1265 (300 BC) tells that the association was religious in character since its sacred official *hieropoios* Agathon was crowned for *eusebeia* and *eunoia* and the association honoured its *tamias* Nicon. On the other hand, the *technitai* of Dionysus, for example, were closer to the trade guild already at the beginning of their history; see IG II/III² 1325 and 1326 (78/7 and 176/5 BC) even though they used the conventional formulas in honouring their benefactors. There were still ‘religious’ *eranoi* in Athens at the end of the 2nd cent. AD which can be seen in IG II/III² 1369 (date not very certain), a law of a certain *eranos* (νόμου ἔρανος *ευνικότατον*). It had *archieranistes* as a leading priestly official, *grammateus*, *tamiai* (more than one) and *syndikoi* (ll. 35–36) and the practice of crowning its economic supporters (ll. 39–40).
fourth century to the end of the second century BC. In the first century BC, the number of the inscriptions concerning synodoi, koinoi and ‘profane’ trade guilds increase and those of religious associations (thiasoi) falls. The end of the third century BC and the beginning of the second was an economically and culturally active period in Athens, thus, cultural interest combined with this period of wealth probably promoted the appearance of the associations in greater number.\textsuperscript{145} The grouping of religious associations into orgeones, thiasoi and eranoi is due in the most part to P. Foucart’s study Des associations religieuses chez les grecs. Thiases, éranes, orgènes from the year 1873 and since then it has been a mechanical division. But this is a one-sided practice because these groups and more profane associations are not clearly separable but, in fact, overlap each other.\textsuperscript{146} We find associations described as κοινὸν τῶν θιασωτῶν\textsuperscript{147} and κοινὸν τῶν ἐρανιστῶν.\textsuperscript{148} While an association of orgeones was more bound to local and genealogical factors, a thiasos was more open and functioned on a larger scale.\textsuperscript{149} F. Poland suggests that many thiasoi of the older type (i.e. from the end of the fourth to the end of the third century BC) originated inside a phratria, being merely local cult associations which kept up the rituals of a phratria.\textsuperscript{150} Later thiasoi were clearly religious but no longer bound to a phratria.\textsuperscript{151}

Associations, guilds, ‘clubs’, brotherly societies, were an important social phenomenon of the time: people found new contexts for themselves and ways to construct their individual group-identity free from existing supra-individual social distinctions which had earlier been given to everyone along with a name and the social status of one’s oikos, phratria or gender. If we used M. Douglas’ terminology, there was an opportunity to free oneself from one’s grid identity, because people could now integrate themselves into a social group which defined them in a new way and according to their own choices. It elevated a man out of a given social framework to a new sphere where he could have social relations with his fellow citizens.\textsuperscript{152} In religious associations the commonly-shared cult formed a basis which bound these individuals together grouping them outside the family, tribal, and civic organisations. On associations, Aristotle states:

\textsuperscript{145} Rostovtseff 1941 (1972), 627. He states that many of the associations may have been fairly prosperous.
\textsuperscript{146} Poland 1909, 5, 12, 28–29.
\textsuperscript{147} Π/ΠΙ 1261 (II. 8,14,17,20 and 38) two inscriptions from the years 302/1 and 301/0 BC; IG II/ΠΙ 1263 (I. 23–24); and IG II/ΠΙ 1273 (II. 20–21) from Piraeus between the years 302/1–296/5 BC; IG II/ΠΙ 1298 (I. 5); IG II/ΠΙ 1323 (II. 13–14) from Athens of the years 232/1 BC and 213 BC; IG II/ΠΙ 2347 (II. 5–6); IG II/ΠΙ 1317 (I. 5) from Salamis of the ca. 350 BC and the 3rd cent.; and IG II/ΠΙ 1318 (II. 9–10), place unknown, the 3rd cent. BC. Almost all of these inscriptions honour the benefactors of the association. See also Poland 1909, 19–21, 28–29. From Delos see IG XI 1228 and 1229 of the κοινὸν τῶν θιασωτῶν from the 2nd cent. BC.
\textsuperscript{148} IG II/ΠΙ 2354 (Athens (?), I. 1, end of the 3rd cent. BC); IG II/ΠΙ 1291 (II. 15–16, 20, 27) (Athens, middle of the 3rd cent. AD). These are list of the dedicators in honour of the deities. See also Poland 1909, 20–21, 28–29.

\textsuperscript{150} Ibid., 19.
\textsuperscript{151} Ibid., 20, 26.
\textsuperscript{152} M. Douglas has analysed the reasons for the formation of social identity in terms of the dichotomy between so-called group and grid identities, the former of which defines identity as a choice of interpersonal contacts and the latter as a behavioral option within personal interactions. See Douglas 1982, 16–17 and Chapter II.3.
"... some associations appear to have been formed for the sake of pleasure, for example, religious eranoi and thiasoi which are unions for sacrifice and social intercourse (θυσίαι καὶ συνουσίαι)" (EN 8.9.5).

Individuals who banded together under a certain rubric or institution tended to coerce one another to develop the full implications of their shared experience which in this case was a common cult. People could contribute their interest, time and part of their private property to the common cause, which thus was given under the auspice of religion. To some extent this was the opposite of state religion; but it also complemented it.\(^\text{153}\) If we regard private religious associations as a new phenomenon in religious life, we should never forget that in Hellenistic Athens the old and the new lived side by side.

### A. Arrival of the Goddess Isis

During the fifth and the fourth centuries seven foreign cults established themselves in Athens, three of which were officially accepted.\(^\text{154}\) The gods of these associations were worshipped in thiasoi. These thiasoi first came to Piraeus, the gods being brought mainly by foreigners. Isis had arrived in Piraeus before 333/2 BC. This is referred to in the inscription IG II/III\(^2\) 337 from this year permitting the merchants of Cition to build a temple to Aphrodite.\(^\text{155}\) It refers, as a kind of a justification, to Isis and the Egyptians, “who had earlier been given permission to build a hieron for their goddess Isis” in Piraeus (lines 42–45). Thus Isis had first been worshipped in a private thiasos of Piraeus\(^\text{156}\) without having the official permission which was required from a private religious association.

\(^\text{153}\) It should be remembered that official religions and private religions had also previously existed side by side. The membership of the cults of the phratries was determined by genealogy. But the thiasoi of the phratries have to be distinguished from the private religious associations which did not demand blood-relationship.

\(^\text{154}\) The cults were those of Ammon, the Mother of the Gods, Bendis, Adonis, Sabazios, Isodaites and Kotys. The three first mentioned had become official by the end of 5th cent. BC. As examples see inscriptions and mentions of the ancient authors about Ammon: IG II/III\(^2\) 1282, l. 7 (262/1 BC); about Mother of Gods: IG II/III\(^2\) 1257; 1314–1316; 1327–1329 (years 213/2, 211/10 BC, end of the 3rd cent. and the first part of the 2nd cent. BC); about Bendis: Plato, Resp. 1.1; IG II/III\(^2\) 1361 (Piraeus, 4th cent. BC); of the orgeones of Bendis e.g.: IG II/III\(^2\) 1255 (337/6 BC) (Bendis was introduced to Athens in the second part of the 5th cent. BC); about Adonis: Demosthenes, De Cor. 259–260; IG II/III\(^2\) 1261 (Piraeus, 302/301 BC); Aristophanes, Lys. 386–390; about Sabazios: IG II/III\(^2\) 1335 (102/1 BC); Theophrastus, Char. 16; about Kotys (the goddess did not enter Athens but stayed in Piraeus): Strabo, 10.3.16 (refers to Aeschylus). For Isodaites see Simms 1985, 190–200. In Piraeus there was also a religious thiasos of Zeus Labrandos: IG II/III\(^2\) 1271 (298/7 BC).

\(^\text{155}\) = SIRIS 1. R.R. = Sokolowski 1969, no. 34; R.R. Simms 1985, 205 thinks that this Aphrodite was Aphrodite Ourania, a Cypriot goddess. Thus he connects her to the Salamian goddess who was worshipped in Athens from the end of the 4th cent. BC without official status in the city. The inscription does not in any case specify who this Aphrodite of the merchants of Cition was.

\(^\text{156}\) It is possible that the cult of Isis had existed in Piraeus quite a long time before as a private cult; why not, therefore, as the cult of a phratry? Evidence for this is vague but it is interesting that in an excavation in 1959 in Piraeus there turned up a statue of Isis or her priestess dressed in peplos with the knot of Isis, dated to the 3rd or 2nd cent. BC (Paraskevaitis 1961, 133), but very hellenized in form with no Egyptian features. This suggests that the cult must have been amalgamated already into the Greek tradition and the goddess herself was hellenized as well. See Paraskevaitis 1961, 133–134.
association when it wanted to build a temple for its god. Isis was brought by foreigners and she was at first their goddess.¹⁵⁷ But in the course of time Isis became very popular, much more popular than the politic-religious cult of Sarapis ever was in Greece.¹⁵⁸ She was worshipped in the thesios of the Sarapiastai in Athens, where the cult of the goddess was established in the first part of the third century.¹⁵⁹ It seems to have gained an official status by the end of the century. An inscription from paulo post 200 BC (IG II/III² 4692)¹⁶⁰ shows that the cult of Isis, incorporated into the Sarapis cult,¹⁶¹ had received official status at Athens by 200 BC and, in all probability, popularity as well. Priestly offices were held and organized according to the demos of an annual holder of the post. Most of the other cultic officials were annually chosen by vote, such as the zakoros¹⁶² who was a guardian of the temple.

It is interesting to explore the reasons for the popularity of this cult and its official acceptance. It may have depended in part on the political situation as well as on changes in the forms of the religious life of Athens. Obviously, Athenian citizens did not have a craving to worship the goddess Isis, but behaved in a politically and economically sound

¹⁵⁷ Brady 1935, 19–20; Fraser 1960, 23; Merkelbach 1995, 121–122. Compare this with the situation of the arrival of Isis at Delos. She was the first Egyptian goddess to come to an island, probably between the end of the 4th cent. BC and the beginning of the 3rd (the first epigraphical evidence is a dedication IG XI4 1306 from Sarapieion C which Roussel 1916a (p. 106) dates to the very beginning of the 3rd cent. BC). Around the same time the arrival of Sarapis is related in a legendary form in an inscription from Sarapieion A IG XI4 1299. The text is studied profoundly by H. Engelmann in 1975, who calls it “the Delian aretalogy of Sarapis” (title of the book). See also Bruneau 1970, 461 Dunand 1973, 87 and Merkelbach 1995, 217. This is the so-called ‘Chronicle’ stating clearly that the goddess was brought by an Egyptian priest of Sarapis, Apollonius, straight from Egypt to the island and gives the genealogy of the first priests. Thus, the Egyptian priestly origin of Egyptian gods was stressed in Delos. P.M. Fraser 1960, 23 suggests that before the establishment of the official cult of Sarapis described in the ‘Chronicle’, Sarapis had had a private cult in Delos as well, and dates its introduction between 300–260 BC; see also V. Tran Tam Minh 1982, 102, 110–111 who underlines that the cult came to Delos as a result of private initiative (of Apollonius). F. Dunand 1983, 78–79 holds the view that ‘the Isis-propaganda’, active missionary work for her, should not be excluded from the spread of the cult of Isis, and that the ‘Chronicle’ well represents this. In any case, Sarapis followed Isis to Delos as well (see Roussel 1916a, 245; Bruneau 1970, 461; Dunand 1973, 87). A separate Isieion was built in Sarapieion C, which was the main meeting-place for the thesias of the Egyptian gods at the beginning of 2nd cent. BC. The sanctuary was given official status by the Athenians about 190–180 BC. See IG XI3 442 (179 BC). In Delos there was also Sarapieion B, a small sanctuary of the Egyptian gods functioning as a meeting place of certain associations in the same manner as Sarapieion C.

¹⁵⁸ See e.g. Tran Tam Minh 1982, 109; Samuel 1983, 82; F. Solmsen 1979 states in p. 22: “Sarapis soon realized that for his career’s sake he had much to pay as keeping as close as possible to Isis.”

¹⁵⁹ The first inscription concerning the thesios of Sarapis belongs to the year 215/14 BC and is most likely from Athens: IG II/III² 1292; see Dow 1937, 227–228 and Nilsson 1950, 120. But it is worth remembering that in 291 BC Menander had already mentioned Sarapis as oev vòc 9è6ç; P.Oxy XV 1803, 9–10 (Pack², no. 2162) = Koerte & Thierfelder 1959 (vol. III), fig. 139, 60. The cult had penetrated into Attica earlier, probably at the end of the 4th cent. BC. See Fraser 1960, 23; Sokolowski 1969, 94 and Vidman 1970, 48.

¹⁶⁰ S. Dow 1937, 198 gives the inscription dating it between the years 210 and 170 BC. The inscription mentions the name of an hiereus, the priest with the first sigma of his demotic and a zakoros with ethnic. This indicates that a certain order in the cult was already well defined.

¹⁶¹ Ευσέβειας, ‘Ισίδη, ‘Αναπόθιδε εύξεσι is the common formula used in the Egyptian cults, as in this case. See also and Dow 1937, 231; Vidman 1970, 48; Dunand 1973, 6–8.

¹⁶² About zakoros, see pp. 55–56 n. 191 and p. 60 n. 216.
way by accepting the new cult. The political situation will be discussed more closely later, but it is necessary to mention here that the situation in Athens required an openness in public affairs which concerned foreign religions. foreigners had to have an opportunity to keep up their own traditions, and religious cults played an important role in this. There was no need for them to take part in a common city cult which could have strengthened their commonly-shared identity in Athens. On the other hand, Athens apparently wanted to keep all the foreign cults under her control and did so by closing them within her boundaries and accepting their arrival on such a large scale. Thus she kept the new cults under her dominion. Isis' arrival at Athens seems to have been during a period of tolerance in the city. In the eyes of travellers and especially those tradesmen to whom Athens wished to show herself as a commercial centre of the Mediterranean this may have appeared as conspicuous hospitality. An argument which often occurs in the research literature is that the Egyptian cults spread to Greece because the Ptolemies caused them to do so in order to support their imperialistic propaganda, and these cults would have been a mark of Ptolemaic sovereignty, at least during the third century BC. This opinion, which P.M. Fraser calls 'the imperialistic theory', seems untenable because the Egyptian deities in Greece were worshipped in the private religious associations in the beginning and only later became public. If the Ptolemies had introduced the cults of the Egyptian deities intentionally, as a part of their propaganda, this would rather have resulted in a public and official, not a private cult. It is more probable that the cult was first spread by individual mercenaries, travellers and emigrants who had acquired a

---

163 Cf. Simms 1985, 205.
164 In religion the status of metics and foreigners was essentially different. foreigners were not allowed to participate in the city cults, or even to turn to the gods of the city by giving official votives or by offering prayers. The city did not protect them. But metics had the right to take part in the festivals of the city-cults, but they were prevented from becoming officials of these cults. See Clerk 1893 (1969), 140.
165 See e.g. Lafaye 1884, 24–28; Wilczen 1927, 643; Brady 1935, 7, 17–18; Nilsson 1950, 118, 149; Koester 1982, 187; Samuel 1983, 76, 83–85. According to Brady 1935, 7 and 17–18 Sarapis is sometimes seen as having been used as a symbol by of the Ptolemies for their imperialistic expansion. For the rejection of this ‘imperialistic theory’ see the note 167 below. Notice also that Plutarch provides a testimony to the way in which tradition associated the early Ptolemies with Sarapis e.g. in Mor. 5.362a–b by mentioning the Greek parallels of Sarapis and his dominion over all peoples.
166 Fraser 1960, 21.
167 Fraser 1960, 20–22, 42. The second part of the P.M. Fraser’s article is intended to provide evidence for the untenableness of ‘the imperialistic theory’ by examining the material concerning the spread of these cults from the mainland Greece, the Cyclades, the Aegean area, Macedonia and Asia Minor (pp. 20–49). Rejection of the theory is stated also by Nock 1933, 54–55; Castiglione 1978a, 189; Préaux 1978 (1987), 650; Tran Tam Tinh 1982, 164; Walters 1982 (1988), 99 as well as already by S. Dow 1937, 18–27 who nevertheless in the other section of his study (pp. 21–22) seems to support it. A.E. Samuel 1983 for his part first accepts ‘the imperialistic theory’ (pp. 76, 83–85), but in the latter part of his article rejects it: “Surprisingly enough, the introduction of the statue of Sarapis (to Alexandria) and the erection of the temple for it is all that we can find ascribed to Ptolemy (p. 87) ... and it is rightly rejected that the god served as an ideological device to promote Ptolemaic imperialistic goals (p. 89) ... thus the spread of Sarapis worship need not be part of Ptolemaic propaganda (p. 94),” C. Habicht 1992 (1994), 75–76 emphasizes the good relations between the Athenians and the Ptolemies stating that the introduction of the cult of Sarapis ca. 200 BC was an indication of continued friendship of the two.
personal interest in the cult and wanted to establish the worship of these deities in their new homelands. The Egyptian gods provided an opportunity to have an individual relationship with the gods, and this made the cults more interesting and, therefore, they spread more easily. Thus they did not need Ptolemaic propaganda to support them.\textsuperscript{168} This does not of course exclude the possibility that by accepting the new cult of the Egyptian gods into the public cults of the city the Athenians may have wanted to show their favour of the Ptolemies.

B. The Renewed Public Life of the Polis in the Associations

The \textit{thiasoi} gave the non-citizens a frame of reference in which to keep up and form their group-identity which stemmed from their common local and ethnic origin.\textsuperscript{169} In the second part of the third century Athenian citizens were members of the \textit{thiasoi}. Thus the attitude to religious \textit{thiasoi} had changed; they functioned as a \textit{polis} on a smaller scale and thereby were integrated into the structures of the \textit{polis}.\textsuperscript{170} This can be seen from the administrative practices of the associations, most clearly in their finances; associations honoured their benefactors, persons who showed grace (\textit{χάριτας}) as \textit{philotimoi}, and gave them honorary crowns (\textit{στεφανώω}) inscribing their names on the \textit{stelai} usually mentioning the sum they devoted to the use of an association. Very often officials, most often \textit{epimeletai}, are honoured for their good deeds. In fact, almost all of the inscriptions concerning the associations of the late fourth and third centuries BC are of this type. The terminology in the inscriptions of the associations became conventional repeating the same formulas with slight variations, for example: \textit{... καὶ στεφανώσω ἕκαστον αὐτών θαλλοῦ στεφανοῦ ἄρτης ἐνεκα καὶ φιλοτιμίας τῆς πρὸς τὸ κοινὸν καὶ εὐσεβείας τῆς πρὸς τὴν Θεόν (IG II/III\textsuperscript{2} 1277, 19–24)\textsuperscript{171} or εὐσεβείας ἐνεκεν τῆς...}

\textsuperscript{168} Dow 1937, 22; Fraser 1960, 42.

\textsuperscript{169} The often occurring \textit{orgeones} differs from \textit{thiasos}, because the \textit{orgeones} was mostly the religious association of citizens (this can be justified from prosopographical evidence, because the names of the officials and the members of the associations are often listed in inscriptions). Religion was central to \textit{orgeones}, because it was born around the cult of the \textit{phratria}, the \textit{orgia} (rites, sacrifices. In the inscriptions the temple (\textit{naos}) or \textit{temenos} are often mentioned. See e.g. IG II/III\textsuperscript{2} 1252 (end of the 4th cent. BC); IG II/III\textsuperscript{2} 1253; 1255; 1256 (the \textit{orgeones} of Amynus, Asclepius Dexion and the one devoted to Bendis, middle of the 4th cent. BC); 1314 (\textit{orgeones} of the Mother of the Gods, 213/12 BC); 1334 (Piraeac \textit{orgeones}, end of the 2nd cent. BC). But from the middle of the 3rd cent. BC onwards \textit{thiasotai} could also be Athenian citizens, which shows that attitudes towards religious \textit{thiasoi} had changed; see e.g. the Athenian \textit{thiasos} IG II/III\textsuperscript{2} 1277 (278/7 BC); IG II/III\textsuperscript{2} 1297 (237/6 BC). The members of \textit{eranoi} were both citizens and metics, e.g. IG II/III\textsuperscript{2} 1335 (year 102/1 BC) which is the list of the names of the honoured officials (\textit{hieraeus, tamias, grammateus and epimeletes,} all metics) and of the members of Piraeac \textit{eranos} of Sabazios including both citizens (35 persons) and foreigners (13 persons), the ethnic of four members is not mentioned.

\textsuperscript{170} San Nicolo 1915 (1972), 41, 43; Preaux 1978 (1987), 643.

\textsuperscript{171} The inscription of an Athenian \textit{thiasos} from the year 278/7 BC: \textit{...and each of them will be crowned by a wreath for the brave deeds and ostentiousness that they have shown to the \textit{koinon} as well as for their piety to the God"}. Usually these texts end with a formula of the following type, as in e.g. IG II/III\textsuperscript{2} 1277 (II. 35–36) and IG II/III\textsuperscript{2} 1315 (II. 26–28); \textit{ἀναγράφαται δὲ τάδε τὸ ψήφισμα ἐν στήλει λιθογραφίᾳ καὶ ἀναθείναι/στήσαι ἐν τοῖς ιερῶν/πρὸ τοῦ ναοῦ. ("Thus this degree is to be written down onto the stony \textit{stèle} which is to be placed/erected to the sanctuary/in front of the temple.".) About
eis toûs theòous kai filòtimaîs têis prôs toûs theiaîwv (IG II/III² 1282, 15–16) or èpaineîsai Dmètrion Sowándrou ὅν Ολυνθίων ἄρετης ἔνεκα καὶ δικαιοσύνης ἢς ἔχων διατελεῖ πρὸς τὸ κοινὸν τῶν θιασωτῶν καὶ στεφανώσαι αὐτὸν ἄνασθματι ἀπὸ: Γ': δράχμων (IG II/III² 1263, 20–25). The words used in enumerating the person’s good deeds, in addition to the sums paid, are usually arete (goodness), euergetia (good-deed), eusebeia (piety), eunoia (kindness), dikaiosyne (righteousness), and because they are honoured χάριτας ἀξίας ἀποδίδονται ἀπὸ λήψισιν καὶ Κόμονται (to give / get thanks or gratitude). This followed upon the practices of the polis. Organisation of the association included an assembly parallel to the city-boule which took care of the decision-making and formulating of the regulations. In cult associations this assembly is called the ἀγορᾶ κυρία and occurs frequently in the Athenian and Piraean thiasoi and orgeones. The officials of the cult association, who usually were chosen by lot, were executors of the decisions made by the agora kyria which consisted of all the members of the association who had the right to vote. M. San Nicola regards the agora kyria as a part of the phraseology and terminology of the associations. According to him it does not have much practical value, but is quite an empty concept without any juridical meaning in the associations. This is probably true when regarding the associations of the Roman times, but agora kyria must have had at least some meaning in the first associations, and only later lost much of its functional role.

One of the basic reasons for the emergence of religious thiasoi mainly in the third century BC is the situation in early Hellenistic times; it is probable that on the socio-

172 The Athenian thiasos the name of which is unknown (262/1 BC).
173 The Athenian thiasos (300/299 BC).
174 As mentioned above these kinds of statements occur in almost all of the inscriptions of the Athenian and Piraean associations of the period being studied. For good examples see thiasos IG II/III² 1252 (orgeones of Asclepius Dexion from the middle of the 4th cent. BC; 1263; 1265; 1277; 1282; 1297; 1301; 1315 (orgeones of the Mother of the Gods); 1324 (orgeones of Bendis), all from the 3rd cent. BC. Notice that almost all of the ca. seventy inscriptions of the associations honour philotimoi, e.g.: IG II/III² 1266 (eranos, end of the 4th cent.); 1294 (Athenian orgeones, middle of the 3rd cent. BC); 1298 (Athenian thiasos, 232/1 BC); others are of poor quality or not clearly those of religious associations.
175 See inscriptions from the 3rd cent. BC concerning the cult-association of Bendis in Pireaus IG II/III² 1283 which mentions a report of the agora kyria (I. 2) to the Athenian cult-association expressing its wish to co-operate in organizing a common procession. IG II/III² 1361 (latter part of the 4th cent. BC) lists the regulations of the same association concerning the fees that had to be paid by its members before the festival of Bendideia (I. 18).
176 See e.g. IG II/III² 1277 (Athenian thiasos, 278/7 BC); IG II/III² 1282 (Piraean thiasos, 262/1 BC); IG II/III² 1298 (Athenian thiasos, 232/1 BC); 1315 (Piraean orgeones of the Mother of the Gods, 211/20 BC); 1317 (Piraean thiasos of Bendis, end of the 3rd cent. BC); 1323 (Athenian thiasos, 200 BC); IG II/III² 1325 and 1326 (Piraean thiasos of Dionysiaitae, 185/4 and 176/5 BC); IG II/III² 1327; 1328; 1329 (Piraean thiasos of the Mother of the Gods, 178/7 BC, 183/2 BC, 175/4 BC). The agora kyria is still found in associations of the last cent. BC, e.g. IG II/III² 1334 (Piraean orgeon, end of the 1st cent. BC); 1355 (102/1 BC, Piraean eranos).
177 See Foucart 1873, 15–16 (see also the critic below, p. 54). M. San Nicola 1915 (1972), 47 refers to the practise of naming the upper officials by vote.
178 San Nicola 1915 (1972), 99–103.
emotional level the formal cults of the city-state no longer held as much appeal for people as before as there was now more religious choice. Society had become more disintegrated and pluralistic. People were searching for new answers to their social needs, and perhaps also to their psychological ones, in religion. A climate of openness to these new manifestations was also prevalent, and when the religious associations had been absorbed into society, they gained more and more in importance and took on more functions in the life of the city, both economic and political.

It is worthwhile commenting here on the writings of P. Foucart, who in 1873 studied cult associations in his *Des associations religieuses chez les grecs. Thiases, éranes, orgéons*. Following the appearance of this monograph the cult associations have been studied in full only very rarely (F. Poland 1909, *Geschichte des griechischen Vereinwesens* and M. San Nicòlo 1972 [revised edition by J. Hermann from the edition of the years 1913–1915], *Ägyptisches Vereinwesen zur Zeit der Ptolemäer und Römer*). Foucart regards *thiasoi* and *éranoi* as immoral associations which were open to all, men as well as women, and what in his opinion is even worst, to foreigners. Thus the associations awoke curiosity and fed the inclination of people desperate to escape into social groups which practised magic, superstitious and orgiastic rites, and noisy music, all of which were in strict contrast to intelligent, pure and "platonically orientated state-cults". Foucart places the religious associations at the opposite and worst end of a polar axis where the cults of the city-state represent all that is good and beautiful. But as has been shown above, there were, in fact, no drastic differences between the participation in these cults — at least when they had became official — and those of the city-state. I am more inclined to think that the cult associations of Athens, likewise, the *thiasos* of Isis among them, reflected the practices of the religious cults of the *polis* on their administrative level. This *thiasos* was an association for the Athenians, also, and being a member in it accorded an individual prestige. The functions and practices of the city-state's organisations lived a new life inside it on a smaller scale. But there was in addition a nominal openness regarding religious matters.

C. Participants in the Cult

As explained above, the cult of Isis had an official public status in Athens by 200 BC. The goddess was worshipped in the *thiasos* of Sarapis, who had been imported into Athens for social and cultural reasons. Isis was much more popular, however, perhaps the
Interpreting Early Hellenistic Religion

most popular of the foreign gods in Athens,\(^{184}\) where the official status of the cult meant that its members and officials were mainly citizens. This is of interest when we consider the situation prevailing at the beginning of the third century: the attitude towards the Ptolemies seems to have been favourable at this time because of the political situation and the economic difficulties. This is one of the reasons why Sarapis, the creature of the Ptolemies, Egyptians and the Greeks,\(^ {185}\) gained such a place of importance in Athens. Isis, being more popular, and probably emotionally more tempting, became the one who was more worshipped, and her cult in Athens appears to have grown in importance continuously till the middle of the first century BC.\(^ {186}\) F. Dunand gives a general picture concerning the acceptance of the cult of Isis from a religious-sociological point of view. She proposes three stages, first of all applicable to the case of Athens: 1) the phase of tolerance (a neutral attitude by the magistrates of the polis to the foreign cult of Isis which was maintained by the foreigners), 2) the phase of assimilation and intervention of the polis into the cult (metics and citizens became members in the cult) and 3) the official intervention and acceptance of the cult by the polis (the organization of the cult as well became determined by the principles of the administration of the polis).\(^ {187}\) In a relatively short time the cult in Athens seems to have become mainly one for the wealthy citizens.\(^ {188}\) According to an inscription from around the year 200 BC (IG II/III\(^2\) 4692) the priest of the cult of Sarapis and Isis was also an Athenian citizen.\(^ {189}\) This meant that the citizens could be participants in the cult which no longer was an unofficial cult of non-citizens and foreigners.\(^ {190}\) The zakoros, a lower official in charge of taking care of the sanctuary and the statue of the goddess, is often mentioned in the documents. The office of zakoros was limited to the cults of a few specific deities, mostly foreign ones.\(^ {191}\) This post was impor-

184 Dow 1937, 231–232 (with references to votive offerings and six pieces of coins dedicated to Isis alone); Dunand 1973, 12.
185 See Chapter V.1.B.3, also p. 51.
186 Walters 1982 (1988), 100–103. In addition to the evidence of the inscriptions there is the impressive and exceptional portrait of a priest of Isis found in the south-east corner of the Agora (inv. no. S333; for a photograph see the cover of this book). It shows a middle-aged shaved man whose facial features are carved with strong realism. The shaven head is a mark of the priest of Isis, and in this portrait the facial type is surprisingly close to the Egyptian representations. So it is very possible that the statue is of a priest of Isis. It is dated between the second half of the 2nd cent. BC and the forties of the 1st cent. BC. See Harrison 1953, pp. 12–13, no. 3, pl. 3. Another important find supporting the wealth of the Athenian sanctuary of Isis in Roman times is a colossal statue of Isis in dark Eleusinian limestone found on the south slope of the Acropolis and dated to the forties of the 1st cent. AD; see Milaides 1960, 49.
188 Brady 1935, 47–49; Dunand 1973, 16; idem 1983, 83–84; Walters 1982 (1988), 98. In the Isiac inscriptions from the period between 333/2 and 144/3 BC in Athens in SIRIS collected by Vidman (1969) the priest/priestess (hiereus/hiereia) is mentioned in all but one (no. 1 = IG II/III\(^2\) 337) and he (she in no. 2 = IG II/III\(^2\) 1292) is always an Athenian citizen (in IG II/III\(^2\) 4692 only the first letter of the demotic is preserved).
189 The inscription reveals the first sigma of the demotic of the hiereus Στηνοικετής.
190 Compare Dow 1937, 200.
191 The title of zakoros was also neokoros, but in Athens he appears mostly as zakoros. Neokoros of Sarapis appears as a dedicate in the Athenian inscription SEG XXVI 155 (AD 196/7–205/6); the neokoros of Isis is not found in Athens until the 3rd cent. AD; see IG II/III\(^2\) 3681. In other foreign cults neokoros was common, and his office is already known from the Classical times e.g. from Delphi; see Hanell RE 1941, 2422–2428. See the inscription SEG XXII 114 (first part of the 1st cent. BC)
tant in the Athenian association despite its low rank among the officials of the cult. E. Walters argues for the upper class status of the cult of Isis: she bases her argumentation on the Attic grave reliefs which represent women in the dress of Isis and which should be identified as those of a prestigious group of participants of this cult: they document continuous participation by a fairly large number of the prosperous class in the cult in Athens from the first century BC to as late as the early fourth century AD.192 The gradual increase in the number of 'the Isis reliefs' indicates a period of sustained growth in the membership of the cult of Isis to the sixties of the third century AD. Thus in Athens the cult lasted long – till the end of the fourth century AD – and in the course of time participation extended also to the lower classes.193

The position of women in the thiasos of Isis has been discussed. This religious association seems to have been open to women, however, though in Athens it quite clearly consisted mainly of men.194 Usually the cult of Isis is thought to have been a cult especially for women (which it obviously was later on in Rome), but in Greece, in Athens and on Delos during Hellenistic times, it had a different character. The hier eus, the priest, was a man until the Roman period in Athens.195 Inscription IG II/III² 1292 (= SIRIS no. 2), dated by L. Vidman to 215/214 BC, is interesting, because it gives the name of proeranistria196 Nikippe (lines 24–25), a woman who was probably a kind of main priestess, a leader of the temple and cultic services. But her position was nominal; in principle she was the first titular priestly official, but not in practice. As a woman she

corresponding to the attribution of zakoros who had an important post in the Athenian cult of Isis; see also Pollitt 1965, 128 and below p. 60, (n. 216).

192 Walters 1982 (1988), 94, 98, 102–104. In E.J. Walters' catalogue (p. 208–209) 'the Isis reliefs' date from the last quarter of the 1st cent. to the early 4th cent. AD. The 1st cent. reliefs are 14 in number, the first being the relief in the National Museum of Athens, inv. no. 3036 and the last is the so-called Aegina pediment (Walters' catalogue no. 5). Dunand 1973, 145–148 lists 19 'Isis reliefs', all from the Roman period (the 1st and 2nd centuries AD) and states that in Imperial Athens Isis and her cult is to be seen to have implanted itself into the population (p. 144). Walters' study shows that there was a heightened production of Attic grave reliefs in the Roman period and that 'the Isis reliefs' were among the best and largest of them, produced mainly in the 1st and the 2nd centuries AD; Walters 1982 (1988), 95–96. In the case of grave reliefs it should be remembered, however, that the anti-luxury law of Demetrius of Phalerum from 317–307 BC prohibited impressive and expensive grave reliefs and the lack of them in Athens does not, of course, correlate with the wealth of the Isis' cult in Hellenistic period.

193 Epigraphical evidence from the Athenian cult in L. Vidman's SIRIS lasts till AD 220 including 34 inscriptions, 12 (nos. 1–12) from the Hellenistic period. See also Dunand 1973, 144 and Walters 1982 (1988), 101.

194 See e.g. Dow 1937, 194–195; Poland 1909, 29. That there were women members in the associations is to be seen in the lists of the members: there are female names in many associations e.g. the Athenian thiasos IG II/III² 1277 (237/6 BC) lists 58 members of the thiasos (in addition to archieranistes and hier eus), both males) among whom appear 10 women (II. 25–34).

195 Vidman 1970, 48–49; see the inscriptions in SIRIS, 1–9 except no. 2. For those of Roman times with priestesses see, nos. 13; 18; 23 and 24 (for their IG-numbers, see the concordance).

196 The same position is often called archieranistes in other cult associations, especially those of Artemis. See IG II/III² 1297 (10); 1319 (ll. 15–16) (3rd cent. BC), and IG II/III² 1339 and 1343 (both from the 1st cent. BC). Archieranistes is still mentioned in the law of an Athenian eran o which probably belongs to the end of the 2nd cent. AD. On Delos this position is normal, but see discussion about its functions in Roussel 1916a, 266. Archiereus is met in the Egyptian associations, see San Nicolò 1915 (1972), 67–68.
might have represented the femininity of the goddess Isis. Hieropoioi were those males (line 15 on the above-mentioned inscription) who took care of priestly services in practice.\textsuperscript{197} On Delos, where the Athenian official influence in the cult of the Egyptian gods is obvious at least in Sarapieion C\textsuperscript{198}, women had a minor role as members, donors of offerings\textsuperscript{199} and as officials\textsuperscript{200}. In Sarapieion A which kept up a more ‘original’ Egyptian character and cultic practices the *therapeutai* joined together to pay a contribution to the costs of the dedicated monuments and practical needs of the sanctuary. Twenty of them are known by name from an inscription, but only one is a woman.\textsuperscript{201} There is an exception from Sarapieion B, a small Delian sanctuary of the Egyptian gods which did not have an official character, but functioned as a meeting place and sanctuary for certain associations.\textsuperscript{202} All the dedications of this sanctuary are dated before the year 166 BC. Among them there is a dedication of the so-called κοινὸν τῶν δικτιστῶν (IG XI\textsuperscript{4} 1227). The name is given according to the day of the month, the tenth, when the association had its monthly celebration in honour of the gods Sarapis, Isis and Anubis. The inscription gives the names of sixteen members, nine of whom are men and seven women. Only one bears a patronymic, so that this association was mainly one of non-citizens. Other inscriptions from Sarapieion B of a similar type do not name any women, for example, the κοινὸν τῶν ἐνετιστῶν (IG XI\textsuperscript{4} 2228; 2229), whose monthly celebration was held on the ninth day, gives names of the twenty-four members of this *thiasos*, all men, an archithiasotes Dionysius among them.\textsuperscript{203}

T.A. Brady has studied the prosopography of the Egyptian cults in Greece in his *The Reception of the Egyptian Cults by the Greeks* (1935). According to his statistical analysis there were seven Athenian citizens as officials of the Athenian cult of the Sarapiastai, and nine citizen members (among whom the names of two were, though, quite mutilated) mentioned by name in the inscriptions of the cult association in Athens between the years

\textsuperscript{197} Cf. Dow 1937, 194–5.

\textsuperscript{198} In Sarapieion C on Delos this cult especially was ‘Athenian’, and its important officials were always Athenians from the upper classes chosen for their posts in Athens. The city of Athens provided the sanctuary on Delos with major dedications as well. In this Sarapieion the Egyptian gods were worshipped by religious associations. Thus the cult there was a means of asserting Athenian occupation of the island. See e.g. Roussel 1916a, 235, 255–257; Walters 1982, 100.

\textsuperscript{199} See the list of the names of donors of votives and their sexes in Delos’ cult of Isis in F. Mora, 1990, 3–134, indices on the donors and their sexes 135–141; 152–151. See also the comments of Roussel 1916a, 269 on the inscription no. 84 (= ID 2120): only one of the 19 who contributed economically to the finances of the cult on Delos was a woman.

\textsuperscript{200} The first priest (ιερεύς) on Delos was never a woman (ιερεία). See Dow 1937, 194, 200 (argumentum ex silenio).

\textsuperscript{201} IG XI\textsuperscript{4} 1299 (the ‘Chronicle’) mention θεραπεύς in l. 43; IG XI\textsuperscript{4} 1217 lists the names of the *therapeutai* (20 names), and IG XI\textsuperscript{4} 1290, l. 4 mention *therapeutai* (without specifying their number) as well, both inscriptions from the beginning of the 2nd cent. BC. See also Roussel 1916a, 253. About the *therapeutai* see pp. 118, 120.

\textsuperscript{202} Roussel 1916a, 258.

\textsuperscript{203} IG XI\textsuperscript{4} 1228, l. 2 and 1229, ll. 14–15. Archithiasotes is mentioned on ll. 2–3. The latter one is a dedication of this *thiasos* stating only a name of the *thiasos* without specifying the names of the members. Compare San Nicolò 1915 (1972), 49–50 who describes the practise of organizing the yearly religious celebrations in the associations of the Ptolemaic Egypt.
In the case of Athens, five of the Athenian Sarapiastai belong to the third century BC, suggesting that this time was the high point of the cult in Athens which was in contrast to other places in Greece where Egyptian gods gained popularity mainly between the second century BC and the second century AD. T.A. Brady’s analysis is valuable in that it shows the lines on which the cult became accepted in Athens and that the most important period in the history of the association was the third century BC when it met with official acceptance.

D. Administrative of the Cult

Administrative structures of religious associations are interesting because by observing them it is possible to follow the change that took place in religious life in the early Hellenistic times. Here we are looking only at the cult of Egyptian gods in Athens, the thiasos of Sarapiastai. The Ptolemies were known to support the cult of Sarapis generously; Sarapis was regarded as a patron of the Ptolemaic dynasty.

There was no stable hierarchy or any kind of charismatic leadership in the cult of Isis in Athens. The officials were usually chosen annually and the leadership was probably not based on the personal charisma of the leading person. The cult had a priest (see above page 55), and his post was for a year in Hellenistic times, but this was not the case in the Imperial period. His Athenian status is seen in the formula τερευς Σαράπιδος εἰς ἄστυ in the inscription SEG XXI 584 of 144/3 BC (line 7). A very important official in the association was the tamias, the one who took care of the finances, received the dues, paid the expenses for such things as inscribing stelai, for sacrifices and the burial of members. The tamias is most commonly mentioned in the inscriptions of Athenian cult-associations. The tamias was the leading and first-mentioned male official of the cult-association of Isis and his duties were much parallel to the liturgy of the hieropoioi of the polis cults and like the epimeletai of the Eleusinian Mysteries. In the cult associations

204 Brady 1935, 49 (summary in form of a table). On Delos there were 109 Athenians, but their names belong to a later period, mainly to the 1st cent. BC.

206 The word ἐνιαυτός in the inscription IG II/III² 1292, l. 10 (215/14 BC) states that the officials had been nominated for one year. See inscriptions concerning the Athenian cult of Sarapis and Isis in Hellenistic times with the names of the annual hieraeus in SEG XXI 584 (144/3 BC); SEG XXI 796; IG II/III² 4702 (early 1st cent. BC) and SIRIS 5 (116/5 BC). For the Imperial period, see IG II/III² 4732; 3564; 3565, and SEG 22, 167 (the 1st or 2nd cent. AD).

207 In IG II/III² 1275 (beginning of the 3rd cent. BC) is a law for the thiasotai in Piraeus outlining the obligations of the members of the thiasos and of their family members in relation to such funerals (l. 5–6). Important members had to be present at the funerals of the members and of the benefactors of the association. No doubt for an individual the securing of one’s funeral was one of the important reasons for the existence of thiasos. For comparison see e.g. the cult-associations of Bendis in Piraeus IG II/III² 1284; of the Mother of the Gods IG II/III² 1327 (middle of the 3rd cent. BC); and Dow 1937, 192.

208 In the case of Sarapis and Isis of the early Hellenistic times the hieropoioi is the most commonly mentioned, then the zakoros and the epimeletes.

209 M. Hakkarainen states in his unpublished manuscript that the office of epimeletai is not known to have existed before the middle of the 4th cent. BC, and that during the 3rd cent. BC the duties of the Eumolpidai increased so that they did not only perform sacrifices like before, but were responsible of
the tamias usually had a lower position than the hiereus (and arkhieranistes), but in the case of the Sarapiaisai this seems not to have been the case: IG II/III² 1292 mentions him first, giving him special honours that may have been a recompense for the payments made out of his own pocket. The grammateus worked as a secretary and never had a very high precedence. It is possible that there was more than just one grammateus in a thiasos. The epimeletai were also annual officials, who performed sacred priestly acts such as caring for the hieron, organizing offerings for sacrifices, marshalling a pompe, setting up stelai, announcing honours, convening the agora kyria. Thus epimeletai were subordinate, a kind of pragmatically oriented priesthood, the equivalent of whom in the polis was an official called the hieropoioi. The number of epimeletai was not set in the association of the Sarapiaisai in Athens. In IG II/III² 1292 (SIRIS 2 from the year 215/14 BC) there is only one of them (line 8), but in SEG XXI 584 (SIRIS 4) from the year 144/3 BC also Delian epimeletai are mentioned (line 11). Thus there might have been epimeletai from Delos, who served in the Athenian cult of Sarapis and Isis. Of the lower officials in Athens in the cult of the Egyptian gods only the zakoros, kleidoukhos and oneirokrites are mentioned. The first of them is the equivalent of the neokoros of other cults, under which name this official is mentioned only twice later (at the end of the second century taking care of the finances of the cults as well.

210 Giving honours to officials who contributed to their associations economically was clearly the case also e.g. in IG II/III² 1271 (Athenian thiasos honouring its epimeletes); 1323 (thiasos honouring its grammateus); 1325 (orgeones of Dionysiai) and 1327 (Piraean orgeones of the Mother of the gods honouring its tamias), all the inscriptions from the 3rd cent. BC and the beginning of the 2nd cent. BC. In the cult of the Egyptian gods he is mentioned in IG II/III² 1292 (215/214 BC) and in SEG XXI 584 (144/143 BC). For comparison about the tamias and the grammateus in the associations of the Ptolemaic Egypt, see San Nicolo 1915 (1972), 71–75: there the grammateus probably had a higher position than in Greece, may be due to traditionally more honoured role of the Egyptian scribe.

211 See IG II/III² 1278 (ll. 10–11), Athenian thiasos (of a god whose name is not mentioned) (277/6 BC) which honours grammateus and grammatophylax. The latter was probably a lower grammateus of the association. See also Dow 1937, 192–193; Dunand 1973, 7.

212 See e.g. the Athenian thiasos IG II/III² 1256; 1260–62 (the end of 4th cent. BC) honouring epimeletai of the associations as philotimoi; 1283, (orgeones, before the middle of the 3rd cent. BC); 1301 (orgeones or thiasos, ca. 222/1 BC); 1324 (orgeones of Bendis, beginning of the 2nd cent. BC); For an honour to a private person for acting in favour of the association, see e.g. IG II/III² 1263; 1297 (Athenian thiasoi, beginning of the 3rd cent. BC), and Foucart, no. 6 (pp. 193–194).

213 “There are another ten appointed by lot, entitled the annual hieropoioi, who perform certain sacrifices and administer all the quadrennial festivals except Panathenaias”, according to Aristotle, Ath.pol. 54.7 (translation H. Rackman 1925 (1972), the Loeb Classical Library).

214 According to L. Vidman 1969, p. 7, later Delian priests are known in the Athenian cult (IG II/III² 2336, 102–94 BC). S. Dow 1937, 193 remarks that the number of epimeletai was usually three. He refers to the inscriptions IG II/III² 1261 (Athenian thiasos of Aphrodite, 302/1 BC); 1283 (Athenian orgeones, before the middle of the 3rd cent. BC); 1301 (Athenian orgeones or thiasos, ca. 222/1 BC); 1314 (orgeones of the Mother of the gods, 213/12 BC) all of which are honorary inscriptions for the officials of these associations, and they mention epimeletai in plural without stating the exact number of them.
and in the third century AD) in the cult of the Athenian Sarapiastai.\textsuperscript{216} We meet the zakoros relatively often in the third, second and first century Athenian Isis and Sarapis inscriptions.\textsuperscript{217} The zakoros took care of the material property of the cult-association and the temple; he/she was a 'templi custos'. Usually the zakoros was a metic.\textsuperscript{218} On Delos the post of zakoros was on an annual basis until the time of Sulla, but in Athens this was not always the case.\textsuperscript{219} The kleidoukhos and oneirokrites do not appear in Athens until the year 116/5–95/4 BC.\textsuperscript{220} The first is the norm on Delos and typical of the cult in Egypt. He was a servant, and P. Roussel thinks he opened and closed the doors of the temple among other tasks.\textsuperscript{221} The oneirokrites was an interpreter of dreams sent by the goddess. It is quite clear that these two posts were rare in Athens and they were merely characteristics of the cult of the Egyptian gods in Sarapieion A of Delos which kept up the Egyptian cultic customs. The Athenian cult (and the Delos cult in Sarapieion C) was much more hellenized, and organized along the lines of the city-cults. The cult was protected by the city-boule. One characteristic trait of the thiasos of Egyptian gods in Athens was the principle of filling the offices on a yearly bases. Thus the priesthood did not specialize in a life-long position which would have demanded special devotion to religion only. Rather it reflected the principles of the religious officials of the city-state and followed the needs of the political situation of Athens.

E. Financing the Cult

The financing of the cult of Sarapiastai in Athens is interesting, because it mirrors the general trends of economic and social organisations in early Hellenistic Athens, being managed in the same way as in the other religious associations. S. Dow suggests that in the third century BC religious associations were not wealthy, but became so towards the second century BC.\textsuperscript{222} The economic aspect of the cult association was of importance for

\textsuperscript{216} SEG XXVI 155 (AD 196/7–205/6), 1.3 concerns the neokoros of Sarapis who gave a donation to Sarapis, and IG II/III\textsuperscript{a} 3681 (neokoros of Isis from the 3rd cent. AD). On Delos the neokoros was very common and his post was not subordinate, but quite honourable, because he was chosen from among the citizens and he assisted the priest. Roussel 1916a, 259.

\textsuperscript{217} IG II/III\textsuperscript{a} 4692 (slightly after 200 BC); SIRIS 5 (116/5–95/4 BC); IG II/III\textsuperscript{a} 4702 (beginning of the 1st cent. BC); SEG XXII 114 (first half of the 1st cent. BC) mentions a zakoros in l. 7 telling about the nomination of a person to this post in relation to the decisions of the city-boule.

\textsuperscript{218} IG II/III\textsuperscript{a} 4692, l. 2 indicates the ethnic of the zakoros (Herakl); IG II/III\textsuperscript{a} 4702; SIRIS 5; SEG XXII 114 (l. 7). On Delos the office was similarly frequently held by the non-Greeks, possibly also by slaves and freedmen. Pollitt 1965, 128.

\textsuperscript{219} IG II/III\textsuperscript{a} 4702 (Athens, 1st cent. BC) shows that the period was probably not limited to one year in Athens. S. Dow 1937, 201 thinks that it was "doubtless one year"; J.J. Pollitt 1965, 128 holds the view that the post was filled yearly, because this "might have been intended to prevent collusion between the priest and the zakoros"; see also Foucart 1873, 23, who does not limit the period to one year, and compare IG II/III\textsuperscript{a} 1328 (2nd cent. BC), a decree from Piraeus stating in l. 16–20 that the zakoros of the cult of Cybele was appointed yearly.

\textsuperscript{220} SIRIS 5.

\textsuperscript{221} Roussel 1916a, 268.

\textsuperscript{222} This is to be seen in the quality, size and modesty of the inscriptions concerning the cult (e.g. IG II/III\textsuperscript{a} 1292, 215/14 BC). Half a century later their size was larger, letters were more carefully done, script was higher in quality and there were more cult monuments in general. See Dow 1937, 190. Notice the
the association and its relations with the city. M. San Nicolò regards an association as a juridical person which as a unit had rights and duties, and individuals who took part to the rites and sacrifices, for example, shared the common property of the association. \[223\] We noticed above that the post of tamias, an official who dealt with the finances, was important in the association. Associations were self-sufficient, autonomous units, and for example, granting of loans was a common practice in them. \[224\] Associations had lots of expenses: land for the hieron (temenos), buildings (including a naos), financing the festivals and common meals (eranoi), paying for the inscriptions in honour of benefactors, paying the expenses of the funerals of its members and so on. How was all this financed? In general, thiasoi were either dependent on a wealthy founder or they were closely attached to an official cult of the city or a private house. \[225\]

Associations required their officials to contribute to different funds for the support of the cult, its festivals, the sanctuary and cult facilities. \[226\] Bringing money or sacrificial goods to the rituals of the association was often compensated by the summa honoraria in the inscriptions. \[227\] Membership fees are not mentioned in the inscriptions of the associations, \[228\] but the associations often used to get annual amounts of money or material goods from their officials as payment for sacrifices or as first offerings (εισιτητήρια). \[229\] The late fourth century BC inscription from Piraeus of the orgeon of Bendis (IG II/III 1361) \[230\] tells us that the association as a whole had to pay for the sacrifices to the goddess: a private person, ἰδιωτής paid a fee of a half-obol in addition to a hide (δέμα) and

---

\[224\] See Sokolowski 1962, no. 20 (ca. 256/5 BC): a regulation of an orgeones the first part of which concerns the lending of money taken care of by the grammateus. Compare with IG X 14 1216 from the Delian Sarapieion A (middle of the 3th cent. BC): The names of those indebted to an association were listed in inscriptions; compare also San Nicolò 1915 (1972), 161.

\[225\] See Burkert 1987, 34.

\[226\] IG II/III 1329 (175/4 BC) is the regulation of the orgeones of the Mother of the Gods in Piraeus expressing the gratitude to Chaireas Dionysios Athmoneas (l. 23) for his contribution and deeds for the benefit of the association which make it possible for the members of the association to have equal share of the rites (in Munychion) in honour of the goddess (ll. 7–15); IG II/III 1325 (185/4 BC), ll. 23–24 honours certain members of the association for spending freely a great number of drachmas to pay the silver and golden decoration of the cult objects (ἀνέκθημα) of Dionysus, the god of these Dionysiastae; IG II/III 1324 (beginning of the 2nd cent. BC), the inscription of the association of Bendis in Piraeus similarly honours its epimeletes Stephanos for philotimia because he contributed to the costs of the pompe in honour of their goddess.

\[227\] See e.g. San Nicolò 1915 (1972), 160–161, 185.

\[228\] A membership fee was known in the phratries, e.g. in IG XII Suppl. 303 from Tenos in the 3rd cent. BC in which a certain phratria regulated that the relatives of the members could be introduced freely to the membership, but those who were born out of wedlock and wanted to become members of the phratría, should pay 27 drachmas (ll. 4–6).

\[229\] See e.g. in IG II/III 1315 (211/210 BC), the decree of the orgeones of the Mother of the Gods in Piraeus regulating this yearly practice (εἰς τὸν ἔννοιαν τὸν ἐκ Διόγημος τῷ οἴκῳ τῶν ἔθους τῇ ἔως τῶν ἐν τῷ κοινῷ, ll. 6–7). IG II/III 1325 (185/4 BC), the inscription of the Piraean thiasos of the Dionysiastae expects its tamias to act as a χορηγός, the one who supplies the costs of the association, and thus makes possible the monthly meetings of the association (ll. 25–26).

\[230\] Commented also by Foucart 1873, p. 189.
portions of meat (lines 4–5). This did not apply to regular members (lines 2–3). Usual costs were covered by the sums which the officials contributed themselves (lines 16–17), but before the great festival of *Bendideia* every *orgeon* paid two drachmas (line 18). The sums paid for the festivities varied from one association to another; for example, of the *Iobacchoi* in Athens at the end of the third century BC (Prött & Ziehen 1906, no. 46, lines 34–39) those who were newly accepted to the register of the *Iobacchoi* (*apographe*) had to make a *sponde*, a drink-offering of wine. The Athenian *eranos* from the year 57/6 BC regulated that the outsiders and visitors (*ἀποδημούντες*), but not the *ἐπιδημούντες*, had to bring to the association an amount of three drachmas for entering into the procession, and if there was a surplus after the festival, it was to be distributed. There are a number of decrees of the associations which state that the association paid a reward of a certain sum to its *philotimoi* for their economic support and *summa homboraria*. The associations were sometimes even able to pay wages (*misthoi*) to the persons who acted for benefit of the association.

It is evident that offerings and sacrifices were an important part of the income of the associations and private support — that of the *philotimoi* together with the offerings and contributions of the members — rose in importance for the economy of the associations. The finances of the associations could amalgamate in the course of time with the public economy of the *polis*. The public administration could also have wanted to take the finances of the particularly wealthy associations under its cloak in order to combine its financial policy more coherently with the finances of the sanctuaries. Concerning the finances of the Egyptian gods in Athens, it must be noted that private financing appears to have been as important method of obtaining an income for the

---

231 Payment had to be left by the officials who functioned for the association before the *Bendideia* which took place on the 18th of *Thargelion* (ll. 17 ff.) and required money and most of all meat. In order to better guarantee the income it was forbidden to sacrifice *παραβόμεα* (l. 7) i.e. outside the altar and without the assistance of a *hieropoios*. See Sokolowski 1954, 154–157.

232 In his commentary on the word *ἰσηλάσιον* (l. 39) and on this practice L. Ziehen 1906, p. 133 refers to Hesychius, s.v. *ἰσηλάσιον* = τήμημα ἔσοδον.

233 IG II/III2 1339, ll. 6–13.

234 IG II/III2 1261 (302/299 BC), the *thiasos* of the Syrian gods in Piraeus pays to the *hieropoios* Stephanus 8 drachmas for *philotimia* and *andragathia* because he had contributed remarkably to the costs of the *pompe* of Adonis (II. 10,15–19,39–40); IG II/III2 1277 (ca. 278/277 BC), the Athenian *thiasos* honours its *epimeletai* for supporting, organizing and carrying out sacrifices and thus pays them a sum of 65 drachmas and a cup made of silver (*εἰς τοὺς ἐπιδεδοκασοὺς παρ᾽ ἐαυτοῖν* ΔΙΑ ΔΡΑΧ. ΑΣ. ΚΑΙ ΠΟΤΗΡΙΟΝ ΑΡΓΥΡΟΥ ΠΟΙΗΜΕΝΟΙ ΠΑΡ᾽ ΕΑΥΤΟΝ ἈΝΕΘΗΚΑΝ ΤΗ ΘΕΩΙ ὈΛΥΜΠΗΙ ΠΑΙΔΙΩΝ ΔΡΑΧ. ΑΣ., ll. 10–14); IG II/III2 1263 (300/299 BC), the regulation of the *thiasos* in Piraeus reminds us that the *thiasotai* should know that *philotimia* is expected from them and that it will be recompensed as soon as possible by silver (money) in the manner of contribution (ll. 29–35) (and in this way the *thiasos* thanks Demetrius for his *philotimia*, ll. 41–42).

235 This is expressed e.g. in IG II/III1 1263 (300/299 BC), a decree of an Athenian *thiasos*; it states that it is decided to give *misthos*-payments to those who have conducted work for the *thiasos* (*δόθω τι τῶν κοινῶν διεξερχώσαι καὶ τῶν διεστελέχει τὰ συνφέροντα πράττεντα ... ὑπὲρ τῶν θυσιαστῶν καὶ κοινὴ ... καὶ ψυφισμένων τῶν θυσιαστῶν μισθὸν αὐτῶν δοθοῦσαι ἐκ τοῦ κοινοῦ*, ll. 12–19).

236 Debord 1982, 206–207, 210. He states that the Romans especially seem to have been willing to impose their rules unto the sacred finances; the opinion is shared by San Nicolo 1915 (1972), 53. In Athens the sanctuary of the Egyptian gods became officially accepted; was it thus incorporated to the public life of the city because of its wealth and popularity?
Athenian Sarapiastai. An inscription of this association from the year 215/14 BC (IG II/III2 1292, lines 20–25) states that those philotimi who had been benefactors of the association were to be crowned for their deeds. The practice was the same on Delos at Sarapieion B which was the meeting place and sanctuary of the thiasotai. Philotimia gave prestige to a private citizen, because he was honoured by an honorary crown and had his name inscribed in marble. All-in-all, there is no doubt that the private financing of the cult-associations, that of Isis among them, was a very important way of supporting all the costs.

A couple of coins belonging to the first century BC bearing the symbol of Isis with the name of a rich magistrate on the reverse have been found in Athens. This magistrate, an important Athenian citizen, was probably involved in the cult-association of Isis, since he wished to display the goddess as his own symbol to the people of Athens. This reveals the importance of the cult and tells us something about its ties with the economic functions of the city.

---

237 Inscriptions IG XI4 1226 (a dedication to Sarapis, Isis and Anubis of a θίασος τῶν Σαραπιαστῶν); 1228 and 1229 (κοινὸν τῶν θιασίτων), all from the Sarapieion B, the end of the 1st cent. BC honouring philotimoi of these associations for goodness and piety.

238 There are inscriptions which bear only the names of the philotimoi of the associations and the honorary formula; see e.g. IG II/III2 2347 (second half of the 4th cent. BC), a Salamian thiasos listing 29 names; IG II/III2 2354 (3rd cent. BC), an Athenian κοινὸν τῶν ἑρανιστῶν listing 23 names; IG II/III2 2357 (3rd cent. BC), a catalogue of a thiasos or eranos in Piraeus listing 37 names of which 21 are women's (there had been more names, but these are unfortunately damaged, like the headline which probably gave the name of an association); IG II/III2 2358 (ca. 150 BC), an Athenian eranos honouring its archieranistes and hierius and listing 91 (readable) names of the members, 22 of whom are women; IG II/III2 2355.

239 125/4 and 107/6 BC a magistrate called Demeas chose Isis as his symbol; at first the standing goddess and then just her head. Thompson 1961, 601–603 and 607. See also Ferguson 1911, 287, 303; Dow 1937, 207.

IV. The Problem of the Mysteries

1. Definition of the Term ‘Mysteries’

The mysteries are regarded as an individual type of religion which flourished during the Hellenistic period and proved very popular among people who sought new and more satisfying religious experiences. The spiritualism of the mysteries seems to fit perfectly with the general view of religion in Hellenistic times, even though there were mysteries before this era, such as the Eleusinian cult. The cults of Demeter and Isis are both described as mystery cults. In this chapter this ‘mystery character’ of them is looked at more closely. The concepts that will be studied in the next chapter, syncretism, individualism, the monotheistic trend and cosmopolitanism, are linked with the problem of the mysteries.

Our knowledge of the mysteries is very uneven in character. Ancient authors talk about them in various contexts, but there is no clear and coherent view of what the concept actually meant in the ancient world. Ancient writers were familiar with the words explaining and illustrating the mysteries, like μυστήριον, τελευτή and δριμα in various connections, and therefore the use of the term ‘mystery religions’ as a pervasive and exclusive name for a closed system is inappropriate. The Greek word mysteria conforms to a well-established type of word to designate festivals that included initiation ceremonies and a cult in which admission and participation depend upon some

---

1 Meyer 1987, 3. A different view is postulated by H. Koester 1982, 202 who claims that mystery religions cannot be distinguished from other religious movements of the time.
2 Burkert 1987, 10.
personal ritual performed by the initiand.\textsuperscript{3} It belongs to the same group with the verb \(\text{μετείνω}\), to initiate into the mysteries with the probable suggestion of closing the eyes and lips (of an initiand).\textsuperscript{4} The word \textit{mysteria} appears for the first time referring to the mystery cults in Heraclitus ca. 500 BC.\textsuperscript{5} Plato used the word metaphorically in the sense of reaching the heart of the matter.\textsuperscript{6} \textit{Mysteria} must be distinguished from 'mystic', because it was only through the complicated development of Neo-Platonic and Christian metaphors (Dionysos the Areiopagite played a remarkable role in this) that the word \textit{μυστικός} acquired the meaning of mysticism.\textsuperscript{7} The concept of 'mystery' with its modern connotations should not be tied to the term 'mystery religions', because there is no common theological ground for doing so.\textsuperscript{8} \textit{Τελεσθαι} and the words of its family overlap with \textit{μετείνω} in designating 'to accomplish', 'to complete', 'to celebrate', 'to perform sacred rites' (\textit{τελείων ἵππα}, 'to initiate' (when used with a personal object and with a god's name in the dative). \textit{Τελεσθή} and \textit{τελεσθαι} mean religious festival or rites, the celebration of mysteries, \textit{τελεστής} a priest who performs such rites, and \textit{τελεστήριον} a place for initiation.\textsuperscript{9} Pausanias usually designated the mystery rites by the word \textit{τελεσθή}\textsuperscript{10}; he only

\begin{itemize}
\item \textsuperscript{3} LSJ, s.v. \textit{μυστήριον} gives the first meaning of the word as secret rite. According to the etymological dictionaries \textit{μύω} means 'to close': Frisk, GeW., s.v. \textit{μύω} \textit{– μυστήριον}; Chantraine, Dict. ét., s.v. \textit{μύω}. \textit{Mysteriasmos} refers to initiation of the mystery cults, especially to those of Demeter and Kore in Eleusis (Burkert 1987, 7–9).
\item \textsuperscript{4} The connection of the verb \textit{μύω} – which actually means 'to close', also 'to fall asleep', referring to the closing of the lips and the eyes – with the religious sense of the word \textit{μυστήριον} gave rise to the verb \textit{μύθω}, 'to initiate into the mysteries' (thence, because of the vow of silence about the secret knowledge gained in the ceremonies); Chantraine, Dict. ét., s.v. \textit{μύω}; Frisk, GeW, s.v. \textit{μύω}; also Meyer 1987, 4.
\item \textsuperscript{5} Chantraine, Dict. ét., s.v. \textit{μύω} \textit{– μυστήριον}; Frisk, GeW, s.v. \textit{μύω}; LSJ, s.v. \textit{μύω}. The philosopher Heraclitus, frg. 14, II. 3–4 (in B. Snell's edition 1983, frg. B14 p. 10–11) uses the word \textit{mysteria}, when describing people called \textit{νυκτιδόλοι}, \textit{μαγοί}, \textit{βάκχοι}, \textit{ληναί} and \textit{μόσται} as people whom he threatens with the things that come after death and claims that they perform the initiation rites accepted among mankind in an impious manner: \textit{τά γὰρ νομίζουσαν κατ' ἄνθρωπως μυστήριε ἄντερωστι μυεύνται}. Reference to Heraclitus as the first user of the word is in Herodotus, 2.51 (in connection with the mysteries in Samothrace); this fragment (no.14) is preserved through Clemens of Alexandria, Protr. 22.2.
\item \textsuperscript{6} In Men. 769} Plato uses the word in its metaphorical sense "to be initiated into the learning of truth or into the mysteries of wisdom", as in Grg. 497c: \textit{τά μεγάλα μερόσημα πρὸς τὰ σμικρὰ}. In Tht. 156a3 he uses the word in a very general sense denoting 'secret'. This kind of use may have allowed the later interpretation of it as 'mystic'.
\item \textsuperscript{7} Bouyer 1981, 45–47. Notice also that the Latin \textit{sacramentum} is equivalent to \textit{μυστήριον} which is an abstract and general term denoting secret rite and secret in general as well (Lampe, Patr. Gr. Lex., s.v. \textit{μυστήριον}). The word \textit{mysterion} is frequently used by the Christian writers as a theological concept which denotes divine, secret purpose or activity, Christian faith as a body of revealed truth, mystical truth, hidden meaning and sacrament of baptism, eucharist and other sacraments of the Church; Lampe, Patr. Gr. Dict. s.v. \textit{μυστήριον}. See also R. Merkelbach 1995, 162 who interprets \textit{mysterion} as an essential part, especially as an opening ceremony, of the rites for the Egyptian gods as well.
\item \textsuperscript{8} Cf. Koester 1982, 202.
\item \textsuperscript{9} In the sense of a rite the word appears e.g. in Aeschyle, Pers. 204; Plato, Phdr. 253c3.
\item \textsuperscript{10} Pausanias 1.2.5 (Eleusis); 1.37.4 (Eleusis); 1.38.3 (Eleusis); 2.12.5 (Corinth); 2.14.1–4 (the mysteries of Demeter in Cceleae, near Corinth); 2.36.7 (Lernaean rites of Demeter); 8.15.1–4 (description of the Eleusian rites as a model for the rites in Mantinea); 9.25.7 (rites of Cabiri); 10.31.11 (remark on the
once uses the word μυστήρια. 11 Ὄργια is a general word for ‘ritual’ and ‘sacrifices’, but it is used in the context of the secret Mysteries of Demeter and Kore at Eleusis or, more frequently, of the rites of Dionysus.12

Clemens of Alexandria, Church Father who wrote in the second and third centuries AD, uses all the above-mentioned words when he speaks about Greek mysteries in his Protreptikos (chapter II). The mysteries he mentions are those of Demeter and Kore, Dionysus, Aphrodite, Cybele and Attis, and Corybantes. 13 “Demeter and Kore have come to be a subject of a mystic act (δράμα μυστικόν)” (Protr. 2.12). In his text,14 in general, mysteries are called τὰ μυστήρια and the word ὀργία usually designates the rites.15 Telete/teleetai is very close to ὀργία, for example, τελεται μυστικαί. 16 Sometimes the closest equivalent for it seems to be ‘ceremony’.17

greatness of the Eleusinian mysteries). To Pausanias telete meant the sacred rites of other cults as well, see e.g. 2.3.4 (τελετή Μητρός in Corinth); 2.26.8 (rites for Asclepius in Epidaurus); 2.30.2 (rites for Hecate); 2.38.3 (rites of the Argives for Hera); 4.34.11 (rites for Apollo); 8.23.4 (rites for Artemis); 8.37.2 and 8 (rites for Δάφνοινα which in this connection designates Kore alone in Arcadia); 10.7.2 (mystery rites of Orpheus); 10.38.7 (rites for Dioscuri in Amphissa); even the ruler of the Roman Emperors in Mantinea was called τελετή by Pausanias: 8.9.8. Demeter and Kore are sometimes called θεοί μεγάλοι by Pausanias and their rites designated by the word τελετή: 4.33.5; 8.29.1 The author tells about the τελετή of the Great Gods (θεοί Μεγάλοι), which is based on the model of the Eleusinian telete, in 4.1.6–9; 4.3.10; 4.26.8 and 8.31.7. It is suggested that by these deities he meant the Cabiri of Samothrace or the Dioscuri, the native deities of Messenia: Frazer 1898 (vol. III), 407–408; the same view is held and the theme studied by B. Müller 1913 in his book Μεγάλοι Θεοί. But note that in Pausanias’ text the expression Theoi Megaloi often seems to be connected with the mystery cults, thus having a specific designation for the gods of the mysteries. In the Messenian inscription SIG 11' 735 (92 BC) the expression θεοί Μεγάλοι (II. 25–26) designates the gods in honour of whom the mystery festival Carnea (Κάρνεα) was celebrated. About ὀργία, the word designating mysteries as well in Pausanias’ text, see n. 12 below.

11 Pausanias uses the word μυστήρια only once, in describing the Orphic mysteries in 9.30.5. (in 10.7.2 he calls these rites mystikai teleetaai).

12 The word δργία is used mostly by the Christian writers for polemic purposes; For pre-Christian ancient writers see e.g. Hymn Hom. Dem. 273, 476; Euripides, Heracl. 613; Aristophanes, Thes. 948; 1151–1152 (rites of Demeter); Herodotus, 5.61.11; Pausanias uses the word 15 times, seven times for the rites of Dionysus (8.6.5, Mantinea; 8.26.2, Heraea; 8.37.5, Arcadian myth of Zeus and Dionysus; 9.20.4, Tanagra; 10.4.3, about Attic and Delphian women celebrating mysteries of Dionysus; 10.6.4, Delphi; 10.33.11, Amphicleia), and seven times for the rites of Demeter (2.14.3., Eleusis; 10.28.3., Thasos; 4.1.5–7 (two mentions); 4.2.6; 4.14.1 and 4.15.7 are references to the Eleusinian rites as a model for the Messenian ones); 9.25.7. (in connection with the mysteries of the Cabiri).

13 Clemens of Alexandria, Protr. 2.13.

14 E.g. ibid. 2.11 (general term); 13 (Demeter); 14 (Corybantes); 15 (Dionysus); 16 (Corybantes); 19 (general).

15 Ibid., 2.11 (mystery rites of Dionysus); 13 (general for the mystery celebrations); 16 (rites of the mysteries of the Eleusinian); 19 (negative: ἀνοργίατος, a rite without sanctity). Clemens also gives his own etymology for ‘orgia’: “It seems to me that the term ‘orgia’ must be derived from the wrath (orge) of Demeter against Zeus.” (2.12).

16 Ibid., 2.11. See also 19; in his Lexicon Hesychius (4th cent. AD), defines ὀργία as τὰ λεπότ. ὀλ. ὁ δὲ τὰ μυστήρια, M. Schmidt’s edition (1867), col. 1140.7; for the verb ὄργιαζεν Hesychius gives the meaning τελειον διονυσον (col. 1140.8) and, interestingly enough, he defines ὄργεν as μοῦσαι, λειοφιάναι and λειεῖν (col. 1140.4).

17 As e.g. in Plutarch’s text. See Mor. 5.417b–d.
Ancient authors regarded mysteries as a separate group of religious practices, separate from the cults belonging to the Homeric–Hesiodean pantheon. In a tone of philosophical speculation Plutarch explains, by referring to Plato and Aristotle, that there is a certain kind of philosophy which may be called ‘epoptic’ (from *epopteia*). It means the primary (πρῶτος), simple (ἀπλός) and immaterial (ἀνυλός) stage in which one may grasp pure truth (καθαρὰ ἄληθεια) after one has passed beyond conjectural and confused matters. By this principle the whole of philosophy is fulfilled. This approaches what we today would understood to be mysticism, namely special kinds of subjective experiences which strive beyond conceptualisations and reasoning. But Plutarch was a religious expert, and, thus, in the sense of religious duties concerning the mysteries, he explains that, “Regarding the mysteries (τὰ μυστήρια), in which it is possible to gain the clearest reflections and adumbrations of the truth about the demigods (δαιμόνια), let my lips be piously sealed, (as Herodotus says)” (Mor. 5.417b–c). Words attributed to Aristotle tell us that, “At the final stage of the mysteries (ἐποπτεία) there should be no more learning (μάθημα), but experiencing (παθεῖν) and a change in the state of mind (διαταλάθη)” (frg. 15). The same kind of content is to be seen in the statements of W. Burkert and U. Bianchi, two of the most important scholars who have studied the mystery religions: “Mysteries were initiation rituals of a voluntary, personal and sacred character that aimed at a change of mind through experience of the sacred”. Many scholars besides these two have tried to construct a view of the contents of the whole complex of mystery cults. The examples given in this study are mainly from the cults of Demeter and Isis.

2. Aspects of the Mysteries

The Eleusinian cult has been used by scholars as a model by which to define the mysteries of antiquity in general. For example, U. Bianchi gives the following definition:

---

18 Plutarch, Mor. 5.382d–e.
19 Pyysiäinen 1993, 25. This could be compared with the so-called pure consciousness event (PCE), the contentless state of consciousness in which there occurs no change, and in which all previous expectations are confounded and transcended. PCE is striven for and experienced in various religious traditions, most clearly in Buddhism. See ibid. 46, 99–101.
20 Aristotle, frg. 15 = Synesius, Dion 8.48a. The reference to this is in Plutarch’s Mor. 5.382d–e. See also Clemens of Alexandria, Strom. 5.71.1. Notice that Aristotle moves in the sphere of philosophy here in order to make the highest understanding of it analogous to the *epopteia*, the final stage of the mysteries.
21 From Burkert 1987, 11; The same already in Bianchi 1976, 1–8 and 1980, 11. U. Bianchi’s ‘mystic’ (místico) means ‘experience of difference’ between gods, world and self and it is distinguished from ‘mystery’ (misterico) defined as above and from ‘mysteriosophy’ (misteriosofico) which refers to the speculative constructions of Orphism.
Taking our point of reference we may define this typical phenomenon of Greek spirit as follows: a mythical-ritual complex implying an annual festival not without connection with the theme of seasonal fertility and the welfare of the city, but including very prominently the individual initiation of groups of citizens; and later on of men and women from all over the Greek and Hellenistic-Roman world. This initiation – protected by secrecy – conferred special personal privileges already in their life, but particularly in their afterlife. 23

The Eleusinian cult is a frame of reference and has an important position in research literature, but there are still some aspects of the mysteries which do not fit the Eleusinian picture all that well. Usually the Oriental element in one form or another, but not per definitionem, belongs to the mysteries. This view was founded by R. Reitzenstein in his work of 1910 which examined mysteries as Hellenistic religions; Hellenism for him being “Oriental spirituality in a Hellenized form”. 24 The Oriental influence is especially clear in the cases of well-known mysteries such as those of Cybele and Attis, both of whom came from Asia Minor, as well as Dionysus and Mithra. In this respect the Eleusinian mysteries, together with the Orphic ones, were especially Greek in character. 25 The Oriental element in the Eleusinian mysteries was brought by Dionysus. 26 He appears in the Eleusinian iconography in Classical times, but his role increased in importance during the Hellenistic era, when he had additional, separate popular mysteries of his own. It is worth remembering, however, that the important mysteries of the Egyptian gods were not strictly Oriental in origin, if the Orient is understood as being mainly Asia Minor. Thus, it would be preferable to say that the mysteries included foreign elements which were understood in Greece according to local needs and made to fit the cultural context. 27 W. Burkert states that the mysteries seem to reflect the older model of Eleusis or Dionysus, or both. 28 In this way we might say that the mysteries of Hellenistic times, including foreign elements, went through the process of interpretatio Graeca.

The myths of the mystery cults were aetiological to the cult practices. Myths made the cults intelligible and brought the mythical and meaningful past in touch with the present situation. Myths tend to give an explanatory content to rites. They give reasons for

23 Bianchi 1976, 4; see also Burkert 1978, 2; Koester 1982, 176: “For the development of the Greek and Hellenistic concept of the ‘Mysteries’ the Demetrian cult in Eleusis was the most significant.”
24 Reitzenstein 1910, 9.
25 The roots of the Eleusinian cult were located in the Minoan-Mycenaean world. See p. 30 n. 45. But it is not possible to say that the Eleusinian cult was a successor to or survivor of Minoan-Mycenaean tradition, because both cultural areas were independent, having their own characteristics which were connected to local historical and even ecological conditions. Only some indications of continuity may be searched for.
26 Dionysus appears often among the Eleusian gods in the Eleusinian iconography. See Bianchi 1976, pictures 2, 5 (4th cent. BC), 6 and 7 (4th cent. BC), 8 (3rd cent. BC), 17, 18 (describing Dionysus–Bacchus and Demeter from Roman times). See also Prumm 1967, 154 (L.H. Prumm argues for the very ancient origin of Dionysus’ role in the mysteries, because his name has been found in Cretan-Mycenaean linear B tablets.) Note that in the plays of Aristophanes, Dionysus appears in connection with the Eleusinian cult scene as one who encounters the initiants who continue to celebrate the Mysteries by dancing and singing together in the Iacchus procession in the realm of Hades; see Ran. 311–459.
28 Burkert 1987, 2, who follows the view of Wilamowitz-Moellendorff 1932, 368–387.
traditionally learned practices. In the mysteries, and especially in the rites experienced personally, mythical and atemporal time was made actual. These experiences widened the temporal horizons of the participants, giving their existence a religious meaning and explanation. Localized aetiological myths are the point at which worship and mythology intersect, and thus the myth reveals something of what local people thought about the deity, ritual or cult.\textsuperscript{29} In these myths there is usually a divine couple of dissimilar rank, but linked to each other in some kind of genealogical way. Usually this dualistic dichotomy of the gods is manifested in a relationship between a man and woman (Attis – Cybele), a man and wife (Osiris – Isis) or more rarely, as in Eleusis, as a mother and daughter (Demeter – Kore). In the central position there is a feminine deity who brings life and fertility through the destruction and subsequent rebirth of her counterpart. K. Prumm describes this as "basic vegetation duality.\textsuperscript{30} In an agrarian culture this was clearly linked to the cycle of the year, the temporal concept of which was different from the cycles of human life, i.e. the polarity between the fertile period (spring and summer) and the barren one (autumn and winter).

The fertility aspect is one of the unifying principles belonging to all the mysteries.\textsuperscript{31} Fertility of the land guaranteed continuity of human kind. In the mythico-ritual complex a possibility of birth (and rebirth in the afterlife) presupposes death as a prerequisite of birth and new life, emphasizing the chthonic aspect of the mystery gods; very clearly so in the case of Demeter.\textsuperscript{32} Nevertheless, the Eleusinian cult was never only a 'salvation mystery cult', as, for example, Orphic-type mysteries (as a branch of the Dionysiac ones), Mithraism or even those of Isis in the Roman world. The place of fertility and mythical femininity suggests a sexual aspect which could have been expressed in the forms of ecstatic rituals or phallocentrism in the mysteries, as in the cases of Dionysus and Cybele. On the other hand, this could lead to sexual abstinence, which is the other side of the same coin. The Eleusinian and Egyptian mysteries lacked such a strong emphasis, though sexual symbolism was implicitly involved in these cults as well. But sexuality in the mystery cults, for example sexual union, may rather have been a symbolic expression of the union between man and god.\textsuperscript{33} The feminine basis of the myths was not enlarged to the cultic level which would have led to the sexes being separated systematically. The mysteries of Dionysus and Cybele were mainly directed towards women, Mithraism and Orphism towards men, and those of the Eleusinian and Egyptian gods were open to both sexes.

Secrecy is one of the common and very important, probably the most important, characteristics of the mysteries. It had a great deal to do with questions concerning death and after-life, because an individual who became initiated into the mysteries sought emotional or cognitive satisfaction in religious matters dealing with his personal questions regarding life and death. Mysteries could give some personal answers but only in the

\begin{itemize}
  \item \textsuperscript{29} Mikalson 1991, 4.
  \item \textsuperscript{30} Prumm 1967, 155.
  \item \textsuperscript{31} See e.g. Lavedan 1931, 681; Prumm 1967, 155; Bianchi 1976, 4–5.
  \item \textsuperscript{32} The Eleusinian cult has been interpreted from the feminist point of view so that its significance is focused on three interrelated dimensions of life, mainly on women’s life: 1) fertility and birth (that of earth and human’s), 2) sexuality and marriage (mythical allegories and practices), 3) death and rebirth. Keller 1988, 30–31.
  \item \textsuperscript{33} Nilsson 1946 (1984), 175.
\end{itemize}
name of secrecy. But what is not clear — because of this well-kept secrecy — is what kinds of solutions were given. Secrecy also had another function; namely, a social coherence which was needed in a situation where people kept strictly to the ancient forms of worship and their meanings were only explained by the myth. The secret formed a gradual psychological framework for social coherence in differing situations. It was supra-individual and kept the appeal of the practices alive. Secrecy was important also for the individual because the rituals offered an area of participation in the religious rites on a very personal level, but they were at the same time socially shared. Thus the secrecy had social, individual, cognitional and emotionally-affective meanings.

3. The Mysteries in Athens During the Early Hellenistic Period and a Comparison to Those of Rome in the Third Century AD

A. Significance of the Mysteries in Athens to the Individual and to the City

A.1. The Eleusinian Cult

It has been shown in Chapter III that the Great Mysteries of Demeter were important for the identity and self-respect of Athens also in Hellenistic times. There were all the elements that are characteristic of a public cult: proclamations, offerings, and processions. In the literature dealing with the mysteries, however, the individualistic element in the cult has been stressed strongly; the cult of Demeter among other mysteries has become a kind of contrast to the formal city-cults, because it is seen to have given to the individual an opportunity to act as a responsible individual. Thus the mysteries have become one of the most important characterizations of the individualism of the time in religious matters. An individual is seen as one who seeks answers to his personal questions, which deal mainly with life and death. The wish to conquer the finality of death and to gain an after-life is in this connection regarded as a new characteristic of individual religion in Hellenistic times. But have not these questions always been central when we speak about religion, because death is the final point that marks certain boundaries in human life? This is why the problem of death has often become sacralised in the world's religions and put into the sphere of 'religion'. In general religion deals with questions of this sort; solutions may be more individually or more socially oriented. Thus for centuries the cult of Demeter also dealt with emotionally individualistic motives of this kind. Yet it cannot be denied that the cult of Eleusis satisfied some sincere and deep human longings that had not been satisfied so explicitly by the other cults of the polis. But evidence in this cult of a belief in resurrection symbolism as it is understood in Christianity, is uncompelling. Even though

34 Prumm 1967, 156.
35 As examples see Hymn Hom. Dem., 478–483; Sophocles, frg. 719: "Happy is he who having seen these rites goes below the hollow earth; for he knows the end of life and he knows its god-sent beginning" (translation R. Carden 1974).
there was a clear notion of death and after-life in the Mysteries, the concept of rebirth in a Christian sense was really not explicit.36

Individualism in the cult may be understood as obtaining knowledge of a commonly shared secret, and keeping that secret was everyone's personal duty. This created an internal coherence among the initiated individuals, even though they did not form themselves into any kind of religious associations, thiasoi. Having gone through the sacred rites one was not obliged to follow a certain kind of life-style or to obey certain rules, not even to return to the sanctuary to worship or give offerings to the goddesses. Thus he experienced the rites individually without any social obligations. There was no socially determined core outside of the genos of the Eumolpidai and the Kerykes around which religious institutions could have arisen to keep up the tradition: officials were in contact with the life cycles of the city-state, and the most important happening of the Eleusinian cult, the Great Mysteries, was organized by both secular institutions and secular personnel of the city-state. Even religious writings were not hieroi logoi in the strict sense, because there was no priestly organization to control such logoi.37

One more matter must be dealt with here, namely the practice of purification in the cult of Demeter, because it largely constituted the Mysteries as a 'mystery religion'. Even the duties of most of the lesser officials of the Eleusinian cult were connected with purifying sacred things, places or persons.38 In the Greek language the idea of religious purity, implying moral purity as well, is signified by the term hagnos (ἁγνός) and when connected with the quality of a deity it is close to or equivalent of katharsios (one who purifies being pure him/herself).39 In Christian symbolism the concept hagnos implies also purity manifested in virginity and maternity; but this symbolism is familiar to the Eleusinian Mysteries equally well because the concept of purity can be noticed in the mythology of the Mysteries, in the epithets of the two goddesses 40 and on many occasions

---

36 Burkert 1987, 23–24.
37 This logos could be understood as belonging to the both part of the Mysteries: in them (inside-tradition) and about them (outside-tradition). Myths must be counted in both groups, because they may have been parts of the rituals, for example, recitations, or common traditions about the rituals in legitimating them or giving 'religious' history to the rites (the aetiological function of the myth). Hieroi logoi of Isis appear later, during Roman times; see p. 77.
38 The phaitryntes/phaidyntes was the one who cleansed the statues of the gods, the hydranoi cleansed the initiants by pouring water over them, and the neokoros (who does not appear until the Roman period in the cult of the Egyptian gods) took care of the cleanliness and purity of the sanctuary. In his lexicon Hesychius calls hydranos the purifier of the Eleusinian rites (ἁγνιστὴς τῶν Ἑλευσινίων), col. 1486 in Schmidt's edition (1867). See Clinton 1974, 95, 98.
39 According to A. Motte 1986, 140–141; 144–145; 147–149 hagnos says more than katharos, p. 147: "hagnos associe bien au départ l'idée de pureté à celle de sacré, de sainteté. C'est une notion de pureté non pas abstraite, mais vitale ... elle est liée à une appréhension mythopoétique du principe féminin de la vie". Hagnos implies the meanings of holy and sacred, while katharos has a direct reference to a deity and his/her ability to purify his/her adherents; it also includes cleanliness in a moral sense: "with clean hands" (LSJ, s.v. ἁγνός; καθαρός). The term ψαρμακός refers to one sacrificed or executed as an atonement or purification for others (LSJ, s.v. ἁγνός; καθαρός). In the meaning of 'scapegoat' it appears, e.g. in Aristoph., Ran. 733.
40 Deities qualified by hagnos are usually feminine, most usually Demeter and Kore, often Artemis; see Motte 1986, 144–145; 162. In the Homeric hymn to Demeter occurs as πόνυε ἁγνή (203) and Persephone as ἁγνή (337); see also Pausanias 4.33.4: Hagne is a title of Kore; and Aristophanes’
in their rites. Even the proclamation of invitation emphasised the purity of the initiants, and the rites of elasis, krokosis and prohibitions of the mysteriotides in general were closely connected with the purpose of purification. Krokos was a social purificatory rite, and the two others more individually oriented. Sea-water was seen as purifying as well as the blood of the piglets which were offered to Demeter. What is important is that in the official religion which did not emphasize the role of an individual as much as did the Mysteries, the quest for purity played only a minor role. Purification rites in the other state-cults could have been included in the preparations, but were never the purpose nor the end for which to strive. In this sense the Mysteries of Demeter transcended the nature of the official cults. The cult’s purpose was cleansing defilement, which manifested itself in real material objects such as blood and dirt, so that purification was effected through physical operations involving washing the body, letting the blood of a piglet flow out, and fasting.

call to join Demeter and Iacchus in dance, Ran. 335: χαρίτων πλείστον ἔχουσαν μέρος, ἀγνήν, δόσοις ἄμα μόνοντο χρείαν.

41 G.E. Mylonas 1961, 248 suggests that those initiants who were accepted to take part in the Mystery rites probably had the right in Athens, before the rites, to enter into the precinct of the Eleusinion where the hiera were kept, after washing their hands with lustral water kept in the basin by the door.

42 Elasis took place on the 17th of Boedromion, the 3rd day of the Mysteries. Then all the mystai went to the coast (piraeus) from Athens to bathe in the sea. On the same occasion each of them offered a piglet to Demeter and carried it back to Athens as a personal offering. See e.g. Polyaeus, Strat. 3.11.2 and IG II/II2 847 (215/14 BC) which records that the procession of elasis was organized by the officials of Athens.

43 This rite took place during the great procession from Athens to Eleusis. The members of the legendary genos of the Krokidai (Pausanias 1.38.2) tied a yellow ribbon around the right arm and left leg of each initiand. Most probably this was to ward off evil and thus purify the initiand. See discussion of this matter in Deubner 1932, 77; Mylonas 1961, 256; Parke 1977, 66. But after krokosis at the bridge which crossed the river Cephisus (Pausanias 1.37.3–4; 1.38.5), a rite which clearly had a wider purificatory meaning took place; namely, the permission for men sitting on the bridge with their heads covered to shout insults at important and well-known citizens participating in the procession; see Athenaeus, 13.590e–f. This act offered a moment of compensation by breaking every-day rules of social and political politeness and presented an opportunity in an exceptional situation and under its ‘sacred’ veil to say things usually kept silent. This was social purification. See Mylonas 1961, 256; Parke 1977, 66.

44 In the name of purity it was prohibited for an initiate to eat beans, eggs, the meat of a cock, fish or to drink wine following the model of Demeter’s fast which was due to her grief (Hymn Hom. Dem., 201). Since “it was not lawful for her [Demeter] to drink red wine, she bade them [king and queen of Eleusis] to mix meal and water with soft mint” (ibid. 271).

45 See e.g. Euripides, IT 1993 and Plutarch, Mor. 6.263e: τὸ πῦρ καθαφεῖ καὶ τὸ ὥτωρ ἁγνιζεὶ. Plutarch explains furthermore that fire and water are recognized as elements of the first principles, fire masculine and water feminine.

46 The sanctuary was probably cleansed by the blood of the pigs: IG II/II2 1672 (329/8 BC) from Eleusis is a long inscription listing all the costs of the sanctuary during the year; in ll. 126–128 it states that wages (misthos) of 2 drachmas is paid to the cleaner (whose name is missing), and that two young pigs for cleansing the Eleusinian sanctuary were bought (χοίροι δύο καθήρεται τὸ ἱερὸν τὸ Ἑλευσινικόν, ll. 126–7).

A.2. Cult of Isis

As in the case of Demeter, it is hard to say whether individual distinction prevailed over the group-identity of the adherents of Isis, because the individualistic appeal lived hand-in-hand with the social functions of the religious associations. Openness was the characterizing aspect of the thiasos of Egyptian gods in Athens, and thus there was no shared secrecy in this cult that would have made the association clearly one of the mystery-type. I am inclined to think that thiasoi of this time differed noticeably from the mysteries proper precisely because of this lack of secrecy, which would have been socially determined. The same applies to the clubs or trade guilds. Nevertheless, it is true that there were similarities between the mysteries and thiasoi: they were intended to provide an individual with a deeper level of religious experience, probably through a more mysterious aura. The analogy lies in individualism, cosmopolitanism and communal life.48

As in the case of the Eleusinian Mysteries, the cult of Isis dealt with the questions of death, but it was not a central concern in the thiasos of Egyptian gods in Athens; the thiasos had far too many social and economic functions. The symbolic experience of death might have been a part of the rituals, but it was not identical with the attainment of immortality: every-day life of a member of a thiasos was in this life, and becoming a member did not presuppose any radical abandonments or changes in this life. Being a member of a thiasos and contributing economically to its costs guaranteed a funeral and burial place, something which was important to everyone. In this way the existence of may be defined as such only in later times, during the Roman Imperial period.49

The official status which the thiasos of Isis gained in Athens is an important factor that points out Isis' non-mystery character in early Hellenistic Athens. There is equivalence for this on Delos where a difference between the two Sarapieia prevailed. Sarapieion A (established in the second part of the third century BC) was the first one, and it maintained its Egyptian character during the Athenian occupation, but Sarapieion C (established before the year 215 BC) was in the hands of the Athenian officials and thus its rites were much more 'Greek' in character. It was a representative of Athenian official power on the

---

48 F. Poland 1909 (1967), 36 underlines the meaning of the contrasts which the associations offered to people as regards the state cults.

49 See Poland 1909 (1967), 37–38. E.g. τὸ κοινὸν τῶν μυστῶν in the inscription IG IV 659 (Argos, 2nd cent. AD), l. 5. The term thiasos is rarely used in the inscriptions concerning the 'mystery associations'. Mystery-associations are found in Smyrna of the period of the Emperor Antoninus Pius (138–161) in the inscriptions Poland 1909, nos. B354a–b: σύνοδος τῶν τῆς Θεοῦ μυστῶν; Poland 1909, no. B353 (II. 1–3): σύνοδος τῶν μυστῶν τῆς μεγάλης Θεᾶς πρὸ πόλεως θεομοφόρου Δήμητρος; in Ephesus of the same period there was an association, Poland 1909, no. B326, which stated (II. 3–5): οἱ πρὸ πόλεως Δημητριακεῖς καὶ Διονύσου μυσταί. But during the last centuries BC there were no associations of this kind; their emergence is connected with the process of syncretism; see Chapters IV.4 and V.1.

50 Roussei 1916a, 250–251.
island. Sarapieion C was under Athenian official supervision and its religious officials and priests were chosen annually by lot in Athens in the same manner as in the cult association in Athens itself. They were Athenian citizens; and thus in Sarapieion C there were no Egyptian religious functionaries, who would have been the connoisseurs of the rites, supporters and teachers of sacred tradition. 51 Sarapieion A was different because there the post of the priest was hereditary and based on the Egyptian origin. The first priest of Sarapis was a certain Apollonius, a Greek from Egypt, who brought Sarapis to Delos from Memphis following an order given to him by the god in a dream. The second priest was Demetrius, a Greek from Egypt as well, and the father of the third, also Apollonius, who tells the story of the foundation in an inscription found in Sarapieion A. 52 In this sanctuary the practices and the rituals of the cult were much less ‘hellenized’ than those of Sarapieion C: there are stories about miraculous healings, 53 nocturnal visits of the gods, 54 descriptions of water rites 55 which are lacking from Sarapieion C. In these Egyptian rites the purifactory functions of the gods are apparent. The theme of purification was not so explicit in the Athenian cult of Isis (nor to the ‘Greek’ cult of Isis and Sarapis in Sarapieion C), because it was an official cult without clear affinities to the mysteries.

B. Comparison: the Mysteries of Isis in Rome in the Third Century AD

The situation was somewhat different later. The cult of Isis developed into a mystery cult, as it may be called, during Roman times. In Rome itself its mystery character was very evident. This is seen most clearly in the Metamorphoses of Apuleius of Madauros written in Rome in the middle of the third century AD. Apuleius’ story, fictional in character, but at least to some degree autobiographical, is about a man called Lucius who, bewitched, wanders the Roman world in the form of an ass. He sees many kinds of religious cults, mysteries among them, and finally finds his destiny and salvation (beneficia et fata, 275.12–13), the Most High Isis 56, who appears to Lucius in a dream telling him

---

51 Ferguson 1911, 361, 385; Roussel 1916a, 122–127; Dow 1937, 206; Dunand 1973, 103–105. Inscription ID 2610 (= Roussel 1916a, no. 73, pp. 122–125) is a list of the priests of Sarapieion C (35 names, demos-name included, are preserved, but the beginning of the inscription is damaged). The priests belong to the period between 137–109 BC, but probably the inscription was a complete list of all the priests after the year 166 BC; see also Roussel 1916a, 259.

52 See p. 50, esp. n. 157.

53 IG X14 1299 (the ‘Chronicle’) which clearly expresses this.

54 Roussel 1916a, 74–79.

55 In Sarapieion A there was a water crypt with an inflow pipe which was connected to the collection tank situated about 11 meters east of the temple, thus possibly designed to imitate on a small scale the Ptolemaic Nilometers of Egypt and thus maintaining ties with Egypt. In Sarapieion B a similar kind of crypt was found, but without any sign of an inflow pipe or drain. But in Sarapieion C no such structure has been found within its precinct. See the descriptions of these constructions in Wild, 1981, 34–39. But note that such an interpretation which connects inflow pipes with Egyptian nilometers should not be accepted without doubts. See also Merkelbach 1995, 150–153.

56 Isis’ omnipotence is well expressed in the words said to Lucius by the goddess herself: “I who am the mother of the universe, the mistress of all the elements, the first offspring of time, the highest of deities, the Queen of death, foremost of heavenly beings, the single form that fuses all the gods and
the secret of how to save himself and giving him commands (*imperiis sacris* 270.4–5; 281.4). Lucius becomes initiated (*initiatus* 273.14–15; 279.13) into the Mysteries of Isis, follows the strict rules of the cult and the priesthood (*ministerium* 281.1–2; 283.17), abandons all his property, and even sells his clothes (289.15–19). In the end he is raised to the status of being able to be initiated into the Mysteries of Osiris, the supreme father of the gods, the unconquered One (*magnus deus deumque, summus parentis invictus Osiris* 288.7–8) and becoming a member of the priesthood of the god, one of the *pastophori* (288.19).

Here the essential elements important to the mystery-cult are apparent. Mysteries are called by Apuleius *religionis secreta* or *sacra* and the rites of the mysteries are *ritus* or *teletae*. This reveals that secrecy was the most important feature of the cult; it largely defined the cult. It was expected that the one who wished to be initiated would follow certain rules of chastity and abstinence (281.7–8; 285.1), follow a certain life style ordered by the god, for example, being obliged to shave his head (291.13–14), to

---

57. Lucius tells that to serve of the faith was arduous and that, the rules of chastity and abstention were extremely hard (*sedulo percontaveram difficile religionis obsequium et castimoniorum abstineniam satis arduam cutoque circumscriptu vitam quae multis casibus subiacet, esse muniendam*), Apuleius, *Met.* 281.7–8.

58. About the *pastophori* see R. Merkelbach 1995, 122–123 who calls them *clerus minor* of the cult of the Egyptian gods in Egypt. He also regards that the *pastophori* had a remarkable role in spreading the cult from Egypt to Greece and Italy. According to Apuleius, *Met.* 279.15–17 in Rome there were the whole *collegium of pastophori* of Isis and Osiris.

59. See e.g. Apuleius, *Met.* 266.14; 289.9; 290.6; 291.1.

60. *Ibid.*, e.g. 267.15; 269.14.

61. *Ibid.*, e.g. 284.17; 288.3; 288.9; 290.6; 291.1. Once he uses the word *orgia* (289.23), but in the sense of 'nightly ecstasy' caused by the supreme god (see translation by J.G. Griffiths 1975, 107).

62. Plutarch, Mor. 5.351f–352a states that the *mystai* abstained from the lust of the flesh (the pleasures of Aphroditus) and curtailed licentiousness (σωφρονὶ μὲν ἐνδελεχῶς διατή καὶ βρομάτων πολλῶν καὶ ἀφροδισίων ἀποχαί κολουσόπτης). Herodotus, 2.64 explains that the Egyptians were the first to make it a religious observance to wash themselves after having had sexual intercourse before entering a temple. According to him the Greeks followed this rule.

63. Apuleius says that he had to abstain from unhallowed and unlawful food so that he might better make the journey to the hidden mysteries of the purest faith (283.11–14) and specifies that during the ten days before initiation it was forbidden to eat animal flesh or drink wine (284.25; 289.20). Plutarch, Mor. 5.251f explains that the initiated followed a strict regimen and abstinence from many kinds of foods, and states (352f) that the priests eschew most legumes, mutton and pork, use no salt (because it increases appetite), nor fish (353c–e) nor onion (353f). For the use of wine he says that the clergy either use wine in great moderation or abstain completely from it periodically. Herodotus, 2.38 tells that for the Egyptian clergy sacred food is cooked, and that fish and beans were considered impure. See also Dunand 1973, 175–176. The Delian inscription from *Sarapieion C*, IG XI4 1300 (middle of the 2nd cent. BC) denies entry into the sanctuary to those who had drunk wine.

64. Herodotus, 2.36 and 37 says that in Egypt priests are shaved; they shave the whole body every other day. Plutarch Mor. 5.352c–e explains that a priest of Isis shaves his head as a sign of mourning (*ξυρείοθαι τὰς κεφαλὰς διὰ τὸ πένθος*). See Malaise 1986, 83 and Merkelbach 1995, 161.
observe a vegetarian diet (289.20–21; 290.26), to wear special linen vestments\(^65\) (273.15), and to live in poverty (289.16–19). He had to devote his entire life to the goddess. Isis says to Lucius (270.20–22):

> “But especially remember and ever hold enshrined deep in your heart that the remaining course of your life, even to the limit of your last breath, is dedicated to me” (270.20–22).\(^66\)

This reveals a completely different attitude in religious matters and to piety than that which prevailed in Athens in the third and the second centuries BC. The sequence to this was that in Rome there was a group of religious specialists who formed a social class of their own, which may be called a priesthood in the more modern sense of the word.\(^67\) This group took care of the sacred writings (\textit{liber de litteris} 279.17; 284.13) as well. These writings were regarded as holy, and were observed by the special authority of religious specialists. The existence of these \textit{hieroi logos} in the Isiac cult before the Roman era can not be proved.\(^68\) This shows that the tradition was already well-established in Rome at the time of Apuleius.

In the mystery cult of Isis as described by Apuleius purification held an important position and included a rich symbolism. Apuleius had to go through bathing rites escorted by the faithful before becoming initiated, and had to have prayers said on his behalf asking for the forgiveness of the gods, and he had to be cleansed completely by an older priest.\(^69\) Apuleius also describes a certain rite performed in honour of Isis in which the ships dedicated to Isis were purified on the sea-shore with a torch, an egg and sulphur so well

\(^65\) Linen, especially white linen, was regarded as a pure material, flax being the material which springs from the earth which in turn is immortal; it yields edible seeds and supplies a plain and clean clothing; Plutarch, Mor. 5.352c–d;f; Herodotus, 2.37 underlines purity also in telling about the use of linen garments ("they [the Egyptians] set cleanliness above seemliness"). See Dunand 1973, 102; Griffiths 1975, 526; Baslez 1977, 218–219; Malaise 1986, 81. In Delos there were inscriptions giving regulations concerning the clothes of the priests of the Egyptian gods in \textit{Sarapieion} A: ID 2180 (= Museum of Delos, inv.no A3033 and A3029) from the middle of the 2nd cent. BC. M. Malaise 1986, 86 notices that linen clothes for the priests of Isis are not attested outside Egypt before Roman times when the cult became 'Egyptianized'. See also Dunand 1973, 49.

\(^66\) Translation J.G. Griffiths 1975. See also Apuleius, Met. 277.20–24. It is seen that in this cult of Isis there was a personal \textit{vocatio} causing \textit{dignatio} (honourable position). This kind of \textit{vocatio} is seen also in the Megalopolitan inscription IG V2 472 (2nd or 3rd cent. AD) in which Isis' follower Dionysia is called upon and became her servant (\textit{lάtρης}, II. 6 and 8; \textit{πρόστολος}, I. 9). Dunand 1973, 164–165; Malaise 1981, 484. About the oaths of faithfulness given to the Egyptian gods see Merkelbach 1995, 170–171. The papyri from the first cent. AD Pack\(^2\) 2472 (= Totti, no. 8) is this kind of an oath to Sarapis (I. 7) spoken by an initiand (with his \textit{synumystai}, I. 9–10). For the text, translation and the commentary see Cumont 1933, 150–160, see also Nilsson 1950, 695.

\(^67\) Of the devotees Apuleius uses the words \textit{collegium}, \textit{cultores}, \textit{sacrorum consilium} (Met. 287.25; 288.11), and the priest are \textit{sacerdotes} (ibid., 279.11; 283.15).

\(^68\) Of the devotees Apuleius uses the words \textit{collegium}, \textit{cultores}, \textit{sacrorum consilium} (Met. 287.25; 288.11), and the priest are \textit{sacerdotes} (ibid., 279.11; 283.15).

\(^69\) Apuleius, Met. 284.20–21 (\textit{lavacro traditum, praefatus deum veniam, purissime circumrorans abluit}).
that "it was purity itself" (278.11–17). The intention of becoming initiated included the
notion of becoming pure so that a person simultaneously went through a process in which
he could be purified from the deeds of his former life: Lucius even tells the whole story of
his anxiety to purify himself (protinus purificandi) (266.22).

The conception of death and after life was more explicit in the Roman Mysteries of Isis
than it had been in Athens before Roman times. Isis says to Luclus that, "I alone have
power to prolong your life beyond the span determined by your destiny" (271.5–6), and
when Lucius is initiated he remains silent in the name of secrecy, but, nevertheless,
reveals how in the ceremony he "approached the boundary of death and treading on
Proserpine's threshold, was carried through all the elements, after which returned." (285.11–12). This may be understood as a symbolic statement, too, but as such it suggests
that the symbolism of death signifies at the very least a new life which is radically
different from the present one; the old life is thrown away and a new one begins in the
divine service of the goddess. An initiant becomes renatus (278.9 and 283.9), the one
whose old life has come to an end and the new one begins on the holy birthday of the
initiation (natalis sacrorum 286.6–7). A symbolic experience of this sort is purifying as
well. It may be noted here that besides the merely symbolic expressions concerning death
we may account, for example, the so called cista mystica of the Isiac cult. Apuleius refers
to it by the name vasculum (274.10–12). The evidence for cista comes only from the
Roman period. Cista is to be regarded as 'mystery' or 'canopic' jar used originally in
Egyptian religious tradition in funerary processions and later in the Isiac and Osirian cultic
context.

4. Emergence of the Mysteries of Isis in Greece

As we have seen above, during early Hellenistic times there were no mysteries of Isis
in Greece in the strict sense of the word. They emerged later, during the Roman times, and
were to be found then in mainland Greece as well. It is necessary to ask when the cult of
Isis in Greece might be called a mystery cult.

70 See Griffiths 1975, 51–55; 258–259 (comments on renatus); 317 (on natalis sacrorum). See also
71 H. Van Voss 1979, 23–26 presents the archaeological evidence for the cista of the Isiac cult
(monuments: three-dimensional representations, reliefs on altars and gravestones, reliefs on
sarcophagi, frescos and carvings on vases).
72 Van Voss 1979, 24. See the interpretation of N. Genaille 1983, 300–305, on cistae. She shares the
opinion of Van Voss 1979, 23–26 thus regarding the cista as an emblem of the divinities or of the
devotees who wished to identify themselves with the gods. According to her cistae were used in the
ritual processions. These authors reject the interpretation of R.A. Wild 1981, 54–63 who regarded
them as objects containing sacred water which was believed to come from Nile itself. It is noteworthy
that the Athenian funerary stelai on which these cistae are described as an attribute of a devotee of
Isis, are also from the Roman epoch: of 22 reliefs illustrating women dressed in the typical 'Isiac'
costume and listed by Dunand 1973, 145–148, 15 demonstrate also the cista. Dunand's list is based
on A. Conze's (1893, 54–59) catalogue, nos. 1954–1972 ("Isisdienerinnen"). Conze's no. 1868 is also
clearly a funerary stele of the same genre. From Delos there is no evidence of cistae.
We may get some light on this question by examining the so-called aretalogies of Isis which were written during the first century BC and the first century AD. There are five epigraphical aretalogies.\(^73\) It might also be appropriate to call them hymns or eulogies. They are to be divided roughly into three sections by their contents: introductory section gives the names of Isis, the second section tells the universal omnipotence of the goddess, and the third deals with her specific deeds, discoveries and miracles.\(^74\) In the aretalogies of Cyme and Thessalonica from the end of the first century AD, Isis says: “I revealed mysteries unto men” (ἐγὼ μηνοεὶς ἑνθρώπων ἐπέδειξα) (Cyme, line 22; Thessalonica, lines 22–23). It is possible to call the Greek cult of Isis at this time a mystery cult. Parallelization of the Isis’ festival with the Mysteries of Demeter is important in the process of the development of these mysteries. The two goddesses had been parallelized and afterwards identified with each other. The syncretizing process on the cultic level followed parallelization so that the form of the mystery cult of Demeter was adapted into the cult of Isis. The development of the mystery festival of Isis in Greece resulted from the old Egyptian cult practices and the Greek practices of the mystery cults\(^75\), the most important of which was that of Demeter. It is noteworthy that in Hellenistic Egypt the nature of the cult of Isis differed from the Graeco-Roman mysteries of the goddess in the mainland Greece, for example, in Egypt there were sacred rites in which only the higher priests were allowed to participate.\(^76\) An opportunity open for all, men and women equally, was a Greek feature of the mysteries. The Graeco-Roman mysteries of Isis were typically open to both sexes regardless of social rank.\(^77\) This practice was also taken from

\(^73\) Aretalogy of Maronea (ca. 100 BC), see SEG 26, 821; Grandjean 1975, 122–124 and 1 ff.; Totti 1985, no. 19; Festugière 1949, 209–210; of Andros (late 1st cent. BC), see IG XII Suppl. 739; Totti 1985, no. 2; Peek 1930, 14–20 (text), 25–75 (commentary); of Cyme (1st or 2nd cent. AD), see IG XII Suppl. pp. 98–99; Totti 1985, no. 1; Salat 1927, 379–385; Peek 1930, 120–125 (text); Bergman 1968, 301–303 (Textbeilage); Grant 1950, 131–133; Merkelbach 1995, 115–118; of Thessalonica (1st or 2nd cent. AD), see IG XII 254; Totti 1985, no. 1; of Ios (2nd or 3rd cent. AD), see IG XII 254 (=IG XII Suppl. p. 98); SIG III 1267; Totti 1985, no. 1. See also Vanderlip 1972, 84–86; Bianchi 1980, 9–30; Leclant 1986, nos 1692–1709; Henrichs 1984, 154–156; Préaux 1978 (1987), 656–657; Vernet 1990, 41–46 and Merkelbach 1995, 113–114. V.F. Vanderlip (p. 86) gives also the stemma of the aretalogies thus assuming that there has been a common archetype for them all. D. Müller 1961, 7–69 compares and finds relation between them and the so called Isis arتلogy of Memphis (hieroglyphics and translation, p. 89–91) from the Ptolemaic great temple of Sarapis in Memphis; according to him there are many parallels between the Greek hymns to Isis and this text, thus many of the themes in the Greek ones reflect the strong Egyptianism expressed in the Memphis aretalogy; see ibid., esp. pp. 87–88; see also Merkelbach 1995, 73–76. The so called Isidorus hymn to Isis (ca. 96–80 BC) and the invocation to Isis in POxy XI 1380 (= Totti 1985, no. 20, 2nd cent. AD) from Egypt belong to the same genre as the aretalogies, see p. 108–109.

\(^74\) Vanderlip 1972, 89–90.

\(^75\) Bianchi 1980, 18–19.

\(^76\) Dunand 1975, 164; Griffiths 1975, 189; Burkert 1987, 40. Also M. Malaise 1972, 473 notes that in Egypt the tradition of initiation was not known before the Roman Imperial times. Note that in the Metamorphoses of Apuleius, Lucius goes abroad after his initiation and acts in his homeland (patria) as a constant worshipper (cultor) (Apuleius, Met. 287.24–25).

\(^77\) J.G. Griffiths 1975, 190–191 referring to Apuleius’ text viri feminaeque (Met. 273.15). Even though women were very welcome in the ranks of the initiants, the important priesthoods were occupied by men (Griffiths 1975, 189). Those people who became adherents of the cult of Egyptian gods in the Greek before 30 BC world are listed by T.A. Brady 1935, 47 ff. He classifies them by their social
the model of the Demetrian mysteries. Purification and purificatory rules in the sanctuary were likewise originally an Egyptian practice, but became incorporated in the Greek cult later on.\textsuperscript{78}

The terms used in connection with mysteries in Greece that appear in the epigraphical material, especially in the aretalogies of Isis, provide good evidence of the emergence of the Greek mysteries of Isis. The terms mystes or mystis appear in epigraphical material in connection with the cult of Isis, but not until the second century AD.\textsuperscript{79} The word appears in the aretalogy of Andros from the late first century BC (\textgreek{χάραξα \phiρικαλόν\ μύσται\ις\ ἱερὸν\ λόγον}, \textquoteright I terrifyingly pronounced the sacred words to the mystai\textquoteright, line 12). This supports the view that the mysteries of Isis came into existence in Greece at the end of the last century BC and held an established position by the first century AD. To this date, the first century AD, belongs an Athenian inscription IG II/II\textsuperscript{F} 1367 which clearly supports this hypothesis. It lists the Attic months and offerings that had to be made to the gods during these months. The Boedromion was the month for the Eleusinian Great Mysteries, and in lines 4–8 of the inscription the religious duties for this month are described. On Boedromion 13th, cocks and fruits of the cultivated earth, grains of wheat and corn, had to be offered to Nephthys and Osiris together with the drink offerings which contained not wine but milk (\textgreek{σπυνδη\ μελικρατον} lines 4–6). The offering of piglets had to be committed to Demeter and Kore (lines 6–7) and the gathering of the vintage to Dionysus (7–9). Cocks and pigs were the sacred animals of Demeter, but now a cock was sacrificed in honour of the Egyptian god Osiris at the time of the Mysteries. In memory of Demeter’s mythical fast it was prohibited to drink wine during the initiation period, and similarly this regulation was adopted in the cult practices of Osiris. The mysteries of the Egyptian gods were thus identified with those of the Eleusinian gods, even the sacrificial customs were mixed. Dionysus, who is mentioned in this section, had his popular Mysteries, and thus all the gods having mystery cults were grouped together. It is noticeable that Diodorus Siculus wrote in the second part of the first century BC that the initiation of Osiris is similar to that of Dionysus (1.96.5).\textsuperscript{80} The first two inscriptions to the Egyptian gods from Eleusis use the terms of the Eleusinian cult; they are from the latter part of the first century

---

\textsuperscript{78} Malaise 1986, 93.

\textsuperscript{79} According to SIRIS nos. 326 (Prusa, middle of the 2nd cent. AD); 390 (Rome, 1st cent. AD); 758 (Pancos, 3rd cent. AD). The words are used in connection with the Eleusinian cult still in the 2nd and 3rd cent. AD: see IG II/II\textsuperscript{F} 4213 (mystis); 3553 (mystis, hierophantes), both inscriptions from Athens, and 3686 (mystis) (Eleusis, 2nd cent. AD); no. 3639 (Eleusis, time of P. Herennius Dexippus who \textgreek{floruit} AD 253–276) mentions (l. 3) teletai and a nightly orgia of mystai.

\textsuperscript{80} \textgreek{τὴν\ μὲν\ γὰρ\ Ὄσερίδως\ τελετὴν\ τῇ\ Διονυσίῳ\ τὴν\ αὐτὴν\ εἴπαι}. He continues by explaining what is cited in p. 82. The inscription from Thessalonica IG X2 107 (end of 2nd cent. BC) dedicated to Osiris puts forward the words \textgreek{Ὀσερίδως\ μύστες} (l. 1) of people called Alexander, Demetrius and Dikaia who probably were initiated adherents of the cult of Osiris.
BC. The first one states that the *boule* (line 5) and *demos* (line 6) (of Athens) *ἐφ᾽ ἐστίας μηθείσαι* (lines 4–5), i.e. honoured the initiated child, the hearth initiand, a name ascribed to a special official in the Eleusinian cult. But the same inscription continues by telling that the *boule* and *demos* *κανηφόροις ἄναψαν Σαράπιδι* (lines 12–14) i.e. honoured a woman *κανεφόρος* who carried sacred things or basket in the procession for Sarapis. The terminology of the inscription is familiar from the Eleusinian cult: to carry sacred things, often by *κανεφόροι*, belonged to the Eleusinian procession as well. The other inscription is also from Eleusis and from the same period stating similarly about the hearth initiand (lines 4–6), but in this case the *boule* and *demos* honoured the *κανεφόροι* of Isis (lines 1–3). Furthermore another Athenian inscription SIRIS, 33a the first part of which (lines 1–21) is dated to the end of the first century BC and the second part (lines 22–29) to the middle of the first century AD enumerates sanctions given in the name of the city-*boule* of Athens (*κατὰ αὐτοῦ φῶς πρὸς τὴν βουλήν καὶ τοὺς βασιλείας Ἀθηναίων*, lines 8–9) to persons guilty of acting against the sacred law of the sanctuary of the Egyptian gods Isis and Sarapis (*ἐν οὐσίᾳ ἐστιασάς τῇ ἁμαρτήσῃ*, line 7). The sacred rules are called *dogma* (lines 15–16). Thus it seems evident that in addition to its established and public character the cult had rules protecting its special cultic purity. Together with this epigraphical evidence, the aretalogy of Maronea from the early first century BC gives a clear *terminus ad quem* for the established existence of the mysteries of the Egyptian gods. It differs from other aretalogies in content, and it is only in this that we may observe the clearly Greek aspects of the mysteries of Isis, because even though Isis appears as Egyptian in her origin and character, she is paralleled with Greek Demeter and

---

**Notes:**
81 IG II/III² 3498.
82 About hearth initiand see pp. 38–39.
83 *Κανηφόρω*, 'to carry the sacred basket in procession' occurs in other cults, see e.g. parallel inscriptions IG II/III² 3220 (1st cent. BC) from Eleusis which states that the *boule* and *demos* honoured the *κανεφόροι* of the cult of the Mother of the gods (II. 11–12), Asclepius (II. 6–7) and Aphrodite (II. 16–17); 3477 (2nd cent. BC) from Athens stating that the *boule* and *demos* honoured the *κανεφόροι* of Pythian i.e. Delphian Apollo and those of the procession of the *Panathenaia*; 3489 (after 86 BC) from Athens honours the *κανεφόροι* of Dionysus and the Mother of the Gods; 3554 (1st cent. AD) from Athens stating similarly that the *boule* and the *demos* honoured the *ἀρρηφόροι* of Athena Polias (II. 3–4), hearth initiand (II. 12–13), and the *κανεφόροι* of the procession of the *Eleusinia* and *Epidauria* (II. 21–22).
84 IG II/III² 3727.
85 It is found in Pikermi, close to Athens, close to the church of Methamorphosis where L. Vidman suggests there was a sanctuary of the Egyptian gods (1969, 18). J.J. Pollitt first published the inscription in Hesperia 34 (1965): 125–130; it is also to be found in SEG XII 167.
86 SEG 26, 821. Compare this and its Eleusinian themes with a later hymn to Isis, the Isis-hymn of P. Aelius Mesomedes, text in Merkelbach 1995, 226–227, commentary 227–228. Mesomedes was born in Crete, was literarily cultivated and had close connections to the Hadrian's (117–138) court. His four hymns are the hymn to Helios, to Isis, to Physis and to Nemesis. The one to Isis is heavily coloured by the Eleusinian themes: Isis is the one who in spring time brings new production of earth (I. 8, 11), new births (I. 13), who is called upon by Hades to the underworld to celebrate wedding (II. 9–10), who has got the holy fire of the rites of which none is allowed to speak (πῦρ τέλεων ἄρηστον, I. 14), to whom Triptolemos comes from the city in wagon (ἐστει διπροίησα) to dance in the *Anactoron* (II. 17–19).
her cult seems to be dependent on the cult of Demeter. The aretalogy of Maronea draws a parallel between the cult of Isis and the Eleusinian mysteries of Demeter. It ends with a hymn-like section which enthusiastically praises Athens and Eleusis as the origins of Europe (lines 39–40). According to the aretalogy Isis is especially honoured there in Athens and at Eleusis in the sanctuary which is the origin of this city (lines 35–36). “That is why we desire to go to see Athens in Greece and Eleusis in Athens” (lines 39–40). Isis’ position in Eleusis is important, because it is there that she is said to have revealed the fruits of the earth for the first time (line 36). Here the two goddesses are identified totally. The same mythical occurrence justifies the cult and there is no separation between Isis and Demeter. The Demetrian mysteries provided a structural model for the mysteries of Isis. In the same manner Apuleius makes an explicit identification of these goddesses in praising Isis two centuries later: “O Queen of Heaven – whether thou art Ceres, the primal and bountiful mother of the crops, who, glad in the return of the daughter ... showed to men gentler nourishment, after which thou hast now honoured the soil of Eleusis” (Met. 267.4–6). As a mystery cult, the cult of Isis in Greece was creative, and it could assimilate local mystery aspects into the old Egyptian tradition in a creative way. Before this there was a coexistence of the two forms, as on Delos, where the two different types of the cult of Isis existed side by side: an old Egyptian type, one which respected original traditions in Sarapieion A and a Greek thiasos type in Sarapieion C. But the Greek mysteries of Isis were characterized also by cosmopolitanism and syncretism, and these elements accumulated into the monotheistic tendencies of the goddess and were well expressed in the praises given to her. An original Egyptian trait in the cult was the idea that the goddess herself invited an individual, by means of a dream, to become her devoted worshipper or an initiated adherent of her cult, after which he was expected to devote himself entirely to the cult, as, for example, Lucius in Apuleius’ Metamorphoses. The theme of overcoming death was strengthened in the Graeco-Roman mysteries of Isis. To sum up, it is worth citing the statement made by Diodorus Siculus at the end of the pre-Christian era: “The initiation of Isis is very much like the initiation of Demeter. It is only question of changing the names” (τελετὴν ... τὴν δὲ τῆς Ἀθηνᾶς καὶ τῆς Δημητρίας ὑπάρχειν, τῶν ὄνομάτων μόνων ἐγνύμαγενοι) (1.96.5).

88 Grandjean 1975, 103–104; Bianchi 1980, 17; Merkelbach 1995, 63–64. F. Dunand 1984, 88 states: “la transformation de l'image peut signifier que les fideles grecs voient dans cette Isis-Déméter une déesse totalement intégrée à leur univers, à leurs catégories mentales”; and Henrichs 1984, 158 concludes: “The Maronean inscription reactivates and elaborates an Eleusinian heritage which characterizes the Greco-Egyptian assimilation of Isis to Demeter.”
89 Another parallelization is made by Apuleius when he describes the appearance of Isis saying that the crown of the goddess “was adorned also with outstretched ears of corn” (etiam cerarialibus desuper porrectis ornata) in Met. 268.13. Ears of corn were originally one of the most characteristic epithets of Demeter, but then occurred in connection with Isis when she became identified with her.

V. Definitions: Re-evaluation of Concepts

1. Syncretism

A. Theoretical Beginnings

The 'syncretism of antiquity' and specially that which emerged after the conquests of Alexander the Great has been regarded as the classical instance of syncretism in the history of religions. But in literature syncretism is too often used as a term which needs no explanation as to its meaning and contents. "Syncretism is most characteristic of Hellenistic religion",1 "it defines Hellenistic Religion as a response to the new political internationalism, a response that preserved the richness and particularity of tradition ..."2 Statements of this sort are found all too easily. H. Ringgren stated that in everyday language the term syncretism is used to denote any mixture of two or more religions, as for instance, in Hellenistic religions, where elements from several religions are merged and influence each other mutually. He continues, correctly, that this definition is too broad to be scientifically useful.3 Thus, the term does need clarification.

Studying syncretism is studying change, and changes make up a process. Culture as a whole is a syncretistic and continuous process. Culture does not necessarily develop in one

1 F.C. Grant 1953, xiii (Introduction) in the book the name of which is characteristic: Hellenistic Religions. The Age of Syncretism.
2 Martin 1987, 10. See also e.g. Samuel 1983, 75: "So called syncretism of religions has been cited as a major characteristic of Hellenistic culture", and Henrichs 1984, 140.
3 Ringgren 1969, 1.
direction only, going from a lower to higher level, but simply evolves progressively. Syncretism as a theoretical term in literature has had negative connotations. It has been treated as a result of decrease, a deprived stage caused by mixing which has damaged the original wholeness and purity and thus is a negative change, a change which includes corruption and scatters original wholeness into lesser parts. This kind of thinking is based on a need to project the events of the past onto imaginary ‘original’ constructions, to freeze the process into stable stages. Since the beginning of the history of the science of religions syncretism has had these negative overtones from which it should be released. In great part this was due to the need to defend ‘pure, real and authentic’ religion (which was, of course, always the defender’s own). The term was already being used polemically in the struggles of the theologians of the 16th and 17th centuries. It is possible that they also used it in order to defend the seventeenth century Protestant movement which had attempted to harmonize the diverse sects of Protestantism in the face of Roman Catholicism. In this sense it appeared frequently in the science of religion and historical theology in the second half of the nineteenth century. We may mention, for example, H. Usener for whom religious syncretism was not only abandonment of the faith of the fathers, but also a necessary transitional stage in the history of religions, a ‘mishmash of religions’ (Religionsmischerei), a term which has negative overtones in German. J. Réville regarded syncretisme as the central category of his historical study of later Roman religion, but it still implied its theological overtones. In 1903 H. Gunkel articulated a non-theological, historically formulated thesis according to which Christianity, too, was a syncretistic religion.

The term syncretism is a theoretical invention and can be traced as such later, but not in ancient times. The authors of antiquity did not use it, although there are many words used as nouns beginning with συν- and having the root of κεραυνω. The Greeks had no need to use a term for religious syncretism. The concept of syncretism may be used as a category of historical explanation, as an instrument for understanding. As a theoretical concept and as an abstraction, syncretism is a construction which does not have a correspondence in contextual reality, but provides new categories for handling the religious processes of the past. Its main value may be as a heuristic tool for trying to discover the otherwise hidden antecedents of historical facts and to interpret them. Every interpretation requires typologizing, and typologizing is the first step in interpretation. The problem

4 Nouailhat 1975, 214.
5 Martin 1983, 135.
8 Idem, e.g. p. 21. See also Martin 1983, 135.
10 See e.g. Segert 1975, 63–66. The term συγκρητισμός first occurs in Plutarch’s Mor. 6.490b, but it is etymologically completely different from our ‘theoretical syncretism’ and he used it in a completely different context which had nothing to do with religion. Its etymology is κρητιζω ‘to speak like a Cretan’, from which κρητισμός ‘the Cretan behaviour’. E.g. des Places 1969, 13; Martin 1983, 136 and Colpe 1987, 218 are totally wrong in linking Plutarch’s text to the meanings of syncretism.
is whether syncretism is considered to be explaining a stable state, a result of changes, or a process. In the first case syncretism is a category on its own and in the last it is unstable. By taking a chronological frame of reference into account a solution can be found – actually I find it hard to think of syncretism without implications of process. In the following I shall do this by constructing a theoretical syncretistic process by considering historical data that lead to syncretism as a process (syncretism as process) and then construct the result of this process, a kind of ‘metasyncretism’, which may help in understanding the phenomena in question by providing categories for typologizing (syncretism as a state or category). As is obvious, we should not find ourselves arguing in a circular manner, explaining the phenomenon of syncretism by syncretism. We can escape this danger by concentrating here on the defined situation, i.e. that of Hellenistic Athens and Delos. At the same time, we must remember that this particular syncretism gave new grounds for a continuous syncretistic process, even though here we remain inside the stipulated boundaries. My task is to provide answers to the question of what exactly syncretism in Hellenistic Athens as well as Delos was per se, not to go further into the newer syncretisms of later times. Thus I start from the primary material, taking the context into account, and then construct a theoretical picture of syncretism in this case, because no definition of syncretism is possible without the specific context underlying it. Syncretism in this sense is 1) a process in the context which may be theorized into 2) a conceptual category, in order to systematize and thus to understand some important characteristics of the religion of Hellenism. This is an inductive method and the point of departure is the primary material. The next level is the formulated theoretical picture of the syncretism of Hellenistic Athens.

This chronology includes typologizing syncretism. In Greek culture there were first local gods which were strictly bound to the surrounding culture and its conditions. They had their own mythology, which developed slowly and reflected the special needs of the local culture. Thus these gods were functionally rooted in a particular culture. Secondly, when elements of foreign and local cultures come into contact to such an extent that the

---

12 C. Colpe 1987, 219–220 and R. Nouailhat 1973, 213–214 discuss this from their own points of view. L.H. Martin 1983, 137–139 proposes that syncretism would be better understood if it was handled as a system and not applied to describe a historical process. He calls this a ‘systemic view’ of Hellenistic religious syncretism and understands this syncretism as an enduring finite field. Martin bases his opinion on R. Baird’s view on religious syncretism; Baird 1971, 151, mainly from the point of view of an anthropologist of religion, argues that “Syncretism is a concept applied to a religion by those who stand outside its circle of faith and hence fail to see or experience its inner unity.”

13 Nouailhat 1975, 214.

14 Cf. Colpe 1985, 219. H. Ringgren 1969, 8–12 puts forward two questions for studying syncretism on the basis of the empirical facts of encounter of religions: firstly, the historical aspect which asks what elements derive from the one or the other source and how they have merged with each other, and secondly, what are the conditions for a borrowing to take place.

new religious elements influenced those of the prevailing religion, there occurred a phenomenon that may be called *interpretatio* (interpretatio Graeca, interpretatio Deliaca, interpretatio Romana, for example)\(^{16}\); namely, foreign religious elements adjusted to the traditional system and the local system is mirrored by it. In the alien individual element there must be at least some familiar traits which represent that which is known in the local tradition. Thus there must be analogies, for example, between a local god and a foreign one on which basis both of them or one of them is reinterpreted. This stage in the syncretizing process includes parallelization. Parallelization is most usually expressed literally: the names of the gods are put one after another, such as Demeter–Isis, Isis–Aphrodite, Isis–Agathe Tyche, Isis–Mother of the Gods. The third stage in the chronology of syncretism is assimilation or amalgamation. This means symbiosis or synthesis of different religious systems into a new one. The result is a new entity in which the individual traits of the amalgamated elements are difficult to see as separate parts. This designates a self-supporting system that may in turn produce new elements. It is possible to discover syncretized cultic practices, too. This may be regarded as the last and final stage of this chronology of syncretism, because it is also possible to study how this kind of independent religious system functions. If we went further, we would find 'fully developed' new religions, possibly in isolation, and so on. These would not be syncretistic any more, because syncretism always has something to do with change and we are studying the situation of change. An example of a syncretism of this last type is the religion of Sarapis.\(^{17}\) The cult of this god was consciously produced to be used for political and social goals: for unifying separated and heterogenous peoples together in the name of a common god who incorporated features of the gods well-known to different peoples. Syncretism in this case contains also the very consciousness of amalgamating. This could happen only in an open climate where there already existed separate and diffuse areas of religiousness in contact with each other.\(^{18}\)

To sum up, the process was this: separate religious systems adapted functionally into the surrounding culture → cultural and religious contacts caused parallelization → assimilation and synthesis of religions caused a new wholeness which was still open to changes → stable syncretistic religion or consciously produced syncretism emerged i.e. a new religion as a complete system was born.

In the following the constellation above is mainly used to study the material of the cults of Demeter and Isis. First it is valuable to look at parallelization and identification more generally and then to look at Demeter and Isis more closely.

---

\(^{16}\) These were long regarded as principal presuppositions, or even as a principal phrase of syncretism itself. Colpe 1978, 224; Martin 1983, 134. R. Merkelbach 1995, 231, 235–238 examines the so called *interpretatio aegyptica* by which he means the tendency to interpret Greek religion and philosophy from the Egyptian point of view and to stress the Egyptian elements of thought; according to him this is especially evident in Diodorus Siculus.

\(^{17}\) See pp. 92–94. This represents e.g. L.H. Martin's (1983, especially pp. 140–141) 'systemic' syncretism referred to above on p. 87 (n.12). About the syncretism of Sarapis' cult, see pp. 92–94.

\(^{18}\) Cf. Colpe 1987, 222.
B. The Concept of Syncretism in the Typologies of Encounter of Religion

B.1. Parallelization

We should remember that the sources which tell us about parallelization are mainly literary. The first and most revealing example of this comes from Herodotus. When describing the Egyptian manner of performing rites compared with those of the Greeks, he states that "Isis is called Demeter in the Greek language" (2.59). He also claims that "the Greeks only recently adapted the old Egyptian customs to their own" (2.59; 2.156). Herodotus compares the two goddesses, keeping them as separate individuals. He regarded them as equivalent rather than handling them in a syncretizing manner. Parallelization is thus no invention of the Hellenistic period; it only became more common during that era.

The Athenian material concerning early Hellenistic Isis, namely inscriptions and texts of Athenian authors, is not very large. But Athens was closely linked with Delos from the third to the last century BC. Athenian influence was strong on the island especially during the period of the city's occupation there. The period of Athenian occupation on Delos was the hey-day of religious activities on the island: Athenians were interested in making their devotions there, most of the priests were Athenians, official delegations visited the sanctuaries, and there were active artists on Delos.

There are many Delian inscriptions belonging to the period between the end of the third and the beginning of the first century BC that connect Isis with some other goddess. The inscription given by a certain Andromachus, dedicated to Isis whose epithet is Soteira, and who is connected with Astarte and Aphrodite with the epithets εὐπλοια and ἐπήκοος, and to Eros, connected with Harpocrates and Apollo, is very characteristic (ID 2132):

"Ισιδί Σωτείραι
'Aστάρτει Ἀφροδίτη εὐπλοιαὶ ἐπηκόοι
καὶ Ἐρωτὶ Ἀφροκράτει Ἀπόλλωνι,
'Ανδρόμαχος Θανομάχου
[ὑπὲρ ἑαυτοῦ] καὶ τέκνων χαριστήριον.

19 Dunand 1973, 81.
20 Bregman 1982, 59: "Syncretism itself may be defined as the combination and association of divinities, practices and ideas from different religious traditions. It is a common phenomenon in the history of religions."
21 See p. 4. The number of the foreign population (Athenians included) on Delos increased remarkably from the end of the 3rd cent. onwards, when even citizens are met in inscriptions; see IG XII 1299, 1. 81–83 (1st cent. BC); see the diagrams and explanations given by M.-F. Baslez 1977, 143–148, especially p. 150 which shows that the Athenian population formed the first or second biggest group of all the people of Delos; and see Roussel 1916b, 10–13.
